From Strength to Strength Arthur C. Brooks 2022-03-17 The #1 New York Times Bestseller 'This book is amazing. We've all read it cover to cover. We couldn't put it down.' - Chris Evans From the bestselling author and columnist behind The Atlantic's popular "How to Build a Life" series, a guide to transforming the life changes we fear into a source of strength. In the first half of life, ambitious strivers embrace a simple formula for success in work and life: focus single-mindedly, work tirelessly, sacrifice personally, and climb the ladder relentlessly. It works. Until it doesn't. It turns out the second half of life is governed by different rules. In middle age, many strivers begin to find

success coming harder and harder, rewards less satisfying, and family relationships withering. In response, they do what strivers always do: they double down on work in an attempt to outrun decline and weakness, and deny the changes that are becoming more and more obvious. The result is often anger, fear, and disappointment at a time in life that they imagined would be full of joy, fulfillment, and pride. It doesn't have to be that way. In From Strength to Strength, happiness expert and bestselling author Arthur C. Brooks reveals a path to beating the "striver's curse." Drawing on science, classical philosophy, theology, and history, he shares counterintuitive strategies for releasing old habits and forming new life practices, showing you how to: - Kick the habits of workaholism, success addiction, and self-objectification - Meditate on death-in order to beat fear and live well - Start a spiritual adventure - Embrace weakness in a way that turns it into strength. Change in your life is inevitable, but suffering is not. From Strength to Strength shows you how to accept the gifts of the second half of life with grace, joy, and ever deepening purpose.

How to Build Affordable Hot Rods Tony Thacker 2020-12-01 Learn how to build an affordable hot rod following the advice of the masters! In How to Build Affordable Hot Rods, author and lifelong hot rod aficionado Tony Thacker takes you through the process of building a hot rod on a budget. Drawing on his own extensive experience of both buying and building rods, Thacker explores the good, the bad, and the ugly. The good was setting a land speed record at Bonneville, the bad was buying a rod from which the previous owner had "swapped out" the good engine, and the ugly--well, let's just not go there. How to Build Affordable Hot Rods includes extensive how-to sections that cover step-by-step chassis builds for Model A, 1932, and 1936 Fords, including front- and rear-end setups. The in-depth chassis builds are complimented with sections on powertrain choices, bodywork and roof chops, wheels and tires, and wiring and paint. Also included are chapters on interiors and the all-important details that individualize any project to ensure that it stands out from the rest. When Henry Ford introduced his beloved Model T, he unwittingly gave the average person the means to go racing. Prior to the T, racing was mostly a sport of the rich, but that changed with the Model T. Stripped of fenders and hopped up with speed parts, T speedsters ruled, and it wasn't long before enthusiasm on the track translated to the street and the term hot rod entered the vernacular. Of course, it didn't need to be a Ford (and still doesn't), but the easiest and therefore cheapest route to Hot Rod Boulevard is down the Ford road. The journey accelerated after World War II, as hot rodding boomed with the growth of speed shops, car shows, drag racing, talented and trained GIs returning home, and the launch of Hot Rod magazine to spread the gospel far and wide. More than 100 years after the original Model T, hot rodding remains alive and well in the Australasia, Europe, and (of course) its birthplace the US.

Learn from the best and get started building your affordable hot rod today!

Antistatic Sprays National Aeronautics and Space Adm Nasa 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Corporate Social Responsibility in Asia Kyoko Fukukawa 2009-10-29 Corporate Social Responsibility (CSR) is an important issue in contemporary business, management and politics, especially since the launch of the United Nations Global Compact in 2000 as an initiative to encourage businesses worldwide to adopt sustainable and socially responsible policies, and to report on them. This book examines the theory and practice of CSR in Asia. The philosophical and ideological underpinnings of CSR are rooted in Anglo-American and European principles of liberal democratic rights, justice and societal structures. This book not only considers the impact of Western CSR practices in Asia, but also provides much needed Asian perspectives on this issue. It investigates the operation of CSR in different countries across Asia, including China, Japan, Malaysia, Thailand and Bangladesh – comparing the different meanings given to CSR, and the varying degrees of success experienced in different national contexts. This book argues if CSR is ever to revolutionize the manner in which we trade then it is needs to open itself up to the full variety of social responsibility as it occurs around the world. The book re-maps and refines debates about CSR as a global phenomenon, and will be of great value to professionals making strategic decisions in the global business environment.

Team of Teams General Stanley McChrystal 2015-11-26 What if you could combine the agility, adaptability, and cohesion of a small team with the power and resources of a giant organization? When General Stanley McChrystal took command of the Joint Special Operations Task Force in Iraq in 2003, he quickly realized that conventional military tactics were failing. The allied forces had a huge advantage in numbers, equipment and training - but none of the enemy's speed and flexibility. McChrystal and his colleagues discarded a century of conventional wisdom to create a 'team of teams' that combined extremely transparent communication with decentralized decision-making authority. Faster, flatter and more flexible, the task force beat back al-Qaeda. In this powerful book, McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to any leader. Through compelling examples, the authors demonstrate that the 'team of teams' strategy has worked everywhere from hospital emergency rooms to NASA and has the potential to transform organizations large and small. 'A bold argument that leaders can help teams become greater than the sum of their parts' Charles Duhigg, author of The Power of Habit 'An indispensable guide to organizational change' Walter Isaacson, author of Steve Jobs

Korea: The Impossible Country Daniel Tudor 2012-11-10 South Korea's amazing rise from the ashes: the inside story of an economic, political, and cultural phenomenon Long overshadowed by Japan and China, South Korea is a small country that happens to be one of the great national success stories of the postwar period. From a failed state with no democratic tradition, ruined and partitioned by war, and sapped by a half-century of colonial rule, South

Korea transformed itself in just fifty years into an economic powerhouse and a democracy that serves as a model for other countries. With no natural resources and a tradition of authoritarian rule, Korea managed to accomplish a second Asian miracle. Daniel Tudor is a journalist who has lived in and written about Korea for almost a decade. In *Korea: The Impossible Country*, Tudor examines Korea's cultural foundations; the Korean character; the public sphere in politics, business, and the workplace as well as the family, dating, and marriage. In doing so, he touches on topics as diverse as shamanism, clan-ism, the dilemma posed by North Korea, the myths about doing business in Korea, the Koreans' renowned hard-partying ethos, and why the infatuation with learning English is now causing massive social problems. South Korea has undergone two miracles at once: economic development and complete democratization. The question now is, will it become as some see Japan, a prosperous yet aging society, devoid of energy and momentum? Or will the dynamism of Korean society and its willingness to change—as well as the opportunity it has now to welcome outsiders into its fold—enable it to experience a third miracle that will propel it into the ranks of the world's leading nations regarding human culture, democracy, and wealth? More than just one journalist's account, *Korea: The Impossible Country* also draws on interviews with many of the people who made South Korea what it is today. These include: Choi Min-sik, the star of "Old Boy." Park Won-soon, Mayor of Seoul. Soyeon Yi, Korea's first astronaut Hong Myung-bo, legendary captain of Korea's 2002 FIFA World Cup team. Shin Joong-hyun, the 'Godfather of Korean Rock.' Ko Un, poet. Hong Seok-cheon, restaurateur, and the first Korean celebrity to 'come out.' And many more, including a former advisor to President Park Chung-hee; a Shaman priestess ('mudang'); the boss of Korea's largest matchmaking agency; a 'room salon' hostess; an architect; as well as chefs, musicians, academics, entrepreneurs, homemakers, and chaebol conglomerate employees.

QL 4 James Garrison 2017-05-05 PFC Bell, a newly-minted U.S. Army MP, quickly discovers that there's more than a war going on along QL 4, the main road from Saigon into the Mekong Delta. QL 4 leads Bell deep into a swamp of deception, mayhem, and death that insinuates its way both into towns the MPs patrol each day and into the old French villa where they live.
