Essays on Spinoza's Ethical Theory Andrew Youpa 2014-04 Thirteen original essays by leading scholars explore aspects of Spinoza's ethical theory and, in doing so, deepen our understanding of the richly rewarding core of his system. Given its importance to his philosophical ambitions, it is surprising that his ethics has, until recently, received relatively little scholarly attention. Anglophone philosophy has tended to focus on Spinoza's contribution to metaphysics and epistemology, while philosophy in continental Europe has tended to show greater interest in his political philosophy. This tendency is problematic not only because it overlooks a central part of Spinoza's project, but also because it threatens to present a distorted picture of his philosophy. Moreover, Spinoza's ethics, like other branches of his philosophy, is complex, difficult, and, at times, paradoxical. The essays in this volume advance our understanding of his ethics and also help us to appreciate it as the centerpiece of his system. In addition to resolving interpretive difficulties and advancing longstanding debates, these essays point the direction for future research. Spinoza's enduring contribution to the development of ethical theory, to early modern philosophy, and indeed to early modern history generally, provide us with good reason to follow the lead of these essays.

Economy and State Nina Bandelj 2013-05-08 Should governments be involved in economic affairs? Challenging prevailing wisdom about the benefits of self-regulating markets, Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy. From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules, the state continuously manages the functioning of markets and influences economic outcomes for individuals, firms and nations. The authors bring together classical interventions and cutting-edge contemporary research in economic sociology to discuss six broad areas of economy/state connection: property, money, labor, firms, national economic growth, and global economic exchange. A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts, it is always dependent on social forces. This accessible and engaging book will be essential reading for upper-level students of economic sociology, and those interested in the major economic dilemmas of our times. .

The Eagle and the Dragon Serge Gruzinski 2014-12-23 In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

Themes in Geographic Thought (Routledge Revivals) Milton E. Harvey 2014-03-18 Themes in Geographic Thought, first published in 1981, explores in breadth and depth the interrelationships among the history of Geography, geographic thought, and methodology, specifically focusing on the interactions between geographical research and various contemporary philosophical schools: positivism, pragmatism, functionalism, phenomenology, existentialism, idealism, realism and Marxism. An attempt is made to synthesise Geography's historically rich tradition with the current diversity in approaches to the discipline, based on the belief that 'geographic thought', at any point in time, is a manifestation of the mutual influence between the prevailing philosophical viewpoints and the major methodological approaches in vogue. Each chapter presents an overview of the concrete ideas of a particular school of philosophy and stresses its relevance and impact on various aspects of Geography.

African American Literature Beyond Race Gene Andrew Jarrett 2006-04-01 It is widely accepted that the canon of African American literature has racial realism at its core: African American protagonists, social settings, cultural symbols, and racial-political discourse. As a result, writings that are not preoccupied with race have long been invisible—unpublished, out of print, absent from libraries, rarely discussed among scholars, and omitted from anthologies. However, some of our most celebrated African American authors—from Zora Neale Hurston and Richard Wright to James Baldwin and Toni Morrison—have resisted this canonical rule, even at the cost of critical dismissal and commercial failure. African American Literature Beyond Race revives this remarkable literary corpus, presenting sixteen short stories, novelettes, and excerpts of novels-from the postbellum nineteenth century to the late twentieth century-that demonstrate this act of literary defiance. Each selection is paired with an original introduction by one of today's leading scholars of African American literature, including Hazel V. Carby, Gerald Early, Mae G. Henderson, George Hutchinson, Carla Peterson, Amritjit Singh, and Werner Sollors. By casting African Americans in minor roles and marking the protagonists as racially white, neutral, or ambiguous, these works of fiction explore the thematic complexities of human identity, relations, and culture. At the same time, they force us to confront the basic question, "What is African American literature?" Stories by: James Baldwin, Octavia E. Butler, Samuel R. Delany, Paul Laurence Dunbar, Frances Ellen Watkins Harper, Chester B. Himes, Zora Neale Hurston, Nella Larsen, Toni Morrison, Ann Petry, Wallace Thurman, Jean Toomer, Frank J. Webb, Richard Wright, and Frank Yerby. Critical Introductions by: Hazel V. Carby, John Charles, Gerald Early, Hazel Arnett Ervin, Matthew Guterl, Mae G. Henderson, George B. Hutchinson, Gene

Jarrett, Carla L. Peterson, Amritjit Singh, Werner Sollors, and Jeffrey Allen Tucker.

Be Who You Want Christian Jarrett 2021-05-20 'There are enough plums, cherries, raisins and sultanas in this delightful cake to inspire, surprise, motivate and enthuse anyone. Warmly recommended' - Stephen Fry Today, more than ever, we are aware of the power of personality. Are we introverts, extroverts, neurotic, open-minded? Psychology has always taught that there are personality types, some advantageous, some often seen as less so, and the common perception is that we're stuck with what we're given. The introvert will never break out of their shell, the narcissist will be forever trapped gazing into the mirror (or endlessly tweeting about perceived attacks on their brilliance). Be Who You Want argues that contrary to the old adage, not only can the leopard change his spots, he can swap them for stripes, and that he can do so to his own advantage. In psychological terms, although our initial personality type is moulded by a combination of genetic influences and early experiences, it is not fixed. It's malleable, voluntary even. This book will tell the story of how our personalities are formed and gives us the tools to shape them in the ways which we desire and which will benefit us most. Drawing on the latest psychological theories and methods, interviews with leading experts, as well as personal anecdote, Christian Jarrett shows us that we can shape ourselves in ways that make our lives better. The book provides evidence-based ways to change each of the main five personality traits, including how to become more emotionally stable, extrovert and open-minded. It also delves into the upsides of the so-called Dark Triad of personality traits - narcissism, Machiavellianism, and psychopathy - and how we might exploit their advantages without ourselves going over to the dark side.

Lost Cities Giles Laroche 2020-04-07 Combining world culture, history, geography, and architecture, this visually stunning look at ancient cities around the globe takes readers to such places as the Hanging Gardens of Babylon, the cliff dwellings of Mesa Verde, and the mysterious sculptures of Angkor Wat. Perfect for fans of This Is How We Do It and Atlas Obscura. What would it be like if you lived a thousand years ago? To pass through the Hanging Gardens of Babylon on your way home? Or gaze at the stars from your cave dwelling in Mesa Verde? On mountaintops, deserts, and the banks of rivers, ancient cities that once thrived have become lost to time. But in their ruins, we can find clues of the past and the extraordinary lives their residents lived. All it takes is a simple question: What was life like before? Beautiful illustrations, masterfully crafted from layers of cut paper, ask readers to spend a day in the footsteps of someone from thousands of years ago.

Social Capital Joonmo Son 2020-05-11 Social capital is a principal concept across the social sciences and has readily entered into mainstream discourse. In short, it is popular. However, this popularity has taken its toll. Social capital suffers from a lack of consensus because of the varied ways it is measured, defined, and deployed by different researchers. It has been put to work in ways that stretch and confuse its conceptual value, blurring the lines between networks, trust, civic engagement, and any type of collaborative action. This clear and concise volume presents the diverse theoretical approaches of scholars from Marx, Coleman, and Bourdieu to Putnam, Fukuyama, and Lin, carefully analyzing their commonalities and differences. Joonmo Son categorizes this wealth of work according to whether its focus is on the necessary preconditions for social capital, its structural basis, or its production. He distinguishes between individual and collective social capital (from shared resources of a personal network to pooled assets of a whole society), and interrogates the practical impact social capital has had in various policy areas (from health to economic development). Social Capital will be of immense value to readers across the social sciences and practitioners in relevant fields seeking to understand this mercurial concept.

Remaking Human Geography (RLE Social & Cultural Geography) Audrey Kobayashi 2014-01-23 This book highlights the increasingly important contribution of geographical theory to the understanding of social change, values, economic & political organization and ethical imperatives. As a cohesive collection of chapters from well-known geographers in Britain and North America, it reflects the aims of the contributors in striving to bridge the gap between the historical-materialist and humanist interpretations of human geography. The book deals with both the contemporary issues outlined above and the situation in which they emerge: industrial restructuring, planning, women's issues, social and cultural practices and the landscape as context for social action.

The Emerald Handbook of Crime, Justice and Sustainable Development Jarrett Blaustein 2020-11-18 This volume brings together a diverse collection of essays that critically examine issues relating to crime and justice in the United Nations 2030 Agenda for Sustainable Development. Chapters examine the issues that practitioners face in working to advance this agenda and the possibilities that exist to advance sustainable development outcomes.
