This series of essays and articles on the music of the Venda people of the northern Transvaal in South Africa constitutes his major scholarly legacy. *Venda Children's Songs* presents a detailed analysis of both the music and the cultural significance of children's songs among the Venda. Among its many original contributions is the identifying of the role of melody in generating

rhythm, something that distinguishes this form of music from that of Venda adults as well as from other genres of African music in general.

Designing With Creo Parametric 2.0 Michael Rider 2013 Designing with Creo Parametric 2.0 provides the high school student, college student, or practicing engineer with a basic introduction to engineering design while learning the 3D modeling Computer-Aided Design software called Creo Parametric from PTC. The topics are presented in tutorial format with exercises at the end of each chapter to reinforce the concepts covered. It is richly illustrated with computer screen shots throughout. Above all, this text is designed to help the reader expand their creative talents and communicate their ideas through the graphics language. Because it is easier to learn new information if you have a reason for learning it, this textbook discusses design intent while you are

learning Creo Parametric. At the same time, it shows how knowledge covered in basic engineering courses such as statics, dynamics, strength of materials, and design of mechanical components can be applied to design. You do not need an engineering degree nor be working toward a degree in engineering to use this textbook. Although FEA (Finite Element Analysis) is used in this textbook, its theory is not covered. The first two chapters of this book describe the design process. The meat of this text, learning the basic Creo Parametric software, is found in Chapters 3 through 6. Chapters 7, 8, and 12 deal with dimensioning and tolerancing an engineering part. Chapters 9 and 10 deal with assemblies and assembly drawings. Chapter 11 deals with family tables used when similar parts are to be designed or used. Chapter 13 is an introduction to Creo Simulate and FEA.

Extreme Economies Richard Davies 2019-09-05

Winner of the Enlightened Economist Prize 2019

Winner of Debut Writer of the Year at the Edward Stanford Travel Writing Awards 2020

Longlisted for the Financial Times & McKinsey Business Book of the Year Award 2019 'Extreme Economies is a revelation - and a must-read.' Andy Haldane, Chief Economist at the Bank of England

To understand how humans react and adapt to economic change we need to study people who live

in harsh environments. From death-row prisoners trading in institutions where money is banned to flourishing entrepreneurs in the world's largest refugee camp, from the unrealised potential of cities like Kinshasa to the hyper-modern economy of Estonia, every life in this book has been hit by a seismic shock, violently broken or changed in some way. In his quest for a purer view of how economies succeed and fail, Richard Davies takes the reader off the beaten path to places where part of the economy has been repressed, removed, destroyed or turbocharged. He tells the personal stories of humans living in these extreme situations, and of the financial infrastructure they create. Far from the familiar stock reports, housing crises, or banking scandals of the financial pages, *Extreme Economies* reveals the importance of human and social capital, and in so doing tells small stories that shed light on today's biggest economic questions. [A Pure Solar World](#) Paul Youngquist 2016-10-25

Sun Ra said he came from Saturn. Known on earth for his inventive music and extravagant stage shows, he pioneered free-form improvisation in an ensemble setting with the devoted band he called the “Arkestra.” Sun Ra took jazz from the inner city to outer space, infusing traditional swing with far-out harmonies, rhythms, and sounds. Described as the father of Afrofuturism, Sun Ra created “space music” as a means of building a better future for American blacks here on earth. *A Pure Solar World: Sun Ra and the Birth of Afrofuturism* offers a spirited introduction to the life and work of this legendary but underappreciated musician,

composer, and poet. Paul Youngquist explores and assesses Sun Ra's wide-ranging creative output—music, public preaching, graphic design, film and stage performance, and poetry—and connects his diverse undertakings to the culture and politics of his times, including the space race, the rise of technocracy, the civil rights movement, and even space-age bachelor-pad music. By thoroughly examining the astro-black mythology that Sun Ra espoused, Youngquist masterfully demonstrates that he offered both a holistic response to a planet desperately in need of new visions and vibrations and a new kind of political activism that used popular culture to advance social change. In a nation obsessed with space and confused about race, Sun Ra aimed not just at assimilation for the socially disfranchised but even more at a wholesale transformation of American society and a more creative, egalitarian world.
