**The Book of L** G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1955. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

**Profiting with Iron Condor Options** Michael Benklifa 2011-01-19 In a straightforward approach, Hanania Benklifa provides readers the practical knowledge needed to trade options conservatively in Profiting with Iron Condor Options: Strategies from the Frontline for Trading in Up or Down Markets. The objectives are simple: make 2%-4% a month staying in the market as little as possible. Market experts use option condors to consistently earn monthly returns while trading conservatively and staying in the market as little as possible. Benklifa—who manages \$10+ million in condor trades each month—shows you exactly how to run these trades and earn these returns, delivering all the details you need to master every nuance of this remarkable strategy. Benklifa shares option condors examples using market realities, not oversimplified abstractions. You'll learn how to handle real-life market dynamics that can dramatically impact results, including rising and falling volatility, changing bid-ask spreads, and distorted call parity. You'll learn how to profit in the sideways markets where condor options are most widely used—and also in extreme-trending markets that offer their own surprising opportunities. Traders who focus on a specific type of trade have a history of outperforming stock pickers and directional investors. This book will give you that deep and usable level of knowledge about one of today's most well-proven strategies: option condors.

**Red Hood** Elana K. Arnold 2020-02-25 A dark, engrossing, blood-drenched tale of the familiar threats to female power—and one girl’s journey to regain it. Five starred reviews greeted this powerful story from Elana K. Arnold, author of the Printz Honor winner Damsel. You are alone in the woods, seen only by the unblinking yellow moon. Your hands are empty. You are nearly naked. And the wolf is angry. Since her grandmother became her caretaker when she was four years old, Bisou Martel has lived a quiet life in a little house in Seattle. She’s kept mostly to herself. She’s been good. But then comes the night of homecoming, when she finds herself running for her life over roots and between trees, a fury of claws and teeth behind her. A wolf attacks. Bisou fights back. A new moon rises. And with it, questions. About the blood in Bisou’s past, and on her hands as she stumbles home. About broken boys and vicious wolves. About girls lost in the woods—frightened, but not alone.

**Divine Stories** 2013-02-08 Divine Stories is the inaugural volume in a landmark translation series devoted to making the wealth of classical Indian Buddhism accessible to modern readers. The stories here, among the first texts to be inscribed by Buddhists, highlight the moral economy of karma, illustrating how gestures of faith, especially offerings, can bring the reward of future happiness and ultimate liberation. Originally contained in the Divyavadana, an enormous compendium of Sanskrit Buddhist narratives from the early Common Era, the stories in this collection express the moral and ethical impulses of Indian Buddhist thought and are a testament to the historical and social power of narrative. Long believed by followers to be the actual words of the Buddha himself, these divine stories are without a doubt some of the most influential stories in the history of Buddhism.

**Securing Outer Space** Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected – but not challenged – the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to ‘bring back space’ into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.
