The State of Economics, the State of the World Kaushik Basu 2020-01-07 Leading economists address the ongoing challenges to economics in theory and practice in a time of political and economic crises. More than a decade of financial crises, sovereign debt problems, political conflict, and rising xenophobia and protectionism has left the global economy unsettled and the ability of economics as a discipline to account for episodes of volatility uncertain. In this book, leading economists consider the state of their discipline in a world of ongoing economic and political crises. The book begins with three sweeping essays by Nobel laureates Kenneth Arrow (in one of his last published works), Amartya Sen, and Joseph Stiglitz that offer a summary of the theoretical foundations of modern economics—the twin pillars of general equilibrium theory and welfare economics. Contributors then turn to macroeconomic stabilization and growth and, finally, new areas of research that depart from traditional theory, methodology, and concerns: climate change, behavioral economics, and evolutionary game theory. The 2019 Nobel Prize laureates, Abhijit Banerjee, Esther Duflo, and Michael Kremer, contribute a paper on the use of randomized control trials in development economics. Contributors Philippe Aghion, Ingela Alger, Kenneth Arrow, Abhijit Banerjee, Kaushik Basu, Lawrence Blume, Guillermo Calvo, Francesco Caselli, Asli Demirgüç-Kunt, Shantayanan Devarajan, Esther Duflo, Samuel Fankhauser, James Foster, Varun Gauri, Xavier Gine, G ael Giraud, Gita Gopinath, Robert Hockett, Karla Hoff, Ravi Kanbur, Aart Kraay, Michael Kremer, David McKenzie, C elestin Monga, Maurice Obstfeld, Hamid Rashid, Martin Ravallion, Amartya Sen, Luis Serv en, Hyun Song Shin, Nicholas Stern, Joseph Stiglitz, Cass Sunstein, Michael Toman, J orgen Weibull

Trell Dick Lehr 2017-09-12 From the co-author of *Black Mass* comes a gripping YA novel based on the true story of a teenage girl's murder — and a young father's false imprisonment for the crime. On a hot summer night in the late 1980s, in the Boston neighborhood of Roxbury, a fourteen-year-old African-American girl was sitting on a mailbox talking with her friends when she became the innocent victim of gang-related gunfire. Amid public outcry, an immediate manhunt was on to catch the murderer, and a young African-American man was quickly apprehended, charged, and — wrongly — convicted of the crime. Dick Lehr, a former reporter for the Boston Globe's famous Spotlight Team who worked on this story three decades ago, brings the case to light once more with *Trell*, a page-turning novel about the daughter of the imprisoned man, who persuades a reporter and a lawyer to help her prove her father's innocence. What pieces of evidence might have been overlooked? Can they manage to get to the truth before a dangerous character from the neighborhood gets to them?

A Roadmap to Reducing Child Poverty National Academies of Sciences, Engineering, and Medicine 2019-09-16 The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy

adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. *A Roadmap to Reducing Child Poverty* reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

Why Forests? Why Now? Frances Seymour 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. *Why Forests? Why Now?* synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.
