Global Shocks and the New Global and Regional Financial Architecture

Naoyuki Yoshino 2017-08-15 Asian economies continue to be subject to new shocks: US monetary policy tightening, the adoption of negative-

interest-rate policies by central banks all over the world, the slowdown of the People's Republic of China, and the sharp drop in oil and other commodity prices. All these highlight the vulnerability of the region to volatile trade and capital flows even as the global and Asian regional financial architecture evolves. This volume analyzes the vulnerabilities of Asian economies to external economic and financial shocks and assesses the performance of Asian regional institutions in financial surveillance and cooperation. It also evaluates ongoing reforms of the global financial architecture, including the International Monetary Fund (IMF), the Financial Stability Board, and the "Troika" (European Commission, European Central Bank, and the IMF) in managing the European sovereign debt and banking crisis. Based on these, the book develops valuable recommendations to strengthen the Asian regional financial architecture and improve cooperation with global multilateral institutions.

### **Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation**

Christopher B. Field 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate

change, including policymakers, the private sector and academic researchers.

Cities, Culture and Creativity UNESCO 2021-05-25 Culture and creativity have untapped potential to deliver social, economic, and spatial benefits for cities and communities. Cultural and creative industries are key drivers of the creative economy and represent important sources of employment, economic growth, and innovation, thus contributing to city competitiveness and sustainability. Through their contribution to urban regeneration and sustainable urban development, cultural and creative industries make cities more attractive places for people to live in and for economic activity to develop. Culture and creativity also contribute to social cohesion at the neighborhood level, enable creative networks to form and advance innovation and growth, and create opportunities for those who are often socially and economically excluded. The ongoing COVID-19 pandemic has had a deep impact on the cultural sector, yet it has also revealed the power of cultural and creative industries as a resource for city recovery and resilience. More generally, cities are hubs of the creative economy and have a critical role to play in harnessing the transformative potential of cultural and creative industries through policies and enabling environments at the local level. 'Cities, Culture, and Creativity' (CCC) provides guiding principles and a CCC Framework, developed by UNESCO and the World Bank, to support cities in unlocking the power of cultural and creative industries for sustainable urban development, city competitiveness, and social inclusion. Drawing from global studies and the experiences of nine diverse cities from across the world, the CCC Framework offers

concrete guidance for the range of actors -- city, state, and national governments; creative industry and related private-sector organizations; creatives; culture professionals and civil society-- to harness culture and creativity with a view to boosting their local creative economies and building resilient, inclusive, and dynamic cities.
