The Jungian Tarot Deck Robert Wang 2017-06-06 Dr. Robert Wang developed The Jungian Tarot as a "visual gateway into the complexities of Jungian psychology" to aid in the process of active imagination proposed by Carl Jung. The 22 Major Arcana represent Jungian archetypes of the collective unconscious. The figures are visually presented with archways and circular mandalas, which aid in meditation. The court cards depict family roles: father, mother, daughter and son. The deck is a companion to the Jungian Tarot Trilogy by Robert Wang.

The Rise of Global Health Joshua K. Leon 2015-02-10 Chronicles the expanding global effort to confront public health challenges. Since the year 2000, unprecedented resources have been committed to the complex challenge of developing global public health solutions by national governments, multilateral organizations, and civil society groups. This vast global movement is one of the most remarkable political phenomena of twenty-first-century international relations—but is it working? In *The Rise of Global Health*, Joshua K. Leon argues against the conventional wisdom, which argues that collective action on development issues—including controversial increases in foreign aid—is too inherently inefficient to succeed. Leon shows that public action on a global level can successfully pursue health equality. Often at the behest of grassroots activists, these disparate groups of actors are cooperating more than ever with the aim of improving our human potential through better health. Though operating at cross purposes with unequal trade agreements and other factors within the global economy harming

the Global South, we learn something surprising about global health governance—it is evolving in ways more efficient than we think. Joshua K. Leon is Assistant Professor of Political Science and International Studies at Iona College.

Silence within and beyond Pedagogical Settings Eva Alerby 2020-09-15 This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

Finally, Aufderheide and Jaszi summarize their work with artists and professional groups to develop best practice documents for fair use and discuss fair use in an international context. Appendixes address common myths about fair use and provide a template for creating the reader's own best practices. --From publisher description.

For more than thirty years, the Dalai Lama has been in dialogue with thinkers from a range of disciplines, helping to support pathways for knowledge to increase human wellbeing and compassion. These conversations, which began as private meetings, are now part of the Mind & Life Institute and Mind & Life Europe. This book documents a recent Mind & Life Institute dialogue with the Dalai Lama and others on two fundamental forces: power and care—power over and care for others in human societies. The notion of power is essentially neutral; power can be used to benefit others or to harm them, to build or to destroy. Care, on the other hand, is not a neutral force; it aims at increasing the wellbeing of others. Power and care are not incompatible: power, imbued with care, can achieve more than a powerless motivation to care; power, without the intention to benefit others, can be ruthless. The contributors—who include such celebrated figures as Frans B. M. de Waal, Olafur Eliasson, Sarah Blaffer Hrdy, and Jody Williams—discuss topics including the interaction of power and care among our closest relatives, the chimpanzees; the effect of meditation and mental training practices on the brain; the role of religion in promoting peace and compassion; and the new field of Caring Economics. Contributors Paul Collier, Brother Thierry-Marie Courau, Frans B. M. de Waal, Olafur Eliasson, Scilla Elworthy, Alexandra M. Freund, Tenzin Gyatso (His Holiness the Dalai Lama), Markus Heinrichs, Sarah Blaffer Hrdy, Frédéric Laloux, Alaa Murabit, Matthieu Ricard, Johan Rockström, Richard Schwartz, Tania Singer, Dennis J. Memory Drawing Darren R. Rousar 2013-03 From the Introduction: If you think about it, all life drawing and painting is at some point being done from the artist's memory, even if that memory is only a few seconds old. Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas, their visual memory is involved. What if that artist's visual memory was highly trained? That artist might need the model for a shorter period of time, or she might have a more productive time when the model is in pose. He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air. Although I encourage you to consistently engage in memory-drawing practice, it should not supplant your regular art exercises. Memory-drawing ought to be done in addition to your regular art training, not instead of it. In a perfect world it would be integrated into traditional arts instruction, but the reality is that you will most likely be training your visual memory on your own. *Memory Drawing: Perceptual Training and Recall* exists to guide you in doing just that. It will also help you improve your abilities to remember fleeting effects, seize essentials, and even enhance your imagination.

The Essential Jesus John Dominic Crossan 2008-03-01 After his definitive *The Historical Jesus*, John Dominic Crossan delivered *Jesus: A Revolutionary Biography*--a popularized, bestselling account of what we can know about the life of Jesus. Here he offers the core of his life's work--a concise and astonishing presentation of the authentic teachings and earliest images of the revolutionary Galilean sage. Crossan's fresh translations of Jesus' sayings show Jesus to be a teacher whose radical message that all are equal before God is as timely today as it was two thousand years ago. This picture is dramatically confirmed by the preConstantinian, Christian renderings of Jesus, which show that he was remembered by the first Christians not as God but as a revolutionary healer and

leader.

The Real Toy Story Eric Clark 2011-08-31 Toys - from teddy bears to Barbie dolls to train sets - define our image of childhood innocence. But the truth is that toys represent a \$21 billion a year industry, and with so much money at stake, the toy business is anything but child's play. In *The Real Toy Story*, investigative journalist Eric Clark exposes the startling truths behind Britain's favourite toys. Drawing on interviews with over 200 industry insiders, Clark names and shames the corporations spending millions on research into the best way to manipulate their target audience while manufacturing products in China under virtual slave labour conditions. In a world of cut-throat competition and cold-blooded marketing, toy companies are increasingly willing to sacrifice our children in the rush for profits. And as more children forsake cuddly play things for Ipods and cell phones, companies are using even more extreme tactics- unashamedly using sex and violence to sell dolls and action men to children as young as three - to make sure that their toy is the one that children want to have. *The Real Toy Story* is essential reading for the millions of adults who care about the toys they choose for the children in their lives.

Facial-Oral Tract Therapy (F.O.T.T.) Ricki Nusser-Müller-Busch 2020-11-07 The book offers a comprehensive approach to the assessment and treatment of disturbances in facial expression, oral movement, swallowing, breathing, voice and speech production caused by developmental and acquired neurological conditions. The principles outlined are used in patients with different etiologies (e.g. stroke, tumors, traumas). F.O.T. T., developed by Kay Coombes, is a hands-on approach based on an understanding of neurological functions and the way we learn from experience. The approach aims to give the patient experience of physiological posture and movement using facial-oral functions in normal activities of daily living (ADL). Rather than mere "exercises", F.O.T.T involves meaningful activities aiming to promote participation, according to ICF criteria. Four main areas are covered: nutrition, oral hygiene, nonverbal communication and speech. Each chapter summarises the problems of severely ill patients and shows the clinical reasoning behind the solutions offered. Separate chapters discuss tracheostomy management and the training of the carers involved, including relatives. The chapter authors are experienced specialists (physio-, occupational- and speech-language therapists and physicians), whose contributions aim to provide interdisciplinary perspectives and translate latest research into clinical practice.
