Engineering Mathematics II Sergei Silvestrov 2017-02-10 This book highlights the latest advances in engineering mathematics with a main focus on the mathematical models, structures, concepts, problems and computational methods and algorithms most relevant for applications in modern technologies and engineering. It addresses mathematical methods of algebra, applied matrix analysis, operator analysis, probability theory and stochastic processes, geometry and computational methods in network analysis, data classification, ranking and optimisation. The individual chapters cover both theory and applications, and include a wealth of figures, schemes, algorithms, tables and results of data analysis and simulation. Presenting new methods and results, reviews of cutting-edge research, and open problems for future research, they equip readers to develop new mathematical methods and concepts of their own, and to further compare and analyse the methods and results discussed. The book consists of contributed chapters covering research developed as a result of a focused international seminar series on mathematics and applied mathematics and a series of three focused international research workshops on engineering mathematics organised by the Research Environment in Mathematics and Applied Mathematics at Mälardalen University from autumn 2014 to autumn 2015: the International Workshop on Engineering Mathematics for Electromagnetics and Health Technology; the International Workshop on Engineering Mathematics, Algebra, Analysis and Electromagnetics; and the 1st Swedish-Estonian International Workshop on Engineering Mathematics, Algebra, Analysis and Applications. It serves as a source of inspiration for a broad spectrum of researchers and research students in applied mathematics, as well as in the areas of applications of mathematics considered in the book.

India's Economic Development Since 1947 Uma Kapila 2009 Providing a basic understanding of India's economy, this guide addresses topics such as growth, policy regime changes, unemployment, macroeconomic stabilization, agriculture, and development prospects.

Current affairs April to June 2017 Question bank ebook JagranJosh 2017-07-13 The prime purpose of the Question Bank ebook is to fulfill the objective of aspirants preparing for IAS, SSC, Banking, Railway, Insurance, Defence, exam. It is an ideal package for revision and evaluating your performance on the same hand. The combined package of Current Affairs April, May & June 2017 question bank into ebook makes this course material an ideal package for you to buy for all competitive exams. This question bank includes questions on National, International, Economy, Science & Technology, Environment & Ecology, Sports, etc. This question bank ebook has 100 questions on April Current Affairs questions with explanations, May Current Affairs questions with explanations and June Current Affairs questions with explanations. Key Features – · 3 months important current affairs questions relevant to competitive exams · 300 questions with relevant explanations to competitive exams · Questions are prepared by experienced faculties who are aware of the exam trend · Aspirants can analyze their weak and strong points after giving the test · Will give a clear idea of how to study and what to study for the exam

Types of Nonverbal Communication Xiaoming Jiang 2021-09-29 The use of nonverbal cues in social activities is essential

for human daily activities. Successful nonverbal communication relies on the acquisition of rules of using cues from body movement, eye contact, facial expression, tone of voice, and more. As such, this book adds to our understanding of nonverbal behavior by examining state-of-the-art research efforts in the field. The book addresses the classification and training of nonverbal communication with advanced technologies, gives an overview on factors underlying the learning and evaluating of nonverbal communications in educational settings and in digital worlds, and characterizes the latest advancement that uncovers the psychological nature underlying nonverbal communication in conversations. We hope the book will reach a large audience for a variety of purposes, including students and professors in academic institutions for teaching and research activities as well as researchers in industries for the development of communication-related products, benefiting both healthy individuals and special populations.

Competition Science Vision 2009-08 Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

Garment Manufacturing Technology Rajkishore Nayak 2015-05-26 Garment Manufacturing Technology provides an insiders' look at this multifaceted process, systematically going from design and production to finishing and quality control. As technological improvements are transforming all aspects of garment manufacturing allowing manufacturers to meet the growing demand for greater productivity and flexibility, the text discusses necessary information on product development, production planning, and material selection. Subsequent chapters covers garment design, including computer-aided design (CAD), advances in spreading, cutting and sewing, and new technologies, including alternative joining techniques and seamless garment construction. Garment finishing, quality control, and care-labelling are also presented and explored. Provides an insiders look at garment manufacturing from design and production to finishing and quality control Discusses necessary information on product development, production planning, and material selection Includes discussions of computer-aided design (CAD), advances in spreading, cutting and sewing, and new technologies, including alternative joining techniques and seamless garment construction Explores garment finishing, quality control, and care labelling
