gesamte "Well-to-Wheel"-Kette betrachtet, stellt schnell fest: Der

Verbrennungsmotor und seine Kraftstoffe sind auch heute nicht

wegzudenken, wenn es gilt, Pkw und Nutzfahrzeuge anzutreiben. Die

Erkenntnis, dass die Elektrifizierung der Fahrzeugantriebe sich nur

evolutionär entwickeln kann, sichert dem Verbrennungsmotor weiterhin die

Pole-Position als Schrittmacher in eine Mobilität mit geringen

Schadstoffemissionen. So gilt es, vom Dreizylinder-Pkw- bis zum

Achtzylinder-Nfz-Motor, neben verschiedenen technologischen

Optimierungsmöglichkeiten, weitere verborgene Potenzial in den Bereichen

Mechanik Ladungswechsel, Verbrennung, Abgasnachbehandlung und

Wärmemanagement zu heben. Vor dem Hintergrund dieser

Heavy Vehicle Event Data Recorder Interpretation Christopher D

Armstrong 2018-11-02 The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash

analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

The Atlantic Forest Marcia C. M. Marques 2021-01-13 The Atlantic Forest is one of the 36 hotspots for biodiversity conservation worldwide. It is a unique, large biome (more than 3000 km in latitude; 2500 in longitude), marked by high biodiversity, high degree of endemic species and, at the same time, extremely threatened. Approximately 70% of the Brazilian population lives in the area of this biome, which makes the conflict between biodiversity conservation and the sustainability of the human population a relevant issue. This book aims to cover: 1) the historical characterization and geographic variation of the biome; 2) the distribution of the diversity of some relevant taxa; 3) the main threats to biodiversity, and 4) possible opportunities to ensure the biodiversity conservation, and the economic and social sustainability. Also, it is hoped that this book can be useful for those involved in the development of public policies aimed at the conservation of this important global biome.

Catalytic and Process Study of the Selective Hydrogenation of Acetylene

and 1,3-Butadiene Ruijun Hou 2017-01-05 This thesis offers novel methods for catalyst and process design for the selective hydrogenation of acetylene and 1,3-butadiene. The author predicts the properties of supported Pd–Ni bimetallic catalysts using density functional theory (DFT) calculations and temperature-programmed desorption (TPD). The excellent correlation between model surfaces and supported catalysts demonstrates the feasibility of designing effective bimetallic catalysts for selective hydrogenation reactions. The author also proposes a method for designing non-precious metal catalysts to replace precious metals. She modifies the process of selective hydrogenation of acetylene by coupling the selective adsorption to the selective hydrogenation in the liquid phase, as a result of which the ethylene selectivity is greatly improved and heat transfer is greatly enhanced. Lastly, by analyzing the mechanism of liquid-phase hydrogenation, the author proposes a multi-stage slurry bed reactor for industrial applications.
