The Angel of the Revolution (Dystopian Novel) George Griffith 2018-12-21 This eBook has been formatted to the highest digital standards and adjusted for readability on all devices. The Angel of the Revolution tells the tale of a group of self-styled 'terrorists' who conquer the world through airship warfare. Led by a crippled, brilliant Russian Jew and his daughter, the 'angel' Natasha, 'The Brotherhood of Freedom' establishes a 'pax aeronautica' over the earth after a young inventor masters the technology of flight in 1903. The hero falls in love with Natasha and joins in her war against established society in general and the Russian Czar in particular.

**Boats of the World** Sean McGrail 2001 Maritime archaeology, the study of man's early encounter with the rivers and seas of the world, only came to the fore in the last decades of the twentieth century, long after its parent discipline, terrestrial archaeology, had been established. Yet there were seamen long before there were farmers, navigators before there were potters, and boatbuilders before there were wainwrights. In this book Professor McGrail attempts to correct some of the imbalance in our knowledge of the pastby

presenting the evidence for the building and use of early water transport: rafts, boats, and ships.

Boatowner's Mechanical and Electrical Manual Nigel Calder 2017-04-17 This manual takes both novice and experienced boatowner through minor to major repairs of electrical systems, engines, electronics, steering systems, generators, pumps, cookers, spars and rigging. When it was first published in 1990, the Boatowner's Mechanical & Electrical Manual broke new ground. It was hailed as the first truly DIY manual for boatowners and has sold in its thousands ever since. There have been significant changes in boat systems since then, particularly electrical systems, and this fourth edition has been fully updated to reflect these developments and expand its predecessor's worldwide popularity. **Across the River and Into the Trees** Ernest Hemingway 2002-07-25 In the fall of 1948, Ernest Hemingway made his first extended visit to Italy in thirty years. His reacquaintance with Venice, a city he loved, provided the inspiration for *Across the River and into the Trees*, the story of Richard Cantwell, a war-ravaged American colonel stationed in Italy at the close of the Second World War, and his love for a young Italian countess. A poignant, bittersweet homage to love that overpowers reason, to the resilience of the human spirit, and to the worldweary beauty and majesty of Venice, *Across the River and into the Trees* stands as Hemingway's statement of defiance in response to the great dehumanizing atrocities of the Second World War. Hemingway's last full-length novel published in his lifetime, it moved John O'Hara in *The New York Times Book Review* to call him "the most important author since Shakespeare."

**Shipping and Globalization in the Post-War Era** Niels P. Petersson 2019-11-21 This open access book belongs to the Maritime Business and Economic History strand of the Palgrave Studies in Maritime Economics book series. This volume highlights the contribution of the shipping industry to the transformations in business and society of the postwar era. Shipping was both an example and an engine of globalization and structural change. In turn, the industry experienced and pioneered, mirrored and enabled key developments that led to the present-day globalized economy. Contributions address issues such as the macro-level shift of shipping's centre of gravity from Europe to Asia, the political and legal frameworks

within which it developed, the strategies and performance of both successful and unsuccessful firms, and the links between the shipping industry and the wider economy and society. Without shipping and its ability to forge connections and networks of a global reach, the modern world would look very different. By bringing together scholars from various disciplinary and national backgrounds, this book advances our understanding of the linkages that bind economies and societies together.
