**Hybrid, Electric, and Fuel-Cell Vehicles** Jack Erjavec  
2012-06-06 HYBRID, ELECTRIC AND FUEL-CELL VEHICLES,  
Second Edition, covers the cutting-edge technology and  
technology that are revolutionizing today's automotive  
industry. Author Jack Erjavec combines in-depth industry  
expertise with an engaging, reader-friendly style,  
providing extensive detail on new and upcoming electric  
vehicles, including hybrids in production today and the  
fuel cell vehicles of tomorrow. Expansive coverage  
ranges from basic theory related to vehicle  
construction, electricity, batteries, and motors, to the  
political and social impact of these high-profile  
vehicles. In addition to up-to-date, highly accurate  
technical information on vehicles available  
today—including service procedures and safe shop  
practices—the text provides an informed look into the  
future with material on vehicles currently under  
development. Important Notice: Media content referenced

comprehensive guide to highway diesel engines and their  
management systems available today! Ideal for students,  
entry-level technicians, and experienced professionals,  
MEDIUM/HEAVY DUTY TRUCK ENGINES, FUEL & COMPUTERIZED  
MANAGEMENT SYSTEMS, Fifth Edition, covers the full range  
of commercial vehicle diesel engines, from light- to  
heavy-duty, as well as the most current management  
electronics used in the industry. In addition, dedicated  
chapters deal with natural gas (NG) fuel systems (CNG  
and LPG), alternate fuels, and hybrid drive systems. The  
book addresses the latest ASE Education Foundation  
tasks, provides a unique emphasis on the modern  
multiplexed chassis, and will serve as a valuable  
toolbox reference throughout your career. Important

*Plunkett's Engineering & Research Industry Almanac 2007*

Jack W. Plunkett 2007-05 This reference book is a complete guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development. We have included companies that are making significant investments in research and development via as many disciplines as possible, whether that research is being funded by internal investment, by fees received from clients or by fees collected from government agencies. In this carefully-researched volume, you'll get all of the data you need on the American Engineering & Research Industry, including: engineering market analysis, complete industry basics, trends, research trends, patents, intellectual property, funding, research and development data, growth companies, investments, emerging technologies, CAD, CAE, CAM, and more. The book also contains major statistical tables covering everything from total U.S. R&D expenditures to the total number of scientists working in various disciplines, to amount of U.S. government grants for research. In addition, you'll get expertly written profiles of nearly 400 top Engineering and Research firms - the largest, most successful corporations in all facets of Engineering and Research, all cross-indexed by location, size and type of business. These corporate

profiles include contact names, addresses, Internet addresses, fax numbers, toll-free numbers, plus growth and hiring plans, finances, research, marketing, technology, acquisitions and much more. This book will put the entire Engineering and Research industry in your hands. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

**Digital Entrepreneurship** Mariusz Soltanifar 2020-11-13

This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. "Digitalization mirrors the Industrial Revolution's impact. This book provides a complement of perspectives on the opportunities

emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work." Gina O'Connor, Professor of Innovation Management at Babson College, USA "This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique "must-read" book because it goes beyond theory and provides practical examples." Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures." Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany

**Plunkett's Automobile Industry Almanac 2008** Jack W. Plunkett 2007-10 The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet

to become better informed before making a purchase. Online sites like Autobyte steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

### **Heavy Vehicle Event Data Recorder Interpretation**

Christopher D Armstrong 2018-11-02 The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of

photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

**Internationaler Motorenkongress 2016** Johannes Liebl  
2016-04-08 Wer die gesamte "Well-to-Wheel"-Kette betrachtet, stellt schnell fest: Der Verbrennungsmotor und seine Kraftstoffe sind auch heute nicht wegzudenken, wenn es gilt, Pkw und Nutzfahrzeuge anzutreiben. Die Erkenntnis, dass die Elektrifizierung der Fahrzeugantriebe sich nur evolutionär entwickeln kann, sichert dem Verbrennungsmotor weiterhin die Position als Schrittmacher in eine Mobilität mit geringen Schadstoffemissionen. So gilt es, vom Dreizylinder-Pkw- bis zum Achtzylinder-Nfz-Motor, neben

verschiedenen technologischen Optimierungsmöglichkeiten, weitere verborgene Potenzial in den Bereichen Mechanik Ladungswechsel, Verbrennung, Abgasnachbehandlung und Wärmemanagement zu heben. Vor dem Hintergrund dieser Entwicklungsaufgaben veranstalten ATZlive und das VDI Wissensforum zum dritten Mal gemeinsam den Internationalen Motorenkongress.

**Ferrari** John Lamm, Chuck Queener No other cars embody automotive passion better than those produced by Ferrari. From the record-setting Formula One race cars produced by Scuderia Ferrari to the exquisite road cars created in Maranello, Italy, Ferrari has produced some of the most sensuous vehicles ever created. Exquisitely illustrated, Ferrari: Stories from Those Who Lived the Legend tells the complete story of a car like no other. Sixty years after Ferrari blazed onto the scene, this big book takes us back to the world where the car was created. Master photographer and automotive writer John Lamm tells the Ferrari story through the words of the people who made the history. In extensive interviews with those who lived the story of Ferrari, from its founding days right up to our own, Lamm gives us a thrilling, behind-the-scenes look at how automotive history was made. Virtually an oral history of the world's most iconic sports car, Ferrari: Stories from Those Who Lived the Legend is also a treasury of historic and detailed modern images--what any reader lucky enough to open it up might expect--a hell of a ride. Chapters include: The 1940s Ferrari in the 1940s The 1950s Production Cars Robert M. **The Atlantic Forest** Marcia C. M. Marques 2021-01-13 The  
Atlantic Forest is one of the 36 hotspots for  
biodiversity conservation worldwide. It is a unique,  
large biome (more than 3000 km in latitude; 2500 in

longitude), marked by high biodiversity, high degree of endemic species and, at the same time, extremely threatened. Approximately 70% of the Brazilian population lives in the area of this biome, which makes the conflict between biodiversity conservation and the sustainability of the human population a relevant issue. This book aims to cover: 1) the historical characterization and geographic variation of the biome; 2) the distribution of the diversity of some relevant taxa; 3) the main threats to biodiversity, and 4) possible opportunities to ensure the biodiversity conservation, and the economic and social sustainability. Also, it is hoped that this book can be useful for those involved in the development of public policies aimed at the conservation of this important global biome.

**Catalytic and Process Study of the Selective Hydrogenation of Acetylene and 1,3-Butadiene** Ruijun Hou 2017-01-05 This thesis offers novel methods for catalyst and process design for the selective hydrogenation of acetylene and 1,3-butadiene. The author predicts the properties of supported Pd-Ni bimetallic catalysts using density functional theory (DFT) calculations and temperature-programmed desorption (TPD). The excellent correlation between model surfaces and supported catalysts demonstrates the feasibility of designing effective bimetallic catalysts for selective hydrogenation reactions. The author also proposes a method for designing non-precious metal catalysts to replace precious metals. She modifies the process of selective hydrogenation of acetylene by coupling the selective adsorption to the selective hydrogenation in the liquid phase, as a result of which the ethylene selectivity is greatly improved and heat transfer is

greatly enhanced. Lastly, by analyzing the mechanism of liquid-phase hydrogenation, the author proposes a multi-stage slurry bed reactor for industrial applications."/p>

**Exhausts** Isabella Nova 2014-03-14 Urea-SCR Technology for deNOx After Treatment of Diesel Exhausts presents a complete overview of the selective catalytic reduction of NOx by ammonia/urea. The book starts with an illustration of the technology in the framework of the current context (legislation, market, system configurations), covers the fundamental aspects of the SCR process (catalysts, chemistry, mechanism, kinetics) and analyzes its application to useful topics such as modeling of full scale monolith catalysts, control aspects, ammonia injections systems and integration with other devices for combined removal of pollutants.
