A Passage To Africa George Alagiah 2008-09-04 As a five-year-old, George Alagiah emigrated with his family to Ghana - the first African country to attain independence from the British Empire. A PASSAGE TO AFRICA is

Alagiah's shattering catalogue of atrocities crafted into a portrait of Africa that is infused with hope, insight and outrage. In vivid and evocative prose and with a fine eye for detail Alagiah's viewpoint is spiked with the freshness of the young George on his arrival in Ghana, the wonder with which he recounts his first impressions of Africa and the affection with which he dresses his stories of his early family life. A sense of possibility lingers, even though the book is full of uncomfortable truths. It is a book neatly balanced on his integrity and sense of obligation in his role as a writer and reporter. The shock of recognition is always there, but it is the personal element that gives A PASSAGE TO AFRICA its originality. Africa becomes not only a group of nations or a vast continent, but an epic of individual pride and suffering.

The Five Orange Pips Arthur Conan Doyle 2020-09-28 John Openshaw lives with his uncle Elias, who used to live on a plantation in the States. Strange things have been happening of late in their home. There's a door that is always locked and his uncle's behaviour has become erratic. One day, a letter arrives from India with only the mention "K. K. K." on it. It contained five orange pips. "The Five Orange Pips" is part of "The Adventures of Sherlock Holmes". Sir Arthur Conan Doyle (1859-1930) was born in Scotland and studied medicine at the University of Edinburgh. After his studies, he worked as a ship's surgeon on various boats. During the Second Boer War, he was an army doctor in South Africa. When he came back to the United Kingdom, he opened his own practice and started writing crime books. He is best known for his thrilling stories about the adventures of Sherlock Holmes. He published four novels and more than 50 short-stories starring the detective and Dr Watson, and they play an important role in the history of crime fiction. Other than the Sherlock Holmes series, Doyle wrote around thirty more books, in genres such as science-fiction, fantasy, historical novels, but also poetry, plays, and non-fiction.

Assessing 21st Century Skills National Research Council 2011-09-16 The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides

The Woman in Black Susan Hill 2007 Proud and solitary, Eel Marsh House surveys the windswept reaches of the salt marshes beyond Nine Lives Causeway. Arthur Kipps, a junior solicitor, is summoned to attend the funeral of Mrs Alice Drablow, the house's sole inhabitant, unaware of the tragic secrets which lie hidden behind the shuttered windows. It is not until he glimpses a pale young woman, dressed all in black, at the funeral, that a creeping sense of unease begins to take hold, a feeling deepened by the reluctance of the locals to talk of the woman in black - and her terrible purpose.

Cryptography and Network Security William Stallings 2016-02-18 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. The Principles and Practice of Cryptography and Network Security Stallings' Cryptography and Network Security, Seventh Edition, introduces the reader to the compelling and evolving field of cryptography and network security. In an age of viruses and hackers, electronic eavesdropping, and electronic fraud on a global scale, security is paramount. The purpose of this book is to provide a practical survey of both the principles and practice of cryptography and network security. In the first part of the book, the basic issues to be addressed by a network security capability are explored by providing a tutorial and survey of cryptography and network security technology. The latter part of the book deals with the practice of network security: practical applications that have been implemented and are in use to provide network security. The Seventh Edition streamlines subject matter with new and updated material – including Sage, one of the most important features of the book. Sage is an open-source, multiplatform, freeware package that implements a very powerful, flexible, and easily learned mathematics and computer algebra system. It provides hands-on experience with cryptographic algorithms and supporting homework assignments. With Sage, the reader learns a powerful tool that can be used for virtually any mathematical application. The book also provides an unparalleled degree of support for the reader to ensure a successful learning experience.

The Great Reading Disaster Mona McNeer 2012-02-20 By the late 1980s half the nation's children were receiving eleven years of progressivist schooling that failed to give them even the elementary basis of education that was completed by the age of seven in earlier days. This great reading disaster was caused by the 'look–say' method of teaching, which presented whole words not individual letters. This book explains the causes and provides the solution to this problem. In 2006, the Secretary of State for Education and Skills has ordered schools to use the phonic method but there seems little evidence that its implications are properly understood or that any serious re-training programme for teachers is being put in place. The authors believe their explanations and recommendations in this book are thus needed just as much as ever.

Victims and Restorative Justice Inge Vanfraechem 2015-05-15 Restorative justice aims to address the consequences of crime by encouraging victims and offenders to communicate and discuss the harm caused by the crime that has been committed. In the majority of cases, restorative justice is facilitated by direct and indirect dialogue between victims and offenders, but it also includes support networks and sometimes involves professionals such as police, lawyers, social workers or prosecutors and judges. In theory, the victim is a core participant in restorative justice and the restoration of the harm is a first concern. In practice, questions arise as to whether the victim is actively involved in the process, what restoration may entail, whether there is a risk of secondary victimisation and whether the victim is truly at the heart of the restorative response, or whether the offender remains the focal point of attention. Using a combination of victimological literature and empirical data from a European research project, this book considers the role and the position of the victim in restorative justice practices, focusing on legislative, organisational and institutional frameworks of victim-offender mediation and conferencing programmes at a national and local level, as well as the victims' personal needs and experiences. The findings are essential reading for academics and students engaged in the study of justice, victimology and law. The publication will also be valuable to policymakers and professionals such as social workers, lawyers and mediators.
