**Financial Accounting** John J. Wild 2002-03 This is the only textbook in the financial accounting market that focuses on the innovation and excitement of entrepreneurs and small businesses. Nearly all financial accounting texts cover only big corporations, an approach which fails to relate to many students' career paths or goals, or to deal with the realities of today's business world. In order to motivate students and help them learn to make business decisions, the text also includes many teaching elements, extending into a Decision Centre which emphasizes

the use of accounting information in business decision making. The book focuses early on business and technology, offering students and faculty a modern, dynamic and relevant presentation of accounting. There is also extensive coverage of real-world, corporate financial statements throughout. - Beyond the Numbers end-of-chapter problems reinforce critical-thinking skills and decision making with real company examples and Internet references. - Quick Checks throughout the chapter reinforce the material just covered. They allow the reader to pause and reflect on the topics and give immediate feedback on the reader's understanding before moving on by providing answers at

**Financial Accounting** Patricia Libby 2010-09-03 Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

**Financial and Managerial Accounting** Jan R. Williams 2020 "As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm grasp of concepts like the accounting cycle and managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for future success in business. However, through new coverage of International Financial Reporting Standards and a revised globalization chapter, the Williams book also introduces students to larger themes and evolving concerns. This dual emphasis allows students to keep their eyes trained upward even as they become solidly grounded in accounting fundamentals"--
