**The Shell Man** Mike Pearce 2015-10-03 In the South Pacific there is a remote isolated tropical island whose beaches are totally made out of shells. Everyday, and especially during storms, thousands of shells are washed in onto the sand and collected by a family who live on the edge of the beach. For years Tom's parents have been collecting shells and making them into elaborate jewellery and hanging ornaments. This is the story of the baby (Thomas) brought up on the beach who through constant contact with the beach managed to develop an unusual capability of incorporating shells into the skin on his back. This had never been recorded before and no one else on the island had this ability. As he grew up he became well known and respected and when people had problems they would go and see the shell man for advice. This phenomenon led to him leaving the island but returning years later to find that shell island was no longer the peaceful home that he knew so well.

**Bulk Material Handling** Michael Rivkin Ph.D. 2018-09-15 Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.
