How to Read a Nautical Chart Nigel Calder 2002-08-05 The best handbook on chart usage, from one of the most trusted names in boating In 2000, the U.S. government ceased publication of Chart No. 1, the invaluable little book that generations of mariners have consulted to make sense of the complex system of signs, symbols, and graphic elements used in nautical charts. Now Chart No. 1 is not just reborn but expanded and improved in How to Read a Nautical Chart. The demand for a book like this has never been greater. Arranged and edited by Nigel Calder, one of today's most respected boating authors, --and containing four-color illustrations throughout-- How to Read a Nautical Chart presents a number of original features that help readers make optimum use of the data found in Chart No. 1, including a more intuitive format, crucial background information, international chart symbol equivalents, electronic chart symbology, and thorough explanations of the practical aspects of nautical chart reading.

Securing Outer Space Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected - but not challenged - the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to 'bring back space' into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.

Celestial Navigation for Yachtsmen Mary Blewitt 2013-09-21 The 12th edition of this bestselling textbook is proof of the success of Mary Blewitt's concise and clear style in explaining a particularly difficult skill, and it has been the bible for many generations of ocean navigators. Since this book was first published, the huge advances in electronic navigation has transported most offshore navigators to a world of press-button convenience. However, there is still a vital need for traditional skills when things go wrong: batteries can fail, aerials go overboard, and electronics have been known to get wet. A bestseller for over 50 years, Celestial Navigation for Yachtsmen is a model of simplicity and clarity. The worked examples require only straightforward addition and subtraction, which explains why this book has truly earned its reputation for admirable conciseness and making a tricky subject easy to understand. 'The "bible" of navigation for generations of yachtsmen... worth its weight in gold' Sailing

Guillaume Faye and the Battle of Europe Michael O'Meara 2013-01 Europe is at war and does not know it. She is overrun by invaders from the Global South, who seek to replace those who have inhabited her lands for at least the last 30,000 years. She is subject to an American overlord, whose world system dictates her de-Europeanization and globalization. She is mismanaged and betrayed by EU technocrats, corrupt politicians, and plutocratic elites. Without a revolutionary mobilization in her defense, the thousand-year-old civilization that grew out of the medieval Republica Christiana and that we today associate with 'Europe' - along with the unique genetic heritage of her peoples - will forever cease to exist. Guillaume Faye - doctorate from one of France's most prestigious Ecoles, social philosopher, author of numerous books and articles - is the Cassandra warning Europeans of their approaching extinction, and the need to prepare for the impending Battle of Europe. Michael O'Meara, Ph.D., studied social theory at the Ecoles des Hautes Etudes en Sciences Sociales, and modern European history at the University of California. He is the author of New Culture, New Right: Anti-Liberalism in Postmodern Europe (2004)."

The Capable Cruiser Lin and Larry Pardey 2010-06-08 Lin and Larry Pardey have now been cruising on board their own boats, racing, delivering, and repairing other people's boats for more than 44 years. After west-to-east and east-to-west circumnavigations, and voyages to more than 75 countries, they have a breadth of knowledge that few other boating authors possess. Most of the voyaging has been done on an earn-as-you-go budget that could be well within the reach of the majority of those whose dream is to set sail. Their motto? "Go small, go simple, but go now!" The Pardeys' strengths are neatly symbolized by the boats they have built. Each one is romantically traditional, with swooping sheerlines, and is completely dependent on the wind. And yet each boat carries the best, strongest, and most seamanlike gear. Like their vessels, the Pardeys' writings are founded on a marriage of the spirit of romantic adventure and the practical, up-to-date seamanship that keeps them and their boats safe. This revised and expanded third edition of a cruising classic includes 10 completely new chapters with such advice as: sixteen ways to encourage your lover (partner) to share your dream; strategies for turning sudden engine failure into a minor incident; choosing safety equipment; repairing rigging at sea. All of the original chapters have been updated to ensure that the information will be helpful for everyone who dreams of cruising--whether now or soon. The Capable Cruiser is a logical extension of the Pardeys' The Self-Sufficient Sailor, with more emphasis on seamanship underway, including careful analysis of extreme anchoring situations and solutions for mitigating them. Underlying each and every chapter is the warmth and encouragement that spurred Herb McCormick, former editor of Cruising World magazine, to label Lin and Larry Pardey "the enablers."

Storm Tactics Handbook Lin Pardey 2002-11-01 This guide stresses the importance of survival techniques at sea and is written by experienced round-the-world sailors. They recommend the traditional skill of heaving to, but in addition, employing a drogue, so rigged that it keeps the bow at a quartering angle to the approaching seas.

The numbers of worked examples have been reduced, due to the publication of John's Work Out: Engineering Materials which is recommended to be used alongside the main text and is comprised mainly of worked examples and problems.

Jung and the Postmodern Christopher Hauke 2013-10-23 What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung' s thought as a reponse to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.
