**Transient Techniques in Electrochemistry** Digby Macdonald 2012-12-06 The study of electrochemical reactions by relaxation or transient techniques has expanded rapidly over the last two decades. The impetus for the development of these techniques has been the desire to obtain quantitative data on the rates of "fast" electrochemical processes, including those coupled to homogeneous chemical reactions in solution. This has necessarily meant the development of techniques that are capable of delineating the effects of mass transport and charge transfer at very short times. The purpose of this book is to describe how the various transient techniques may be used to obtain the desired information. Emphasis is placed upon the detailed mathematical development of the subject, since this aspect is the most frequently ignored in other texts in this field. In any relaxation or transient technique for the study of rate processes, it is necessary to disturb the reaction from equilibrium or the steady state by applying a perturbing impulse to the system. The system is then allowed to relax to a new equilibrium or steady-state position, and the transient (i. e. , the response as a function of time) is analyzed to extract the desired kinetic information. In electrochemical studies the heterogeneous rate constants are, in general, dependent upon the potential difference across the interface, so that the perturbing impulse frequently takes the form of a known variation in potential as a function of time.

*QL 4* James Garrison 2017-05-05 PFC Bell, a newly-minted U.S. Army MP, quickly discovers that there's more than a war going on along QL 4, the main road from Saigon into the Mekong Delta. It's old-fashioned crime and corruption. He doesn't want to get involved, just serve out his time and go home, but life for an American MP in Vietnam in 1970 doesn't work that way. QL 4 leads Bell deep into a swamp of deception, mayhem, and death that insinuates its way both into towns the MPs patrol each day and into the old French villa where they live.
