Events and Sustainability Kirsten Holmes 2015-03-24 Increasing concerns over climate and environmental change, the global economic and financial crisis and impacts on host communities, audiences, participants and destinations has reinforced the need for more sustainable approaches to events. Little Elf: A Celebration of Harry Langdon Chuck Harter & Michael J. Hayde Harry Langdon, a comic who appeared in Vaudeville, silent movies, and sound film comedies, held a unique position in Hollywood history. After a slow start in movies, he joined Keystone, the famous Mack Sennett studio. Langdon's screen character was quite different from the broad slapstick that was popular at the time. When paired with director Frank Capra in films such as *The Strong Man* (1926), *Tramp, Tramp, Tramp* (1926), and *Long Pants* (1927), he rivaled Charlie Chaplin, Buster Keaton, and Harold Lloyd. Chuck Harter and Michael J. Hayde's biography includes a comprehensive Filmography. Lavishly illustrated. "You can hear the laughter flowing through the book. Langdon's comic timing was about taking enough time to figure out a situation. The reader should do the same, and not rush through these wonderful pages." - Brad Linaweaver, *Mondo Cult* "[The authors] have done a great service for comedy aficionados and historians, offering up a cornucopia of information on every one of Langdon's screen appearances, rare photos, vintage magazine articles, and more. If you have any interest in Harry

Langdon, this book is invaluable. - Leonard Maltin in Leonard Maltin's *Movie Crazy*

Manual of Romance Phonetics and Phonology Christoph Gabriel 2021-11-22 This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.

Monitoring Land Subsidence Using Remote Sensing Massimo Fabris 2021-09-06 In this book are reported nine works related to land subsidence monitoring using remote sensing techniques. Land subsidence is a common phenomenon in many regions of the world, where it causes degradation of local ecosystems and disruption of economic activities. Its effects are more evident in densely populated areas in particular in low-lying territories such as river deltas and coastal areas where the combination of land subsidence and sea level rise increases the flooding risk. For this reason, the monitoring of ground deformations is a crucial step to obtain important information for the development of risk mitigation strategies. In the presented papers, the characteristics of land subsidence occurring in different study areas are described, and recent developments in the used methodologies for the monitoring of the ground displacements are discussed and validated also by means of ground-based data. Moreover, advantages and disadvantages of the adopted techniques are highlighted. The outcomes of these research works can provide national and local authorities with useful information for the implementation of integrated monitoring systems in the areas most affected by land subsidence.

The Order of the Phoenix Park Twenty Major 2012-08-16 For three years Twenty Major has written a daily blog. Now though comes a tale so bizarre and abominable that mere words on a computer screen wouldnt have been able to do it justice. These words need to be on paper ... When Twenty Major's friend, record-shop-owner Tom O'Farrell is brutally shot in the stomach, his dying act was to scrawl the number 60 in blood on his chest and dial Twenty's number into his phone. When Twenty is

called to the scene of the crime he hasn't a clue why Tom was trying to contact him or what the hell the number 60 means. But himself and Tom go back a long way and he vows to find Tom's killer. Then things take a turn for the worse: Folkapalooza is announced - a massive free concert due to take place in the Phoenix Park with headlining acts Damien Rice, James Blunt and David Gray. Something is wrong, really wrong. Why are people obsessed with Folkapalooza? What has turned the Goths outside the Central Bank into acoustic loving drips? Who is the ginger albino and how does it all link to Tom? Can Twenty, Jimmy the Bollix, Stinking Pete, Dirty Dave, Lucky and even Ron himself, save the people of Dublin and, less importantly, the rest of Ireland, from a fate that is, quite literally, worse than death? And solve a murder along the way?

Sustainable Living with Environmental Risks Nobuhiro Kaneko 2014-03-11 We are not free from environmental risks that accompany the development of human societies. Modern economic development has accelerated environmental pollution, caused loss of natural habitats, and modified landscapes. These environmental changes have impacted natural systems: water and heat circulation, nutrient cycling, and biodiversity. These changes in natural systems degrade ecosystem services and subsequently increase environmental risks for humans. Environmental risks, therefore, are not only human health risks by pollution, climatic anomalies and natural disasters, but also degradation of ecosystem services on which most people are relying for their lives. We cannot entirely eliminate the risks, because it is not possible to attain zero impact on the environment, but we need to find a mechanism that minimizes environmental risks for human sustainably. This is the idea of the interdisciplinary framework of "environmental risk management" theory, which advocates harmony between economic development and environmental conservation. Based on this theory, the Sustainable Living with Environmental Risk (SLER) programme, adopted by the Japanese Ministry of Education (MEXT) as one of its strategic programmes, has been training graduate students at the Yokohama National University, Japan, from 2009 to 2013 to become future environmental leaders who will take the initiative in reducing the level of environmental risks and in protecting natural resources in the developing nations of Asia and Africa. This book provides students and teachers of this new academic field with a comprehensive coverage of case studies of environmental risks and their practical management technologies not only in Japan but also in developing nations in Asia and Africa.

Zooplankton Diversity and Pelagic Food Webs Marina Manca 2021-05-04 Zooplankton are of key importance in the structure and functioning of aquatic food webs. They contribute to a large part of the functional and structural biodiversity of predator and prey plankton communities. Promptly responding to long-term and seasonal changes in the physical and chemical environment, they are sensitive indicators of patterns and mechanisms of impact drivers, both natural and human induced. In this volume, we aim to present evidence for both long-term and seasonal changes in zooplankton community structure and dynamics, investigating different approaches from population dynamics to advanced molecular techniques and reconstructing past communities from microfossil remains in lake sediments.
