assigning a programming project, the instructor may use any part of a great variety of books covering many subjects, such as car repair. Instructions for most of the "weekend mechanic" books are close stylistically to expert system rules. Contents Chapter 1 gives an introduction to the subject matter; it briefly presents basic concepts, history, and some perspectives of expert systems. Then it presents the architecture of an expert system and explains the stages of building an expert system. The concept of uncertainty in expert systems and the necessity of dealing with the phenomenon are then presented. The chapter ends with the description of taxonomy of expert systems. Chapter 2 focuses on knowledge representation. Four basic ways to represent knowledge in expert systems are presented: first-order logic, production systems, semantic nets, and frames. Chapter 3 contains material about knowledge acquisition. Among machine learning techniques, a

method of rule learning from examples is explained in detail. Then problems of rule-based verification are discussed. In particular, both consistency and completeness of the rule base are presented.
