7 1□2 Christos Tsiolkas 2022-02-03 A man arrives at a house on the coast to write a book. Separated from his lover and family and friends, he finds the solitude he craves in the pyrotechnic beauty of nature, just as the world he has shut out is experiencing a cataclysmic shift. The preoccupations that have galvanised him and his work fall away and he becomes lost in memory and beauty. He begins to tell us a story ... A retired porn star who is made an offer he can't refuse for the sake of his family and future. So he returns to the world he fled years before, all too aware of the danger of opening the door to past temptations and long-buried desires. Can he resist the oblivion and bliss they promise? A breathtakingly audacious novel by the acclaimed author of *The Slap* and *Damascus* about finding joy and beauty in a raging and punitive world, about the refractions of memory and time and, most subversive of all, the mystery of art and its creation.

When Bad Thinking Happens to Good

People Steven Nadler 2021-08-31 "In this book the philosophers Steve Nadler and Lawrence Shapiro will explain why bad thinking happens to good people. Why is it, they ask, that so large a segment of public can go so wrong in both how they come to form the opinions they do and how they fail to appreciate the moral consequences of acting on them."-- Publisher's description.

Last Letter to a Reader Gerald Murnane 2021-11-01 Final work by internationally acclaimed Australian author Gerald Murnane, reflecting on his career as a writer, and the fifteen books which have led critics to praise him as 'a genius on the level of Beckett'. A book which will appeal equally to Murnane's legion of fans, and to those new to his work, attracted by his reputation as a truly original Australian writer. In the first days of spring in his eighty-second year, Gerald Murnane began a project which would round off his career as a writer – he would read all of his books in turn and prepare a report on each. His original intention was to lodge the reports in two of his legendary

archives, the Chronological Archive, which documents his life as a whole, and the Literary Archive, which is devoted to everything he has written. But as the reports grew, they themselves took on the form of a book, *Last Letter to a Reader*. The essays on each of his works travel through the capacious territory Murnane refers to as his mind: they dwell on the circumstances which gave rise to the writing, images, associations, reflections on the theory of fiction, and memories of a deeply personal kind. The final essay is on *Last Letter to a Reader* itself: it considers the elation and exhilaration which accompany the act of writing, and offers a moving ending to what must surely be his last work as death approaches. 'Help me, dear one, to endure patiently my going back to my own sort of heaven.' 'No living Australian writer, not even Les Murray, has higher claims to permanence or a richer sense of distinction' – Sydney Morning Herald 'The emotional conviction...is so intense, the somber lyricism so moving, the intelligence behind the chiseled sentences so undeniable, that we suspend all disbelief.' – J.M. Coetzee

The Mother Wound Amani Haydar
2021-06-29 'A magnificent and devastating work of art. There is a raging anger here, and a deep sorrow, but at the core Haydar gives us truths about love. This is one of the most important books I've ever read.' Bri Lee 'I am from a family of strong women.' Amani Haydar suffered the unimaginable when she lost her mother in a brutal act of domestic violence perpetrated by her father. Five months pregnant at the time, her own perception of how she wanted to mother (and how she had been mothered) was shaped by this devastating murder. After her mother's death, Amani began reassessing everything she knew of her parents' relationship. They had been unhappy for so long - should she have known that it would end like this? A lawyer by profession, she also saw the holes in the justice system for addressing and combating emotional abuse and coercive control. Amani also had to reckon with the weight of familial and cultural context. Her parents were brought together in an arranged marriage, her mother thirteen years her father's junior. Her grandmother was brutally killed in the 2006 war in Lebanon, adding complex layers of intergenerational trauma. Writing with grace and beauty, Amani has drawn from this a story of female resilience and the role of motherhood in the home and in the world. In *The Mother Wound*, she uses her own strength to help other survivors find their voices. Diesel Engine - Combustion, Emissions and Condition Monitoring Thanh Phuc Van 2017-04-01 "Diesel engines, also known as CI engines, possess a wide field of applications as energy converters because of their higher efficiency. However, diesel engines are a major source of NOX and particulate matter (PM) emissions. Like a gasoline engine, a diesel engine is a type of internal combustion engine. Combustion is

another word for burning, and internal means inside, so an internal combustion engine is simply one where the fuel is burned inside the main part of the engine (the cylinders) where power is produced. That's very different from an external combustion engine such as those used by old-fashioned steam locomotives. The diesel engine has the highest thermal efficiency (engine efficiency) of any practical internal or external combustion engine due to its very high expansion ratio and inherent lean burn which enables heat dissipation by the excess air. A small efficiency loss is also avoided compared to two-stroke non-direct-injection gasoline engines since unburnt fuel is not present at valve overlap and therefore no fuel goes directly from the intake/injection to the exhaust. Low-speed diesel engines (as used in ships and other applications where overall engine weight is relatively unimportant) can have a thermal efficiency that exceeds 50%. We are currently experiencing an oil crisis world-wide. Gaseous fuels like natural gas, pure hydrogen gas, biomass-based and coke-based syngas can be considered as alternative fuels for diesel engines. Diesel Engine - Combustion, Emissions and Condition Monitoring describes combustion and exhaust emissions features. Reliable early detection of malfunction and failure of any parts in diesel engines can save the engine from failing completely and protect high repair cost. Tools are discussed in this book to discover common failure approaches of diesel engine that can identify early signs of failure."

2021-08-03 Why would a wombat be registered for war? It's 1965, and an old Tattersalls barrel starts rolling marbles to randomly conscript young Australian men to fight in the war in

Vietnam. Melbourne housewife Jean McLean is outraged, as are her artist friends Clif and Marlene Pugh, who live in the country with their wombat, Hooper. Determined to wreck the system, Jean forms the Save Our Sons movement's Victorian branch, and she and her supporters take to the streets to protest. Meanwhile, in the small country town of Katunga, Bill Cantwell joins the Australian Army, and in Saigon, young Mai Ho is writing letters to South Vietnamese soldiers from her school desk. And when Hooper's call-up papers arrive, he mysteriously goes underground... As these stories intersect in unexpected ways and destinies entwine, a new world gradually emerges - a world in which bridges of understanding make more sense than war. This stunning graphic novel, full of empathy, courage and resistance, is based on true events. 'Every drawing reflects a Vietnamese history era in which I grew up and witnessed the war. I cannot thank you enough for this memory.' MAI HO 'I wish I had this growing up. It's incredibly informative. Stories like this are severely lacking, and for an Australian audience, I think it will be revelatory.' MATT HUYNH

Internal Combustion Engines Institution of Mechanical Engineers 2014-10-10 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the
