**Alchemy** Rory Sutherland 2019-05-07 'A breakthrough book. Wonderfully applicable to everything in life, and funny as hell.' Nassim Nicholas Taleb Why is Red Bull so popular – even though everyone hates the taste? Why do countdown boards on platforms take away the pain of train delays? And why do we prefer stripy toothpaste? Discover the alchemy behind original thinking, as TED Talk superstar and Ogilvy advertising legend Rory Sutherland reveals why abandoning logic and casting aside rationality is the best way to solve any problem. In his first book he blends cutting-edge behavioural science, jaw-dropping stories and a touch of branding magic on his mission to turn us all into idea alchemists. He shows how economists, businesses and governments have got it all wrong: we are not rational creatures who make logical decisions based on evidence. Instead, the big problems we face every day, whether as an individual or in society, could very well be solved by thinking less logically. To be brilliant, you have to be irrational.

**Book of Beasts** Elizabeth Morrison 2019 A celebration of the visual contributions of the bestiary--one of the most popular types of illuminated books during the Middle Ages--and an exploration of its lasting legacy. Brimming with lively animals both real and fantastic, the bestiary was one of the great illuminated manuscript traditions of the Middle Ages.

Encompassing imaginary creatures such as the unicorn, siren, and griffin; exotic beasts including the tiger, elephant, and ape; as well as animals native to Europe like the beaver, dog, and hedgehog, the bestiary is a vibrant testimony to the medieval understanding of animals and their role in the world. So iconic were the stories and images of the bestiary that its

beasts essentially escaped from the pages, appearing in a wide variety of manuscripts and other objects, including tapestries, ivories, metalwork, and sculpture. With over 270 color illustrations and contributions by twenty-five leading scholars, this gorgeous volume explores the bestiary and its widespread influence on medieval art and culture as well as on modern and contemporary artists like Pablo Picasso and Damien Hirst. Published to accompany an exhibition on view at the J. Paul Getty Museum at the Getty Center May 14 to August 18, 2019.

### **Librarian's Guide to Games and Gamers: From Collection**

**Development to Advisory Services** Michelle Goodridge 2021-11-30 As games grow ever-more ubiquitous in our culture and communities, they have become popular staples in public library collections and are increasing in prominence in academic ones. Many librarians, especially those who are not themselves gamers or are only acquainted with a handful of games, are ill-prepared to successfully advise patrons who use games. This book provides the tools to help adult and youth services librarians to better understand the gaming landscape and better serve gamers in discovery of new games—whether they are new to gaming or seasoned players—through advisory services. This book maps all types of games—board, roleplaying, digital, and virtual reality—providing all the information needed to understand and appropriately recommend games to library users. Organized by game type, hundreds of descriptions offer not only bibliographic information (title, publication date, series, and format/platform), but genre classifications, target age ranges for players, notes on gameplay and user behavior type, and short descriptions of the game's basic premise and appeals.

**The Alchemy of Us** Ainissa Ramirez 2020-03-03 In the bestselling tradition of *Stuff Matters* and *The Disappearing Spoon*: a clever and engaging look at materials, the innovations they made possible, and how these technologies changed us. In *The Alchemy of Us*, scientist and science writer Ainissa Ramirez examines eight inventions—clocks, steel rails, copper communication cables, photographic film, light bulbs, hard disks, scientific labware, and silicon chips—and reveals how they shaped the human experience. Ramirez tells the stories of the woman who sold time, the inventor who inspired Edison, and the hotheaded undertaker whose invention pointed the way to the computer. She describes, among other things, how our pursuit of precision in timepieces changed how we sleep; how the railroad helped commercialize Christmas; how the necessary brevity of the telegram influenced Hemingway's writing style; and how a young chemist exposed the use of Polaroid's cameras to create passbooks to track black citizens in apartheid South Africa. These fascinating and inspiring stories offer new perspectives on our relationships with technologies. Ramirez shows not only how materials were shaped by inventors but also how those materials shaped culture, chronicling each invention and its consequences—intended and unintended. Filling in the gaps left by other books about technology, Ramirez showcases little-known inventors—particularly people of color and women—who had a significant impact but whose accomplishments have been hidden by mythmaking, bias, and convention. Doing so, she shows us the power of telling inclusive stories about technology. She also shows that innovation is universal—whether it's splicing beats with two turntables and a microphone or splicing genes with two test tubes and CRISPR.

**The Thing Which Has No Name** Rory Sutherland 2019-03-14 To be brilliant, you have to be irrational Why is Red Bull so popular - even

though everyone hates the taste? Why do countdown boards on platforms take away the pain of train delays? And why do we prefer stripy toothpaste? We think we are rational creatures. Economics and business rely on the assumption that we make logical decisions based on evidence. But we aren't, and we don't. In many crucial areas of our lives, reason plays a vanishingly small part. Instead we are driven by unconscious desires, which is why placebos are so powerful. We are drawn to the beautiful, the extravagant and the absurd - from lavish wedding invitations to tiny bottles of the latest fragrance. So if you want to influence people's choices you have to bypass reason. The best ideas don't make rational sense- they make you feel more than they make you think. Rory Sutherland is the Ogilvy advertising legend whose TED Talks have been viewed nearly 7 million times. In his first book he blends cutting-edge behavioural science, jaw-dropping stories and a touch of branding magic, on his mission to turn us all into idea alchemists.

Stuff They Don't Want You to Know Ben Bowlin 2022-10-11

"Interesting...Bowlin's calmly rational approach to the subject of conspiracy theories shows the importance of logic and evidence."—Booklist "A page-turning book to give to someone who believes in pizza pedophilia or that the Illuminati rule the world."—Kirkus Reviews The co-hosts of the hit podcast Stuff They Don't Want You to Know, Ben Bowlin, Matthew Frederick, & Noel Brown, discern conspiracy fact from fiction in this sharp, humorous, compulsively readable, and gorgeously illustrated book. In times of chaos and uncertainty, when trust is low and economic disparity is high, when political institutions are crumbling and cultural animosities are building, conspiracy theories find fertile ground. Many are wild, most are untrue, a few are hard to ignore, but all of them share one vital trait: there's a seed of truth at their center. That seed carries the sordid, conspiracy-riddled history of our institutions and corporations woven into its DNA. Ben Bowlin, Matt Frederick, and Noel Brown host the popular iHeart Media podcast, Stuff They Don't Want You To Know. They are experts at exploring, explaining, and interrogating today's emergent conspiracies—from chem trails and biological testing to the secrets of lobbying and the indisputable evidence of UFOs. Written in a smart, witty, and conversational style, elevated with amazing illustrations, Stuff They Don't Want You to Know is a vital book in understanding the nature of conspiracy and using truth as a powerful weapon against ignorance, misinformation, and lies.
