Demystifying
Sustainability Haydn

Washington 2015-02-11
What is sustainability?
Much has been said about
the terms
'sustainability' and
'sustainable
development' over the
last few decades, but
they have become buried
under academic jargon.
This book is one of the
first that aims to
demystify sustainability
so that the layperson
can understand the key
issues, questions and
values involved.
Accessible and engaging,
the book examines the
'old' sustainability of
the past and looks to
the future, considering
how economic, ecological
and social
sustainability should be
defined if we are to
solve the entwined
environmental, economic
and social crises. It
considers if meaningful
sustainability is the
same as a 'sustainable
development' based on
endless growth,

examining the difficult but central issues of overpopulation and overconsumption that drive unsustainability. The book also explores the central role played by society's worldview and ethics, along with humanity's most dangerous characteristic – denial. Finally, it looks to the future, discussing the 'appropriate' technology needed for sustainability, and suggesting nine key solutions. This book provides a much-needed comprehensive discussion of what sustainability means for students, policy makers and all those interested in a sustainable future.

Be Who You Want

Christian Jarrett

2021-05-20 'There are enough plums, cherries, raisins and sultanas in this delightful cake to inspire, surprise, motivate and enthuse

anyone. Warmly recommended' - Stephen Fry Today, more than ever, we are aware of the power of personality. Are we introverts, extroverts, neurotic, open-minded? Psychology has always taught that there are personality types, some advantageous, some often seen as less so, and the common perception is that we're stuck with what we're given. The introvert will never break out of their shell, the narcissist will be forever trapped gazing into the mirror (or endlessly tweeting about perceived attacks on their brilliance). *Be Who You Want* argues that contrary to the old adage, not only can the leopard change his spots, he can swap them for stripes, and that he can do so to his own advantage. In psychological terms, although our initial

personality type is moulded by a combination of genetic influences and early experiences, it is not fixed. It's malleable, voluntary even. This book will tell the story of how our personalities are formed and gives us the tools to shape them in the ways which we desire and which will benefit us most. Drawing on the latest psychological theories and methods, interviews with leading experts, as well as personal anecdote, Christian Jarrett shows us that we can shape ourselves in ways that make our lives better. The book provides evidence-based ways to change each of the main five personality traits, including how to become more emotionally stable, extrovert and open-minded. It also delves into the upsides of the so-called Dark Triad of personality traits -

narcissism, Machiavellianism, and psychopathy - and how we might exploit their advantages without ourselves going over to the dark side.

**Hey, Kiddo: A Graphic
Novel** Jarrett J.
Krosoczka 2018-10-09 The
powerful, unforgettable
graphic memoir from
Jarrett Krosoczka, about
growing up with a drug-
addicted mother, a
missing father, and two
unforgettably
opinionated
grandparents. A National
Book Award Finalist! In
kindergarten, Jarrett
Krosoczka's teacher asks
him to draw his family,
with a mommy and a
daddy. But Jarrett's
family is much more
complicated than that.
His mom is an addict, in
and out of rehab, and in
and out of Jarrett's
life. His father is a
mystery -- Jarrett
doesn't know where to
find him, or even what
his name is. Jarrett
lives with his
grandparents -- two very
loud, very loving, very
opinionated people who

had thought they were through with raising children until Jarrett came along. Jarrett goes through his childhood trying to make his non-normal life as normal as possible, finding a way to express himself through drawing even as so little is being said to him about what's going on. Only as a teenager can Jarrett begin to piece together the truth of his family, reckoning with his mother and tracking down his father. Hey, Kiddo is a profoundly important memoir about growing up in a family grappling with addiction, and finding the art that helps you survive.

African American Literature Beyond Race

realism at its core: African American protagonists, social settings, cultural symbols, and racial-political discourse. As a result, writings that are not preoccupied with race have long been invisible—unpublished, out of print, absent from libraries, rarely discussed among scholars, and omitted from anthologies. However, some of our most celebrated African American authors—from Zora Neale Hurston and Richard Wright to James Baldwin and Toni Morrison—have resisted this canonical rule, even at the cost of critical dismissal and commercial failure. *African American Literature Beyond Race* revives this remarkable literary corpus, presenting sixteen short stories, novelettes, and excerpts of novels—from the postbellum

nineteenth century to the late twentieth century—that demonstrate this act of literary defiance. Each selection is paired with an original introduction by one of today's leading scholars of African American literature, including Hazel V. Carby, Gerald Early, Mae G. Henderson, George Hutchinson, Carla Peterson, Amritjit Singh, and Werner Sollors. By casting African Americans in minor roles and marking the protagonists as racially white, neutral, or ambiguous, these works of fiction explore the thematic complexities of human identity, relations, and culture. At the same time, they force us to confront the basic question, "What is African American literature?" Stories by: James Baldwin, Octavia E. Butler, Samuel R.

Guns, Germs, and Steel:
The Fates of Human
Societies (20th
Anniversary Edition)

Jared Diamond 2017-03-07

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and

land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal. **Texas** James Killoran 1997-06 Textbook study of the geography and history of Texas.
