Antistatic Sprays National Aeronautics and Space Adm Nasa 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Spoiled Right Meghan Owenz 2021-01-11 "Spoiled Right allows you to cut through the noise so you can provide kids the childhoods they deserve. Get this book!" -Richard Freed, psychologist and author of Wired Child "I am so glad this book

exists. As a parent, educator, and screentime consultant aware of the modern challenges presented by excess screen use, I am constantly searching for research-based strategies to apply in my own home and in my work with clients. Dr. Owenz's book is not only chock full of the research we need to support child-centered developmental choices, but it also provides parents and caregivers with practical and tactical 'to-do's' to put intention into (research-backed) action. It's not about 'less screens'; it's about more of the high-quality life experiences that truly contribute to healthy development. Dr. Owenz approaches the challenge of screentime with empathy, warmth, and personal experience to show that less screentime is not only possible, it's preferable in the long run. It is easy to tell parents 'do less screentime, ' but to have a resource that actually maps out the five key ingredients (her S.P.O.I.L. method) for raising healthy and happy children is truly awesome. This book will be a go-to resource for me for a long time!" -Emily Cherkin, MA Ed, and The Screentime Consultant From the author of popular parenting blog, Screen-Free Parenting. If kids are supposed to be spending less time on screens, what should they be doing instead? This book answers that question and gives parents and those who work with them, a science-backed, developmentally appropriate system for emphasizing alternative activities of childhood that can incidentally reduce screen time and minimize the negative effects. It's the much needed "what to do" answer in response to the heavy-handed "what not to do" mandates about children's screen time. Dr. Owenz suggests caregivers do not need another thing to avoid, and instead should be focusing on what children need more of, like social time, play opportunities, outdoor experiences, chores, and a strong relationship with reading. Meghan Owenz, PhD is an author, parent, counseling psychologist, and professor at Penn State University, Berks. She is the co-founder and writer of the popular parenting website, Screen-Free Parenting. She is a regular speaker on the topic of children's screen time and uses her expertise to advocate for science-backed changes to policies and practices that affect children's well-being. She also created the board game, Starting Lines, to fight creative decline and reward children's out-of-the-box thinking. She lives in Pennsylvania with her husband and two children who are thriving with very limited screen time.

Korea: The Impossible Country Daniel Tudor 2012-11-10 South Korea's amazing rise from the ashes: the inside story of an economic, political, and cultural phenomenon Long overshadowed by Japan and China, South Korea is a small country that happens to be one of the great national success stories of the postwar period. From a failed state with no democratic tradition, ruined and partitioned by war, and sapped by a half-century of colonial rule, South Korea transformed itself in just fifty years into an economic powerhouse and a democracy that serves as a model for other countries. With no natural resources and a tradition of authoritarian rule, Korea managed to accomplish a second Asian miracle. Daniel Tudor is a journalist who has lived in and written about Korea for almost a decade. In Korea: The Impossible Country, Tudor examines Korea's cultural foundations; the Korean character; the public sphere in politics, business, and the workplace as well as the family, dating, and marriage. In doing so, he touches on topics as diverse as shamanism, clan-ism, the dilemma posed by North Korea, the myths about doing business in Korea, the Koreans' renowned hard-partying ethos, and why the infatuation with learning English is now causing massive social problems. South Korea has undergone two miracles at once: economic development and complete democratization. The question now is, will it become as some see Japan, a prosperous yet aging society, devoid of energy and momentum? Or will the dynamism of Korean society and its willingness to change—as well as the opportunity it has now to welcome outsiders into its fold—enable it to experience a third miracle that will propel it into the ranks of the world's leading nations regarding human culture, democracy, and wealth? More than just one journalist's account, Korea: The Impossible Country also draws on interviews with many of the people who made South Korea what it is today. These include: Choi Min-sik, the star of "Old Boy." Park Won-soon, Mayor of Seoul. Soyeon Yi, Korea's first astronaut Hong Myung-bo, legendary captain of Korea's 2002 FIFA World Cup team. Shin Joong-hyun, the 'Godfather of Korean Rock.' Ko Un, poet. Hong Seok-cheon, restaurateur, and the first Korean celebrity to 'come out.' And many more, including a former advisor to President Park Chung-hee; a Shaman priestess ('mudang'); the boss of Korea's largest matchmaking agency; a 'room salon' hostess; an architect; as well as chefs, musicians, academics, entrepreneurs, homemakers, and chaebol conglomerate employees.

Corporate Social Responsibility in Asia Kyoko Fukukawa 2009-10-29 Corporate Social Responsibility (CSR) is an important issue in contemporary business, management and politics, especially since the launch of the United Nations Global Compact in 2000 as an initiative to encourage businesses worldwide to adopt sustainable and socially responsible policies, and to report on them. This book examines the theory and practice of CSR in Asia. The philosophical and ideological underpinnings of CSR are rooted in Anglo-American and European principles of liberal democratic rights, justice and societal structures. This book not only considers the impact of Western CSR practices in Asia, but also provides much needed Asian perspectives on this issue. It investigates the operation of CSR in different countries across Asia, including China, Japan, Malaysia, Thailand and Bangladesh – comparing the different meanings given to CSR, and the varying degrees of success experienced in different national contexts. This book argues if CSR is ever to revolutionize the manner in which we trade then it is needs to open itself up to the full variety of social responsibility as it occurs around the world. The book re-maps and refines debates about CSR as a global phenomenon, and will be of great value to professionals making strategic decisions in the global business environment.

From Strength to Strength Arthur C. Brooks 2022-03-17 The #1 New York Times Bestseller 'This book is amazing. We've all read it cover to cover. We couldn't put it down.' - Chris Evans From the bestselling author and columnist behind The Atlantic's popular "How to Build a Life" series, a guide to transforming the life changes we fear into a source of strength. In the first half of life, ambitious strivers embrace a simple formula for success in work and life: focus single-mindedly, work tirelessly, sacrifice personally, and climb the ladder relentlessly. It works. Until it doesn't. It turns out the second half of life is governed by different rules. In middle age, many strivers begin to find success coming harder and harder, rewards less satisfying, and family relationships withering. In response, they do what strivers always do: they double down on work in an attempt to outrun decline and weakness, and deny the changes that are becoming more and more obvious. The result is often anger, fear, and disappointment at a time in life that they imagined would be full of joy, fulfillment, and pride. It doesn't have to be that way. In From Strength to Strength, happiness expert and bestselling author Arthur C. Brooks reveals a path to beating the "striver's curse." Drawing on science, classical philosophy, theology, and history, he shares counterintuitive strategies for releasing old habits and forming new life practices, showing you how to: - Kick the habits of workaholism, success addiction, and self-objectification - Meditate on death in order to beat fear and live well - Start a spiritual adventure - Embrace weakness in a way that turns it into strength. Change in your life is inevitable, but suffering is not. From Strength to Strength shows you how to accept the gifts of the second half of life with grace, joy, and ever deepening purpose. **The Archaeological Automobile** Miles C Collier 2021-09-30 Miles C. Collier asks: should we really let go of the vast amounts of collective knowledge that resides in automobiles? If not, how can we hold on to it? ● Archaeology isn't just about digging in grubby trenches. It is a way of thinking about the past and applying our imagination to the future. Miles C. Collier's remarkable analysis applies this thought process to cars. ● Miles C. Collier brings an archaeological point of view to the pithy matter of deciding how we understand and treat our automobiles, and how we pass this knowledge to generations to come. ● This book combines scholarship, pertinent anecdotes, style, and experience to provide a stimulating account of why we should all be archaeologists now.

Sounds like a good idea, doesn't it? Tilt Niraj 2013-10-15 Shift your strategy downstream. Why do your customers buy from you rather than from your competitors? If you think the answer is your superior products, think again. Products are important, of course. For decades, businesses sought competitive advantage almost exclusively in activities related to new product creation. They

won by building bigger factories, by finding cheaper raw materials or labor, or by coming up with more efficient ways to move and store inventory—and by inventing exciting new products that competitors could not replicate. But these sources of competitive advantage are being irreversibly leveled by globalization and technology. Today, competitors can rapidly decipher and deploy the recipe for your product's secret sauce and use it against you. "Upstream," product-related advantages are rapidly eroding. This does not mean that competitive advantage is a thing of the past. Rather, its center has shifted. As marketing professor Niraj Dawar compellingly argues, advantage is now found "downstream," where companies interact with customers in the marketplace. Tilt will help you grasp the global nature of this downstream shift and its profound implications for your strategy and your organization. With vivid examples from around the world, ranging across industries and sectors, Dawar shows how companies are reorienting their strategies around customer interactions to create and capture unique value. And he demonstrates how, unlike product-related advantage, this value is cumulative, continuously building over time. In an increasingly customer-centered world marketplace, let Tilt serve as your guide to shifting your strategy downstream—and achieving enduring competitive advantage.
