**A Tale of Two Vampires** Katie Macalister 2012-09-04 Time isn't always on a vampire's side.... Iolanthe Tennyson has had a very bad year—due in part to the very bad men in her life. So she's accepted her cousin's invitation to spend the summer in Austria to indulge her photography hobby. Rumors of a haunted forest there draw Iolanthe into the dark woods—and into the eighteenth century.... Nikola Czerny is a cursed man, forced by his half brothers to live forever as a Dark One. But his miserable existence takes an intriguing turn when a strange, babbling woman is thrown in his path. Iolanthe claims to know Nikola's daughter—three hundred years in the future. She also knows what fate—in the form of his murderous half brothers—has in store for him. If only she knew the consequences of changing the past to save one good, impossibly sexy vampire...

**The Diagnosis and Correction of Vocal Faults** James C. McKinney 2005-02-28 Popular for more than two decades among college voice teachers and their students, this outstanding, authoritative vocal pedagogy text is an invaluable manual. It thoroughly examines the vocal problems prospective voice teachers will encounter daily in the teaching studio and choral rehearsal. The author's approach is a unique one, based in large part on diagnostic procedures similar to those used by doctors. As each vocal fault is presented, its identifying characteristics or symptoms are stated, its possible causes are discussed, and corrective procedures are suggested. An especially valuable feature is the book's accompanying audio files (available here for download) that contains 14 male and female voice samples of the various vocal faults discussed in the text, enabling students to better identify basic characteristic sounds associated with each fault. Current and prospective choir directors and voice teachers who need help in improving the vocal sounds of choir members or students will find this practical guide-book to be an ever-present help in time of trouble.

**Dear Life, You Suck** Scott Blagden 2013-03-26 "The shrinkadinks think I have a screw loose. Ain't playing with a full deck. Whacked-out wiring. Missing marbles." Irreverent, foulmouthed seventeen-year-old Cricket is the oldest ward in a Catholic boys' home in Maine—and his life sucks. With prospects for the future that range from professional fighter to professional drug dealer, he seems doomed to a life of "criminal rapsCALLINITY." In fact, things look so bleak that Cricket can't help but wonder if his best option is one final cliff dive into the great unknown. But then Wynona Bidaban steps into his world, and Cricket slowly realizes that maybe, just maybe, life doesn't totally suck.

**Upon the Gardens of Epicurus** William Temple 2004 Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. It was he who introduced the idea of the charm of irregularity, and who gave it the allegedly Chinese name sharawadgi. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years.

**The Healthy Kitchen** Andrew Weil 2011-02-22 Two of America's most popular authorities on healthy eating and cooking join forces in this delectable, inspiring and easy-to-use cookbook. With 135 fabulous recipes and invaluable information on what constitutes genuinely healthy eating today, this revolutionary book will change the way you cook for yourself and your family forever.

**Profiting with Iron Condor Options** Michael Benklifa 2011-01-19 In a straightforward approach, Hanania Benklifa provides readers the practical knowledge needed to trade options conservatively in Profiting with Iron Condor Options: Strategies from the Frontline for Trading in Up or Down Markets. The objectives are simple: make 2%-4% a month staying in the market as little as possible. Market experts use option condors to consistently earn monthly returns while trading conservatively and staying in the market as little as possible. Benklifa—who manages \$10+ million in condor trades each month—shows you exactly how to run these trades and earn these returns, delivering all the details you need to master every nuance of this remarkable strategy. Benklifa shares option condors examples using market realities, not oversimplified abstractions. You'll learn how to handle real-life market dynamics that can dramatically impact results, including rising and falling volatility, changing bid-ask spreads, and distorted call parity. You'll learn how to profit in the sideways markets where condor options are most widely used—and also in extreme-trending markets that offer their own surprising opportunities. Traders who focus on a specific type of trade have a history of outperforming stock pickers and directional investors. This book will give you that deep and usable level of knowledge about one of today's most well-proven strategies: option condors.

**Caffeinated PDX** Will Hutchens 2014-02 In Portland, Oregon, coffee is more than just a beverage, it is an essential part of the city's character. Under oft-gray skies, independent roasters and cafes flourish, providing a wide array of styles and tastes for discerning Portlanders to choose from. The celebrated Portland coffee culture attracts visitors from around the world, who come to explore the diverse options and find inspiration for bringing great coffee to their own cities. In Caffeinated PDX: How Portland became the Best Coffee City in America, author Will Hutchens tells the stories of the people and companies that pushed Portland to the forefront of the specialty coffee scene. He travels around the city, talking to a wide variety of coffee professionals and capturing their passion for roasting, selling, and brewing some of the finest coffees in the world. He attends cuppings, goes to barista school, and volunteers at barista competitions to better understand what's so special about specialty coffee. Using Portland as the model, Hutchens also explains the phenomenon known as third-wave coffee, a worldwide movement to improve coffee quality from origin to cup. Full of anecdotes and insights into the minds of Portland's coffee leaders, as well as some lesser-known personalities, Caffeinated PDX is an enjoyable read for people who love coffee, for people who love Portland, or for anyone who appreciates a good story."

**Through My Eyes** Ellie O'Malley 2017-04-11 Ellie grew up on a dirt farm in Ontario with only brothers, no sisters. She had five children by the time she was twenty one and a drunken husband who she ran away from. She took her children west as far as the road would go, and went from waiting tables, to slinging drinks, then on to nursing. Eventually driving trucks for better money. Her children now numbered seven. Men were her down fall, most of them wanted her children more than her. With trucking she was in a mans' world in a time when it was not acceptable, but with perseverance and just plain bull headedness she made her mark. Finding the pit falls and how she came over them, and still kept her seven children together under one roof on her own.

**How the Body Shapes the Mind** Shaun Gallagher 2006-10-12 How the Body Shapes the Mind is an interdisciplinary work that addresses philosophical questions by appealing to evidence found in experimental psychology, neuroscience, studies of pathologies, and developmental psychology. There is a growing consensus across these disciplines that the contribution of embodiment to cognition is inescapable. Because this insight has been developed across a variety of disciplines, however, there is still a need to develop a common vocabulary that is capable of integrating discussions of brain mechanisms in neuroscience, behavioural expressions in psychology, design concerns in artificial intelligence and robotics, and debates about embodied experience in the phenomenology and philosophy of mind. Shaun Gallagher's book aims to contribute to the formulation of that common vocabulary and to develop a conceptual framework that will avoid both the overly reductionistic approaches that explain everything in terms of bottom-up neuronal mechanisms, and inflationistic approaches that explain everything in terms of Cartesian, top-down cognitive states. Gallagher pursues two basic sets of questions. The first set consists of questions about the phenomenal aspects of the structure of experience, and specifically the relatively regular and constant features that we find in the content of our experience. If throughout conscious experience there is a constant reference to one's own body, even if this is a recessive or marginal awareness, then that reference constitutes a structural feature of the phenomenal field of consciousness, part of a framework that is likely to determine or influence all other aspects of experience. The second set of questions concerns aspects of the structure of experience that are more hidden, those that may be more difficult to get at because they happen before we know it. They do not normally enter into the content of experience in an explicit way, and are often inaccessible to reflective consciousness. To what extent, and in what ways, are consciousness and cognitive processes, which include experiences related to perception, memory, imagination, belief, judgement, and so forth, shaped or structured by the fact that they are embodied in this way?

**The Origin Of Wealth** Eric Beinhocker 2018-12-06 Economics is changing radically. This paradigm shift, the biggest in the field for over a century, will have profound implications for business, government and society for decades to come. In this groundbreaking book, economic thinker and writer Eric Beinhocker surveys the cutting-edge ideas of the leading economists, physicists, biologists and cognitive scientists who are fundamentally reshaping economics, and brings their work alive for a broad audience. These researchers argue that the economy is a 'complex adaptive system', more akin to the brain, the internet or an ecosystem than to the static picture of economic systems portrayed by traditional theory. They claim it is the evolutionary process of differentiation, selection and amplification, acting on designs for technologies, social institutions and businesses that drives growth in the economy over time. If Adam Smith provided the inspiration for economics in the twentieth century, it is Charles Darwin who is providing it in the twenty-first. If we can understand how evolution creates wealth, then we can better answer the question 'How can we create more wealth for the benefit of individuals, businesses and society?' Beinhocker shows how 'Complexity Economics' turns conventional wisdom on its head in areas such as business strategy, the design of organisations, the workings of stock markets and public policy. As sweeping in scope as its title, *The Origin of Wealth* is a landmark book that shatters orthodox economic theory, and will rewire our thinking about how we came to be here - and where we are going.

**Securing Outer Space** Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected – but not challenged – the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to 'bring back space' into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.

**Things To Do Before Seeing A Psychiatrist** Ben Mark 2021-01-24 Your anxiety over this first appointment may be causing you to assume the worst or think treatment will be tougher than it actually is.1 For instance, you may be thinking you have too many problems to tackle. However, the reality is that your therapist will likely focus on just one or two issues to begin with and move on from there. Being prepared for your first appointment can help you manage your anxiety and nervousness. Prepare for the First Appointment It's important to take some time to sit down a day or two before your appointment. Use this time to reflect on your thoughts. Make a list of everything you are feeling and any questions you have for your doctor or healthcare professional. You will also want to write down any details about triggers, as well as how your life is affected by each item. This is really helpful for your doctor. For example, your list may include: - I have to walk to the other end of Wal-Mart when babies are crying because I can't take the noise. - I don't always believe people are who they say they are. - I can get very angry, to the point of rage. (If there are patterns to things that trigger your anger, include them.) Several friends are angry at me because I have become inappropriately angry. - I feel very lonely and have an extreme need for support. As a result, I spend a lot of time crying. - I can only get a few hours of sleep a night, or I am sleeping 18 hours a day. Whatever your sleep habits are right now, include this information in your list. - Sometimes my thoughts race and I can't seem to focus. If you're feeling paranoid, you need to list not just the feeling, but what you feel paranoid about and how it affects your life. List exactly what you are feeling and experiencing and how your life is affected. Watch the Labels Do not put labels on your feelings or triggers. Let the doctor do that. Therapists could inadvertently be influenced by your labels, which could affect your diagnosis. Taking this approach not only lessens the chance that your assessment of your feelings will misguide the therapist, but can make the whole process much easier for you as well. Once you start writing down or thinking about these exact feelings and experiences you have had, you'll likely find that this is much simpler and easier than trying to give them names and label them yourself. If you find yourself feeling anxious while making your list, take a break. Make sure you are simply writing down your feelings and not trying to find explanations, patterns, or a diagnosis. Why a List Is Helpful for the First Appointment When you break down your feelings and how they are affecting your daily life, you paint a very clear picture for the doctor. It's very difficult to do that on the spot in a short visit when your brain is spinning and you aren't prepared, so make the list ahead of time. At the same time, don't worry too much if you haven't listed absolutely everything you are feeling or experiencing. Therapy usually takes place over many visits, and this first visit is laying a foundation that can be filled in later on. You may even wish to rank some of your feelings or add notes so that you can share your feelings that are m
