Schaum's Outline of Theory and Problems of Physics for Engineering and Science Michael Browne 1999 This book will save you time as you master the basics taught in first-year, calculus-based college physics courses. You'll firmly grasp the all-important building blocks needed for every physical science and all branches of engineering. The many problems included with guided solutions make this potentially daunting subject much easier. Additional problems with answers give you a chance to reinforce what you've learned and gauge your progress as you go. This next-best thing to a private tutor makes especially clear the topics most students find most difficult. It's ideal for independent study, brushup before an exam, or preparation for the MED-CAT and GRE.

CRC Handbook of Management of Radiation Protection Programs, Second Edition Kenneth L. Miller 2020-08-11 CRC Handbook of Management of Radiation Protection Programs, 2nd Edition, is unique in that it offers practical guidance for managing various aspects of radiation protection programs ranging from the daily operation of a health physics office to the preparation of radiation experts for court appearances as professional witnesses. The book also covers such topics as organization and management of nonionizing radiation safety programs (with special emphasis on laser safety programs) and management of radioactive waste, personnel monitoring programs, radiation accident victims, internal exposure, relative radiotoxicity and radiation therapy patients. Other chapters discuss handling radiation accidents and education and training requirements for radiation protection. Legal aspects covered in the book include the history of radiation court cases, legal implications of record keeping, and preparation for court appearances. CRC Handbook of Management of Radiation Protection Programs, 2nd Edition will be a valuable reference resource for medical and health physicists, industrial hygienists, physicians, nuclear engineers, radiation protection regulators, radiation emergency management agents, radiation safety committees, and managers of facilities using ionizing and nonionizing radiation sources.
