Event Data Recorder (EDR) Interpretation Christopher Armstrong 2018-11-02 The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

In the Cold of the Malecon and Other Stories Antonio José Ponte 2000-10 Departing from both the utopian-political and the romantic-baroque styles of past Cuban literature, Ponte deftly sketches a picture of a contemporary Cuba that is very different from the stereotype of Caribbean life, full of music and dance and colorful celebration. An old man and a six-year-old prodigy have a rendezvous to play chess at a forlorn railroad station. Randomly riding trains, a woman keeps company with a strange assembly of men. An unemployed historian falls in love with an enigmatic astrologer, and the two live out their tragedy in the streets of Havana as homeless vagrants. A father and son take an aimless stroll after lunch to see the whores along the Malecon, Havana's seaside promenade. A young man, one of the last Cuban students to go to the Soviet Union on a foreign-study program, returns to Havana, where he explores his identity-looking at childhood photos with his grandfather, spending time with old friends, and obsessively seeking news of a woman he had known and loved in Russia. In a style both lucid and translucent, Ponte shapes intricate stories of self-discovery and metaphysical revelation in spare and allusive prose. About the Authors Antonio Jose Ponte was born in 1964 in Matanzas, Cuba, and studied at the University of Havana. He worked for some years as an engineer, and then as a screenwriter. In addition to writing short stories and fiction, Ponte has published prize-winning collections of poetry and essays. His work has been published in France, Germany, and Spain. This is his first book to be published in the United States. Cola Franzen is the translator of over twenty books, including Poems of Arab Andalusia, Dreams of the Abandoned Seducer by Alicia Borinsky, and Horses in the Air by Jorge Guillen (recipient of the Academy of American Poets Harold Morton Landon Translation Award 2000). Review "In his first book to be published in the U.S., Ponte gives readers a short collection of six elliptical stories from inside the Cuban revolutionary experience, closer in spirit to the fiction of Eastern European dissidents than to that of Caribbean fabulists, unlike exiled writers who see the island as either a mythical homeland or a political cause.

The experiences and desires of the various personalities are revealed, slowly exposing the core of Nadine's deep uncertainty and self-doubt.
