Jump at Home Grade 5 John Mighton 2010-06-01 John Mighton's JUMP program is changing the way math is taught, and his powerful math workbooks give children the tools they need to master this crucial subject. The key is a step-by-step teaching method that isolates and describes concepts so clearly that anyone can understand them: students build on their successes, becoming proficient at solving problems with confidence and enthusiasm. Now, parents and caregivers can bring the JUMP program home. These workbooks follow the current student worksheets used by JUMP tutors and classroom teachers, including: an introduction for parents and caregivers that clearly explains the thinking behind the program and provides hours of activities, worksheets carefully designed to enable children to move from one success to the next, a glossary of math terms, and a selected answer key.

Curriculum Overload A Way Forward OECD 2020-11-25 Schools are constantly under pressure to keep up with the pace of changes in society. In parallel, societal demands for what schools should teach are also constantly changing; often driven by political agendas, ideologies, or parental pressures, to add global competency, digital literacy, data literacy, environmental literacy, media literacy, social-emotional skills, etc. This "curriculum expansion" puts pressure on policy makers and schools to add new contents to already crowded curriculum.

Leaps and Bounds Toward Math Understanding Marian Small 2012

It's Alive! Asa Kleiman 2021-09-03 The authors, junior high students and best friends David and Asa, along with best-selling author Marya Washington Tyler, took the kind of gooey, slimy, disgusting science facts that students love and turned them into hilarious math problems. Problems in It's Alive! include: When's the last time you had your students calculate their chances of being eaten by a crocodile? The percent of seats at Yankee Stadium that do not have gum stuck to them? The number of skin scales they lost in the last 20 minutes? The number of flushes it would take to overflow their city's wastewater treatment tank? Or how many gigabytes their brain can hold? These and other intriguing problems await your students in this book designed to teach children to translate statements and questions into mathematical equations. All the problems are based on known scientific facts. This is math. This is real. This is alive! Included is a comprehensive answer key, reproducible blackline masters, and hilarious illustrations. This is math the way it ought to be—tough, fun, and...a little weird. For even more exciting and strange

math problems, see the follow-up *It's Alive! And Kicking!* Grades 4-8

My Math Path Nelson Education Limited 2021-09

Nelson Mathematics 8 Small, Marian 2005 Nelson Mathematics 8 is designed to support success and growth for all. Research-based and classroom-tested, Nelson Mathematics 8 is the practical solution to save planning and preparation time. Key Features: 100% Curriculum Match • Nelson Mathematics 8 provides a 100% match to the new Ontario curriculum, ensuring all students are fully prepared for high school math• Assessment tools reflect newly revised achievement chart categories for easy reporting More homework support than any other resource! • More questions and worked examples than any other resource• Worked examples modelling key concepts help students homework independently• Clear language and visuals make concepts easier to understand Developed to support and implement TIPS (Targeted Implementation and Planning Support) • Helps students make connections between mathematical concepts• Encourages a variety of solutions that incorporate different representations, models, and tools• Incorporates a variety of teaching strategies that allow students to explore and communicate mathematically with ample opportunities to practise skills

Connecting Math Concepts Level A, Workbook 2 McGraw-Hill 2011-09-01 SRA Connecting Maths Concepts Comprehensive Edition has been revised for Levels A-F and students in Grades K-5. This program gives students who are at-risk of falling behind or who have already significantly fallen behind the chance to catch up and learn significant mathematics. New digital resources accompany the program including Practice Software, Board Displays and eBook Teacher Guides and Presentation Books.
