America's Favorite Homes Robert Schweitzer 1990 During the first four decades of the twentieth century, prefabricated and catalogue homes grew in popularity and number. Built and occupied by farmers, merchants, the new armies of factory workers and other lower- and middle-class families, these are the modest homes that today line American streets. Using mail-order house catalogues from the time, Robert Schweitzer and Michael W. R. Davis chart the development of catalogue houses and their variations and include floor plans for many models. Students of architecture, whether amateur of professional, preservationists and academics will find in America's Favorite Homes a handy reference to those homes that soon will be eligible for historic designation.

The Craftsman Richard Sennett 2009-02-05 Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

Bookbinding Douglas Cockerell 2005-07-26 Considered by many bookbinders and librarians to be the clearest and most valuable exposition of hand bookbinding in English, this volume concisely covers virtually every aspect of the craft — from folding and collating pages, trimming and gilding edges, to preparing covers, designing and inlaying on leather, and creating clasps and ties.

Japanese Bookbinding Kojiro Ikegami 1986-06 A third-generation traditional bookbinder gives easy-to-follow instructions for making all the major, historically important styles of Japanese bindings as well as traditional book cases—the custom-made folding boxes that afford handsome protection for Japan's exquisite books. The authoritative text, written by one of Japan's leading professional bookbinders, has been fully adapted for Western readers. Both American and Japanese suppliers of traditional tools and materials are provided and substitutes are recommended for items not readily available. For centuries the West has admired Japanese books, but only now can we make them ourselves and take full advantage of their creative possibilities. Stunning and practical, these bindings are ideal for preserving calligraphy, letters, artwork, and poems, for adding a distinctive touch to limited-edition books, and for use as diaries or gifts.
