Against Empathy Paul Bloom 2017-02-02 In a divided world, empathy is not the solution, it is the problem. We think of empathy – the ability to feel the suffering of others for ourselves – as the ultimate source of all good behaviour. But while it inspires care and protection in personal relationships, it has the opposite effect in the wider world. As the latest research in psychology and neuroscience shows, we feel empathy most for those we find attractive and who seem similar to us and not at all for those who are different, distant or anonymous. Empathy therefore biases us in favour of individuals we know while numbing us to the plight of thousands. Guiding us expertly through the experiments, case studies and arguments on all sides, Paul Bloom ultimately shows that some of our worst decisions – in charity, child-

well-balanced and beautiful life. Anxiety is often here to stay for the long haul unless something significant is done about it. Severe cases of anxiety require professional help when it can cause significant disruption to your ability to function in your personal, social, and professional life. People with anxiety disorders are often associated with depression. That is, the more reason people with anxiety disorders are usually diagnosed with depression. Anxiety is defined as an emotion marked by the experience of fear or worry. Anxiety is, however, to be distinguished from fear, which most scientists regard as a natural reaction to a perceived threat. If you analyze your issues, you will realize that "internal peace" is the lacking element and that inasmuch as you may think you will find peace "out there," true peace comes from within. After all, was the Buddha not right

when he noted the following truth? "Peace comes from within. Do not seek it without." - Buddha Not living in the present is why biased or phony whims and wishes control so many of us. Being unconnected with the present moment, mindful of yourself and your needs, and aware of the exact 'things' that bring you happiness and meaning is also why your life lacks structure and a depth. If you want to live a richer, more fulfilling life, start being more mindful; that is the secret to lasting internal happiness and peace in life. This book covers the following topics: Mindfulness meditation Anxiety Signs, Symptoms and Causes of Anxiety and Depression Emotional Stress and Relaxation Techniques How to Manage Activities to Reduce Anxiety Using Exposure to Eliminate Fear How to Help Someone with Panic Attacks or Panic Disorder Understanding Your Anger Anger Management

million abortions performed annually in the U.S., more than 500,000 are performed on college-aged women. They make up 44% of all abortions in the country. So it is not surprising that there is a large, thriving network of pro-life groups on college campuses. These groups serve to advocate for pro-life and educate other young people about the physical, emotional, psychological and spiritual effects that abortion has on women. While there are online guides and booklets on the topic, there are currently very few if any books that are specifically geared for use by young advocates for this cause. Now there is Stand for Life, a manual that addresses tough questions in a format that is concise and straightforward. Topics include: Defending your pro-life views in five minutes or less Understanding the sanctity of human life Simplifying the abortion debate Developing a Christian response to

The Neurotic's Guide to Avoiding Enlightenment

Chris Niebauer, Ph.D.

2014-03-10 Has self-improvement really

improved the self? More

than ever people are on a quest for self-improvement and enlightenment. People are "watching" their egos or losing their egos in order to find peace of mind or to get along better with others.

And yet, the more we try to lose our ego, the more of it there is to lose. The more we try to make peace, the more we find conflict. It is

exactly what happens when we try not to think of the number 3 and that is all we can think about. Our efforts seem to have the opposite effect and this is due to the way the left side of the brain processes information.

Neuroscience discovered that the left brain makes up elaborate stories and convincing explanations. It is the left brain that makes up the most elaborate and convincing story of all, the story of who you think you are. And the more we try to get out of this story, the deeper we find ourselves in it because it is the function of the left brain to work on the law of opposition. Try not to be anxious and that's exactly what happens. Try not to worry and you will be flooded with anxious thoughts. And the same is true for self-improvement. The more we try to improve our story, the more the story needs to be improved. The left brain excels at these games even when it plays by pretending not to play. If

I said that all attempts at self-improvement are futile, how would you respond? Would you reflexively think I'm wrong? Is there any way not to play these games of the left brain? Which part of your brain do you think is asking this question? This book was written for the ordinary person who has an extraordinary curiosity for who they are, how thoughts work and why they cannot control their thoughts. It is a practical guide that uses examples from my kids, favorite movies and TV shows from the 80s and 90s along with simple exercises so you can see for yourself if any of this is on track. While no special knowledge of neuroscience is required, you may understand many of the examples if you've seen an episode or two of Star Trek or Seinfeld. While this work is based on the teachings of Alan Watts and Eckhart Tolle it integrates the findings of modern neuroscience which surprisingly reveals a similar

message. It is the desire for enlightenment that is the biggest block to happiness and peace, in fact, it is the only block. It is not until one gives up the quest to find oneself, improve oneself or be more spiritual, that one can ever find the peace they are looking for. Awkward Dominion Frank C. Exploring the key international issues in the interwar period—peace treaty revisions, Western economic recovery, and modernization—Costigliola considers American political and economic success in light of Europe's fascination

with American technology, trade, and culture. The figures through which he tells this story include Herbert Hoover, Calvin Coolidge, Henry Stimson, Charles Lindberg, Ernest Hemingway, and Henry Ford.

flawed. There is no right or wrong way to be a feminist, which is why Gay proudly labels herself as a bad feminist. As a bad feminist, Gay recognizes that humans are flawed, and therefore, their views and opinions don't always fit perfectly into a neatly wrapped package. For instance, while Gay enjoys going against the grain, her favorite color is still pink and she enjoys reading Vogue, both of which are typical female stereotypes. At the end of the day, feminism looks different for everyone but being a bad feminist is better than not being a feminist at all! As you read, you'll learn how reality television is harmful to the fight for equality, how racial profiling can end in murder, and how movies like The Help only advance racial stereotypes.

Thinking Clearly with Data

Ethan Bueno de Mesquita
2021-11-16 "This is an intro-level text that teaches how to think clearly and conceptually about quantitative information, emphasizing ideas over technicality and assuming no prior exposure to data analysis, statistics, or quantitative methods. The books four parts present the foundation for quantiative reasoning: correlation and causation; statistical relationships; causal phenomena; and incorporating quantitative information into decision making. Within these parts it covers the array of tools used by social scientists, including regression, inference, experiments, research design, and more, all by explaining the rationale and logic behind such tools rather than focusing only on the technical calculations used for each. New concepts are presented simply, with the help of copious examples,

and the books leans towards graphic rather than mathematical representation of data, with any technical material included in appendices"--

Moving from Fear to Freedom

Grace Fox
2007-08-01 Fear was not part of God's original agenda for his creation. It slithered onto the scene when Adam and Eve sinned, causing a tear in their relationship with God.
