Milestones C. Student Edition Neil Anderson 2008-03 The Student Edition includes 2 chapters per unit (including literature reading and content reading), embedded assessment, 3 kinds of vocabulary practice, and an "Apply & Extend" section with academic workshops and end-of-unit assessment. Using a unique embedded assessment plan along with a balanced blend of literature and content readings, Milestones ensures that students are mastering skills and standards before being introduced to new skills and standards. This consistent, research-based approach will lead your students to success on state exams as well as to the language acquisition and content knowledge crucial for academic success.

**Do I Really Have to Teach Reading?** Cris Tovani 2004-01-01 Takes on the challenge of helping students apply reading comprehension strategies in any subject. Shows how teachers can expand on their content expertise to provide instruction students need to understand specific technical and narrative texts. The book includes: examples of how teachers can model their reading process for students; ideas for supplementing and enhancing the use of required textbooks; detailed descriptions of specific strategies taught in context; stories from different high school classrooms to show how reading instruction varies according to content; samples of student work, including both struggling readers and college-bound seniors; a variety of 'comprehension constructors': guides designed to help students recognize and capture their thinking in writing while reading; guidance on assessing students; tips for balancing content and reading instruction.

**Building Literacy in Social Studies** Donna Ogle 2007 Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators--and social studies teachers in particular--do to help students develop the knowledge, skills, and motivation to become engaged in civic life? Building Literacy in Social Studies addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies--including teaching models, graphic organizers, and step-by-step instructions--for activities such as \* Building vocabulary, \* Developing textbook literacy skills, \* Interpreting primary and secondary sources, \* Applying critical thinking skills to newspapers and magazines, and \* Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.
