against which all other outdoor-industry awards are measured.

**Knowledge Integration and Innovation** Christian Berggren 2011-08-11 Technology-based firms continue to compete primarily on innovation, and one continuously required to present new solutions to an exacting market. As technological complexity and specialization intensifies, firms increasingly need to integrate and co-ordinate knowledge by means of project groups, diversified organizations, inter-organizational partnerships, and strategic alliances. Innovation processes have progressively become interdisciplinary, collaborative, inter-organizational, and international, and a firm's ability to synthesize knowledge across disciplines, organizations, and geographical locations has a major influence on its viability and success. This book demonstrates how knowledge integration is crucial in facilitating innovation within modern firms. This book provides original, detailed empirical studies of prerequisites, mechanisms, and outcomes of knowledge integration processes on several organizational levels, from key individuals, projects, and internal organizations, to collaboration between firms. It stresses the need to understand knowledge integration as a multi-level phenomenon, which requires a broad repertoire of organizational and technical means. It further clarifies the need for strong internal capabilities for exploiting external knowledge, reveals how costs of knowledge integration affect outcomes and strategic decisions, and discusses the managerial implications of fostering knowledge integration, providing practical guidance and support for managers of knowledge integration in high technology enterprises.

**Economic Dynamism in the Asia-Pacific** Grahame Thompson 2005-10-18 This broad-ranging student textbook examines the rise of the Asia-Pacific as an important economic region. It looks at the sources of that rise, its future development and the possible consequences for the global economy. The analysis is divided into three sections considering:

\* how far the Asia-Pacific has developed as a regional system, looking at the patterns of integration of the principal economies \* the relationship between the key individual economies of Japan, Korea, China and the United States \* how the rise of the Asia-Pacific economy has affected the international economic system. In so doing it provides much-needed insights not only into the growth of this powerful economic region, but also the international context of Asia-Pacific development.
