Chicago Hustle Odie Hawkins 2016-04-05 There was no sharper con man on the streets of Chicago than Elijah Brookes. Women were his preferred prey—but no mark and no bankroll was safe when Elijah was on the prowl. Cool, beautiful Toni warned him, “Elijah, brothers be playin’ games so hard sometimes they don’t know when to stop. You know what I’m sayin’?” Elijah Brookes had to learn the ultimate lesson the hard way. So many games to be played, so little time.

Digital Media, Youth, and Credibility Matthew S. Eastin 2008 The difficulties in determining the quality of information on the Internet—in particular, the implications of wide access and questionable credibility for youth and learning. Today we have access to an almost inconceivably vast amount of information, from sources that are increasingly portable, accessible, and interactive. The Internet and the explosion of digital media content have made more information available from more sources to more people than at any other time in human history. This brings an infinite number of opportunities for learning, social connection, and entertainment. But at the same time, the origin of information, its quality, and its veracity are often difficult to assess. This volume addresses the issue of credibility—the objective and subjective components that make information believable—in the contemporary media environment. The contributors look particularly at youth audiences and experiences, considering the implications of wide access and the questionable credibility of information for youth and learning. They discuss such topics as the credibility of health information online, how to teach credibility assessment, and public policy solutions. Much research has been done on credibility and new media, but little of it focuses on users younger than college students. Digital Media, Youth, and Credibility fills this gap in the literature. Contributors Matthew S. Eastin, Gunther Eysenbach, Brian Hilligoss, Frances Jacobson Harris, R. David Lankes, Soo Young Rieh, S. Shyam Sundar, Fred W. Weingarten

20,000 Miles South Helen Schreider 2017-07-31 Helen and Frank Schreider were true adventurers. Their dream was to drive the length of the Americas, from the town of Circle, Alaska (just outside the Arctic Circle), to the world’s southernmost town, Ushuaia, in Tierra del Fuego. Dinah, their German shepherd, went with them. They are the first people in history to have made this trip. They came back with a whale of a story. The seagoing and mountain-climbing abilities of their amphibious jeep, La Tortuga, were put to a rugged test during the eighteen thrill-packed months the Schreiders were under way. They didn’t just drive from Circle to Ushuaia—much of the way there are no roads. Many of the rivers that slice through the jungle are unbridged; the jungle itself often rears up in an impenetrable wall, and the natives just shake their heads and say, “Turn back.” Undaunted, the Schreiders hacked their way with machetes through the steaming jungles of southern Mexico, were forced to put out through the monstrous surf into the far from pacific Pacific, island-hopped across the reef-ribbed Caribbean, rode out a hurricane at sea, and crawled to almost sixteen thousand feet in the Peruvian Andes. They are the first to have reached South America in a wheeled vehicle under its own power. La Tortuga served them well and came away with her share of honors: she’s the first “ship” ever to have been weighed in on dry land for passage through the Panama Canal and to have driven up to the port captain’s door to pick up her pilot. **20,000 MILES SOUTH** is a book filled with the happy glow of discovery, the ease, charm, and determination of its young authors, and the fascinations and romance of faraway places.

Mechatronic Futures Peter Hehenberger 2016-06-10 Offering a comprehensive overview of the challenges, risks and options facing the future of mechatronics, this book provides insights into how these issues are currently assessed and managed. Building on the previously published book ‘Mechatronics in Action’, it identifies and discusses the key issues likely to impact on future mechatronic systems. It supports mechatronics practitioners in identifying key areas in design, modeling and technology and places these in the wider context of concepts such as cyber-physical systems and the Internet of Things. For educators it considers the potential effects of developments in these areas on mechatronic course design, and ways of integrating these. Written by experts in the field, it explores topics including systems integration, design, modeling, privacy, ethics and future application domains. Highlighting novel innovation directions, it is intended for academics, engineers and students working in the field of mechatronics, particularly those developing new concepts, methods and ideas.

Hell Before Breakfast Robert H. Patton 2014-04-29 The first “war correspondent,” William H. Russell of The Times of London, described himself and his profession as “the miserable parent of a luckless tribe.” Others saw it differently: the war correspondent became the stuff of dreams and an urgent romantic calling. . . . Now, Robert H. Patton, acclaimed historian, author of The Pattons (“Exceptional”—The Washington Post; “Truly remarkable”—John S. Eisenhower) and Patriot Pirates (“Soul-stirring—as good as reading a Patrick O’Brian novel, except that every word is true”—Michael Korda), rediscovers and celebrates, in Hell Before Breakfast, America’s first war correspondents, forgotten today but legends in their time. Here are the men who, between 1850 and 1914, and particularly during America’s Civil War and the Spanish-American War, led the most romantic and thrilling of lives on the edgiest frontiers of time and space, where empires fell and dynasties flourished; they were correspondents who saw the world, broke the story, were making the news during the years when newspapers made available the most foreign of landscapes and their circulation wars were revolutionizing contemporary life, shaping global events, and creating history. Patton writes of the decades of lightning progress and high adventure, when America was emerging as a great power and the monarchies of Europe battled for dominance through a series of brief, bloody imperial wars; when the newly discovered electric telegraph enabled these extraordinary first-person dispatches to be splashed across the daily newspapers then proliferating on both sides of the Atlantic. Through the eyes (and minds) of American adventurers, soldiers, and artists-turned-correspondents—Mark Twain and the painter John Millet among them—we see what they saw and what they brought to life: the Civil War, the Austro-Prussian War, the Franco-Prussian War, the Russo-Turkish War. Patton writes about New York Herald reporter Henry Stanley, who led a caravan from the Tanzanian coast into the uncharted “cannibal country” and, after a 236-day trek, discovered the long lost and presumed dead Dr. David Livingstone. . . . about Archibald Forbes of the London Daily News bringing to life in his dispatches the frantic assembly of barricades along Paris streets as royalists and Communists fought with bayonets following the Prussian invasion. Here are the fearless young correspondents, among them Henry Villard of Bavaria, a journalist who covered the Civil War and ended up a financial titan, head of the Northern Pacific Railway and an early investor in the company that would ultimately become General Electric; and George Smalley, chief war correspondent of the New York Tribune, who watched for twenty-four hours as the Union Army of the Potomac and the Confederate Army of Northern Virginia fought in the cornfields and woodlands around Antietam Creek. These correspondents were at center stage and, through their on-the-spot reporting, became legends in their time. Their intrepid spirit and sense of adventure inspired generations of storytellers, explorers, artists, writers, statesmen and politicians, and even moviemakers—from Rudyard Kipling and Winston Churchill to Theodore Roosevelt, D. W. Griffith, and Cecil B. DeMille—men whose adolescence was shaped during this spectacular age of war correspondence.

Scenicruising Paul Von Fange 2015-08-03 BUSES magazine “This is truly an extraordinary history ... authoritative, painstakingly researched and highly

readable... Paul von Fange tells this and much more in this masterpiece, which is one of the best-researched and written bus books ever to cross the editorial desk. You do not need to have a prior interest in American buses to enjoy it, but if you do, you will find it especially irresistible.” BUS RIDER magazine “Paul von Fange writes the book on Scenicruisers ... [it] is a phenomenal research effort ... [a] must read ... Bill Luke ... took honor in providing the foreword, commending von Fange for his penchant for detail in providing the most complete and accurate history on one of the most iconic vehicles the industry has ever seen.” From Raymond Loewy’s original design to the radically modified GX-2 until the 1954 production of the PD-4501, the Greyhound Scenicruiser has been an American icon and remains so to this day, especially in the hearts and minds of those who keep them going. This is that story.

The Book of Iowa Films Marty Knepper 2014-08-04 This is the first comprehensive history of films made in or about Iowa. It reflects some twenty years of collecting, lecturing, and talking with some of Iowa’s current generation of independent filmmakers. It covers the span from 1918 to 2013 and gives important background information on dozens of high profile films such as the STATE FAIR films of 1933 and 1945, THE BRIDGES OF MADISON COUNTY, FIELD OF DREAMS, and many others. It is designed as a companion for the State Historical Society’s blockbuster "Hollywood in the Heartland" exhibition in Des Moines that is scheduled to run at least through 2016. The book has an interpretive essay covering the entire history as well as paragraph length descriptions of each film. A user-friendly feature is the Index of Films, which makes it easy to locate discussions of individual films. Marty Knepper is a featured commentator on video screens in the "Hollywood in the Heartland" exhibition.

The Long Tail Chris Anderson 2006-07-11 What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? "The Long Tail" is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what’s commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.

Perceptual Organization Michael Kubovy 2017-03-31 Originally published in 1981, perceptual organization had been synonymous with Gestalt psychology, and Gestalt psychology had fallen into disrepute. In the heyday of Behaviorism, the few cognitive psychologists of the time pursued Gestalt phenomena. But in 1981, Cognitive Psychology was married to Information Processing. (Some would say that it was a marriage of convenience.) After the wedding, Cognitive Psychology had come to look like a theoretically wrinkled Behaviorism; very few of the mainstream topics of Cognitive Psychology made explicit contact with Gestalt phenomena. In the background, Cognition’s first love - Gestalt - was pining to regain favor. The cognitive psychologists’ desire for a phenomenological and intellectual interaction with Gestalt psychology did not manifest itself in their publications, but it did surface often enough at the Psychonomic Society meeting in 1976 for them to remark upon it in one of their conversations. This book, then, is the product of the editors’ curiosity about the status of ideas at the time, first proposed by Gestalt psychologists. For two days in November 1977, they held an exhilarating symposium that was attended by some 20 people, not all of whom are represented in this volume. At the end of our symposium it was agreed that they would try, in contributions to this volume, to convey the speculative and metatheoretical ground of their research in addition to the solid data and carefully wrought theories that are the figure of their research.

Greyhound Scenicruiser Tom McNally 2013-03-01 When we deem things iconic, they have naturally become part of history and have earned a permanent status of importance to us—one such object is a particular intercity coach, the Greyhound PD-4501 Scenicruiser bus, built by the GM Corporation during 1954-'56. After nearly 60 years, its popularity, even today, is almost cult-like. Throughout the history of intercity coaches in the U.S., there have not been more toys, advertising pieces, souvenirs, or memorabilia centered on any other bus. The Scenicruiser starred in several movies, was featured on record album covers, and appeared on endless TV shows through the years. Starting with prototypes, this book covers all the various models of the Scenicruiser’s heritage, and even highlights many of the restored and still operating legends today.

The Persistence of Technology Stefan Krebs 2021-09-30 Repair, reuse and disposal are closely interlinked phenomena related to the service lives and persistence of technologies. When technical artefacts become old and worn out, decisions have to be taken: is it necessary, worthwhile or even possible to maintain and repair, reuse or dismantle them - or must they be discarded? These decisions depend on factors such as the availability of second-hand markets, repair infrastructures and dismantling or disposal facilities. In telling the stories of China's power grid, Canadian telephones, German automobiles and India's shipbreaking business, among others, the contributions in this volume highlight the persistence of technologies and show that maintenance and repair are not obsolete in modern industries and consumer societies.
