En Español! 2004 These consumable workbooks contain readings from ¡En español!, as well as authentic literature from the Spanish-speaking world. The mark-it-up format helps students develop reading skills through a variety of comprehension and critical-thinking strategies. Features include En voces and Literatura adicional selections with a broad range of support for all students before, during, and after they read; Academic and Informational Reading section with strategies that help students approach a variety of real-world resources; and Test Preparation section with reading, revising, editing, and writing tips that prepare students for a variety of assessments.

Milestones C: Student Edition Neil Anderson 2008-03 The Student Edition includes 2 chapters per unit (including literature reading and content reading), embedded assessment, 3 kinds of vocabulary practice, and an "Apply & Extend" section with academic workshops and end-of-unit assessment. Using a unique embedded assessment plan along with a balanced blend of literature and content readings, Milestones ensures that students are mastering skills and standards before being introduced to new skills and standards. This consistent, research-based approach will lead your students to success on state exams as well as to the language acquisition and content knowledge crucial for academic success.

Do I Really Have to Teach Reading? Cris Tovani 2004 "Do I really have to teach reading?" This is the question many teachers of adolescents are asking, wondering how they can possibly add a new element to an already overloaded curriculum. And most are finding that the answer is "yes." If they want their students to learn complex new concepts in different disciplines, they often have to help their students become better readers. Building on the experiences gained in her own language arts classroom as well as those of colleagues in different disciplines, Cris Tovani, author of *I Read It, but I Don't Get It*, takes on the challenge of helping students apply reading comprehension strategies in any subject. In *Do I Really Have to Teach Reading?*, Cris shows how teachers can expand on their content expertise to provide instruction students need to understand specific technical and narrative texts. The book includes: examples of how teachers can model their reading process for students; ideas for supplementing and enhancing the use of required textbooks; detailed descriptions of specific strategies taught in context; stories from different high school classrooms to show how reading instruction varies according to content; samples of student work, including both struggling readers and college-bound seniors; a variety of "comprehension constructors": guides designed to help students recognize and capture their thinking in writing while reading; guidance on assessing students; tips for balancing content and reading instruction. Cris's humor, honesty, and willingness to share her own struggles as a teacher make this a unique take on content reading instruction that will be valuable to reading teachers as well as content specialists.
