Project Mustang Larry Lyles 2007 Project Mustang is a complete guide to restoring America’s favorite muscle car, written by auto-restoration guru Larry Lyles, a regular contributor to Auto Restorer magazine. In this detailed 23-chapter volume, Lyles walks the car owner from the in-depth inspection of the vehicle and the beginning of the teardown to re-covering the seats and replacing the frame rail...and every step in between. The car restored for the project in the book is a 1968 California Special Mustang. The chapter titles themselves speak for what a straightforward DIY manual Lyles has written, as he details the step-by-step procedure of bringing a very cool rod back to life. Beginning the teardown, exterior and interior; repairing the sheet metal, door, and deck up; removing the major parts (driveshaft, engine, transmission, front suspension, steering system, etc.); removing old point and replacing rust floors; no-weld rust repair; perfecting the metal; working with plastic body filler; priming and sanding; refinishing the components and underside, the door, interior, trunk, and body; wiring the car and installing the doors; applying the coatings, rebuilding the suspension, and installing the brake lines; installing the vinyl top cover, the headliner, and the glass; rebuilding and installing the engine; installing the front sheet metal, emblems, bumpers, stripes, carpet, and console; re-covering the seats; and replacing the frame rails. Each step in every chapter is photographed as the author progresses along, with captions to spell out exactly what has to happen. The book offers helpful advice about choice of tools and tips to make even beginners feel confident about tackling the many steps involved. With nearly forty years experience in repairing, rebuilding, and restoring classic cars (and lots of non-classic ones!), Lyles emphasizes the reader’s need to organize his or her project by determining the course of the project, researching suppliers, making lists of parts and their conditions, creating spreadsheets of estimated and actual costs, and photographing each component as a reference for later in case the restoration goes off track. Each chapter ends with a “notes” page for the reader to record his or her progress, making this manual a practical workbook as well. When the reader gets to the final pages of the book and reads the sections “Start the Engine” and “Test Drive the Car, ” there will be a true sense of accomplishment. An appendix of part suppliers and an index complete the book.

1969 Ford Mustang Mach 1 Mike Mueller 2018 By the time the 1969 model year rolled around, it was well established that muscle cars were fast and plentiful. Every manufacturer had at least one corner of the showroom where the "go fast" guys could congregate and discuss the merits and time slips of the latest performance offerings. Competition being what it was, the manufacturers were looking for ways to entice potential buyers to choose their product over ever-increasing offerings from the competition. Some manufacturers tried to accomplish this with affordable prices, some tried fancy marketing schemes, and some created a look and a style that screamed "performance" even when standing still. The 1969 Mach 1 was Ford’s attempt to create a package and a style to match the performance of its recently released and very potent 428-ci Cobra Jet engine package. Displacing the still-available but more conservative GT trim, the Mach 1 included unique and innovative graphics and mechanical innovations including shaker hood scoops, dual racing mirrors, deluxe interiors, competition suspension, dual chrome exhaust tips, and blacked-out hoods. The result was a wildly popular model that sold more than 70,000 units, compared to slightly more than 5,000 GT models for the year. Each volume in the In Detail Series provides an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, an in-depth study of all hardware and available options, and an examination of where the car is on the market today. Also included are paint and option codes, VIN and build tag decoders, as well as production numbers.

Newitt and licensed by Ford is a hardbound, full color 224 page detailed story of the limited-edition 1968 Ford Mustang--which was created just for California. The story continues with the marketing plan by J.Walter Thompson and California’s Ford Dealer’s Association to bring this Mustang to market in the spring of 1968. A detailed account of the GT/CS variant, the "High Country Special," sold in the Denver sales district is also included. Detailed production statistics, rare factory photos, authentication, options, accessories, specific part descriptions and comprehensive Concours restoration information are covered, along with the complete stories of the Shelby prototype coupes "Little Red," and the EXP-500 "Green Hornet." Dressing for Altitude Dennis R. Jenkins 2012-08-27 "Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."-NTRS Web site.
