*Alkanes* Luisa Margarida Martins 2019 Over the last few years, there has been a growing interest in the development of sustainable processes for the large-scale production of commodities. The book *Alkanes: Properties, Production and Applications* offers a comprehensive review of physicochemical properties of industrially important alkanes, their upgrades, and use in the synthesis of valuable functionalized organic compounds, with a focus on simple, mild, and green catalytic processes. Moreover, emerging technologies of alkane decontamination are also addressed. Thus, a state-

of-art examination of the physicochemical properties of selected liquid n-alkanes, aiming at enhancing the knowledge and understanding of such an important class of compounds, is presented. One application of long chain n-alkanes is to take a part of the composition of several fuels and lubricants. In order to produce them with beneficial cold-flow properties, the linear alkanes, commonly designated as waxes, must undergo an upgrading process. The authors present the several catalytic systems used to transform linear to branched long chain alkanes, from the more traditional processes to the current research trends. On the other hand, the use of alkanes as raw materials in organic synthesis has been heavily investigated in recent years; given how abundant and cheap they are as a carbon source. As such, the authors focus on the use of C-scorpionate transition-metal complexes as homo- or heterogeneous catalysts for the challenging selective oxidation of alkenes, under mild and

unconventional conditions, to functionalized value-added organic compounds. Regarding alkanes functionalization, the introduction of a halogen atom at a specific site in an alkyl chain provides an avenue for the creation of novel synthetic routes. Accordingly, the state-of-art selective halogenation of unactivated C-H bonds is presented and discussed. Lastly, the serious pollution problem of prevalent alkanes in water bodies is addressed by presenting the most cost effective and environmentally relevant emerging technologies to recover the natural balance of ecosystems.

**Explicit Biology - A Revision Course (3rd Edition)** O. J.

Olaoye 2014-05-01 The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six

chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST-UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. **Invisible Man** Ralph Ellison  
2014-08-14 'I am invisible, understand, simply because people refuse to see me.' Defeated and embittered by a country which treats him as a non-being, the 'invisible man' retreats into an underground cell, where he smokes, drinks, listens to jazz and recounts his search for identity in white society: as an optimistic student in the Deep South, in the north with the black activist group the Brotherhood, and in the Harlem race riots. And explains how he came to be living underground . . . 'An American classic . . . one of the most original voices of Black America.' The Times

Alex Agyei-Agyiri 2003 Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This

story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

**Oral English 1** Michael Anthony 2018-09-09 The two books, Oral English 1 and Oral English 2, are unique publications in the field of spoken English for English learners at the college or similar level. They're unique in three important ways: First, the books treat all the popular topics, thirty in total, from fun topics like sports to serious topics like politics. Each topic is covered in an unprecedentedly comprehensive way, using various approaches ranging from key words to games. Second, the books can be used

as class textbooks, in which case they have more than enough material for a whole academic year. They can also be used for self-study and as reference books. Third, the books are very user-friendly: they present content in a logical format, use clear and helpful illustrations, and provide hints and answers to questions. The two books are the result of more than a decade of research and teaching oral English to non-native speakers. Readers will find the books not only educational, but also very informative and quite entertaining.

**Math Study Skills** Alan Bass 2012-10-25 Math Study Skills outlines good study habits and provides students with study strategies and tips to improve in areas such as time management, organization, and test-taking skills. With a friendly and relatable voice, Alan Bass addresses the misgivings and challenges many students face in a math class, and offers techniques to improve their study skills, as well as

Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofo. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.

*Shock Waves* Fedor Vasil'evich Shugaev 1998 This volume deals with the propagation of three-dimensional shock waves and their reflection from curved walls. It is divided into two parts. The first part presents a ray method. This is based on the expansion of fluid properties in power series at an arbitrary point on the shock front. Continuous fractions are used. Results for shock propagation in non-uniform fluids are given. The second part discusses the shock reflection from a concave body. The important shock-focusing problem is included. The work is supported by both numerical and experimental results. Many interesting features, such as formation of a jet, vortices and the appearance of disturbances on the shock front, are discussed. Besides shock waves in gases, the distinctive features of shock propagation through a weakly ionized plasma are considered.

for children to perform should be a winner. These twenty-five favourites include King Midas, Perseus and Andromeda, Orpheus and Eurydice, and Theseus and the Minotaur. They can be performed singly or several in one performance, for which a dramatic framework has been supplied. They are easy to stage, with casts that can be expanded or contracted, and there are notes and suggestions for simple props and costumes. Enhanced by Richard Brassey's line drawings, these plays are as much fun to read as they are to perform.

*Vocationalisation of Secondary Education Revisited* Jon Lauglo 2006-03-30 The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in

Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany **AP** Philip Michael Sadler 2010 Draws together the most recent and rigorous research on the strengths and weaknesses of the Advanced Placement program. **No Longer at Ease** Chinua Achebe 2013-04-25 Obi Okonkwo is an idealistic young man who, thanks to the privileges of an education in Britain, has now returned to Nigeria for a job in the civil service. However in his new role he finds that the way of government seems to be backhanders and corruption. Obi manages to resist the bribes that are offered to him, but when he falls in love with an unsuitable girl - to the disapproval of his parents - he sinks further into emotional and financial turmoil. The lure of easy money becomes harder to refuse, and Obi becomes caught in a trap he cannot escape. Showing a man lost in cultural limbo, and a Nigeria entering a new age of disillusionment, *No Longer at Ease* concludes Achebe's

remarkable trilogy charting three generations of an African community under the impact of colonialism, the first two volumes of which are *Things Fall Apart* and *Arrow of God*.

Fences August Wilson 2019-08-06 From legendary playwright August Wilson comes the powerful, stunning dramatic bestseller that won him critical acclaim, including the Tony Award for Best Play and the Pulitzer Prize. Troy Maxson is a strong man, a hard man. He has had to be to survive. Troy Maxson has gone through life in an America where to be proud and black is to face pressures that could crush a man, body and soul. But the 1950s are yielding to the new spirit of liberation in the 1960s, a spirit that is changing the world Troy Maxson has learned to deal with the only way he can, a spirit that is making him a stranger, angry and afraid, in a world he never knew and to a wife and son he understands less and less. This is a modern

classic, a book that deals with the impossibly difficult themes of race in America, set during the Civil Rights Movement of the 1950s and 60s. Now an Academy Award-winning film directed by and starring Denzel Washington, along with Academy Award and Golden Globe winner Viola Davis.
