**Concepts of Biology**

Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way

that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key

concepts.

Make predictions about what will happen next, and get into the heads of the characters by explaining what they mean with their dialog. Think about the magic power that changes the peach and imagine how it would affect a person, insect or animal. Write a sentence using alliteration to describe an object or event. Complete a KWL Chart on one of the creatures from the book.

Aligned to your State Standards and written to Bloom's Taxonomy, additional crossword, word search, comprehension quiz and answer key are also included.  
About the Novel: A humorous and entertaining fairy tale about the adventures of a boy named James and his insect friends. An old man gives James green magical crystals that do wonders on a peach as it grows bigger than a house. With his insect friends, James flies from England to New York City with the help of 502 seagulls, and lands on the pinnacle of the Empire State Building. His friend, Old-Green-Grasshopper, becomes part of the New York Symphony Orchestra. Silkworm and Miss Spider set up a factory and make ropes for tightrope walkers. Ladybug gets married to the Head of the Fire Department. Glow-worm becomes the light inside the Statue of Liberty. Centipede is made Vice-President of a high-class firm of boot manufacturers. Earthworm makes commercials for a face

cream company.
