Urban Socio-Economic Segregation and Income Inequality Maarten van Ham 2021-03-29 This open access book investigates the link between income inequality and socio-economic residential segregation in 24 large urban regions in Africa, Asia, Australia, Europe, North America, and South America. It offers a unique global overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation, and proposes a Global Segregation Thesis. Rising inequalities lead to rising levels of socio-economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries, but the growth in inequality and segregation is faster in cities in high-income countries. This is causing convergence of segregation trends.

Professionalisation of the workforce is leading to changing residential patterns. High-income workers are moving to city centres or to attractive coastal areas and gated communities, while poverty is increasingly suburbanising. As a result, the urban geography of inequality changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities, as cities are no longer places of opportunities for all.

The Scout Shirish Thorat 2019-01-10 The Scout traces the journey of David Headley, son of a Pakistani aristocrat and an American mother who easily straddled both the Islamic and the western worlds. It is a tale of deception and deceit, of audacity and ingenuity and a detailed account of a man who coldly and systematically conducted a series of reconnaissance missions that perfected the most vicious and daring assault ever on the city of Mumbai. Investigated by two professionals in the field of anti terrorist operations, the Scout is a painstakingly researched and authentic account of the life and times of David Headley right until the time of his arrest whilst collaborating with the Al Qaeda and planning a public massacre in Denmark. The book includes heretofore unknown documents, emails and pictures and exclusive details which offer fascinating reading to everyone from the common man to law enforcement and intelligence officials worldwide.

Design of Intelligent Applications using Machine Learning and Deep Learning Techniques

Ramchandra Sharad Mangrulkar 2021-08-15 Machine learning (ML) and deep learning (DL) algorithms are invaluable resources for Industry 4.0 and allied areas and are considered as the future of computing. A subfield called neural networks, to recognize and understand patterns in data, helps a machine carry out tasks in a manner similar to humans. The intelligent models developed using ML and DL are effectively designed and are fully investigated – bringing in practical applications in many fields such as health care, agriculture and security. These algorithms can only be successfully applied in the context of data computing and analysis. Today, ML and DL have created conditions for potential developments in detection and prediction. Apart from these domains, ML and DL are found useful in analysing the social behaviour of humans. With the advancements in the amount and type of data available for use, it became necessary to build a means to process the data and that is where deep neural networks prove their importance. These networks are capable of handling a large amount of data in such fields as finance and images. This book also

exploits key applications in Industry 4.0 including: · Fundamental models, issues and challenges in ML and DL. · Comprehensive analyses and probabilistic approaches for ML and DL. · Various applications in healthcare predictions such as mental health, cancer, thyroid disease, lifestyle disease and cardiac arrhythmia. · Industry 4.0 applications such as facial recognition, feather classification, water stress prediction, deforestation control, tourism and social networking. · Security aspects of Industry 4.0 applications suggest remedial actions against possible attacks and prediction of associated risks. - Information is presented in an accessible way for students, researchers and scientists, business innovators and entrepreneurs, sustainable assessment and management professionals. This book equips readers with a knowledge of data analytics, ML and DL techniques for applications defined under the umbrella of Industry 4.0. This book offers comprehensive coverage, promising ideas and outstanding research contributions, supporting further development of ML and DL approaches by applying intelligence in various applications. **UPSC CIVIL SERVICES Preliminary Exam-2020 25 YEARS Topic-Wise Solved Papers 1995-2019 General Studies Paper-I-Competitive Exam Book 2021** Team Prabhat 2021-01-01 UPSC CIVIL SERVICES PRELIMINARY EXAM-2020. 25 YEARS TOPIC-WISE SOLVED PAPERS 1995 2019 GENERAL STUDIES PAPER-I with Complete Answers & Explanations COVERS: • Important Information & Instructions for IAS Exam • Complete • Plan & Schemes of Examinations (Prelims & Main) • New Syllabus for Prelims & Main (GS) • Tips & Strategies for Civil Services Exams Preparation • Trend Analysis: Cut-off Marks- Year & Category-wise (PT & Main) • Trend Analysis: Questions asked - Subject-wise & Year-wise • Sources for Prelims & Main Exams Preparation 29 YEARS IAS ESSAY PAPERS SECTION-WISE+ 350* PROBABLE ESSAY TOPICS

Blockchain Technologies and Applications for Digital Governance Nijalingappa, Pradeep 2021-11-05 Since its inception, blockchain has evolved to become a crucial trending technology that massively impacts the fast-paced digital world. It has been a game-changing technology that is underpinned with cryptocurrencies like Ethereum and Bitcoin that eventually closed the doors for hacking activities. As blockchain is utilized across areas such as banking, voting, finance, healthcare, and manufacturing, it is important to examine the current trends, difficulties, opportunities, and future directions in order to utilize its full potential. Blockchain Technologies and Applications for Digital Governance addresses the impacts and future trends of blockchain, particularly for digital governance, and demonstrates the applications of blockchain in digital governance using case studies. Covering a range of topics from cybersecurity to real estate tokenization, it is ideal for industry professionals, researchers, academicians, instructors, practitioners, and students.

Introduction to Information Retrieval Christopher D. Manning 2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make

teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

[A BETTER INDIA A BETTER WORLD](#) N R Narayana Murthy 2010-03-08 Visit the website for A Better India; A Better World; here. With one of the highest GDP growth rates in the world and an array of recent achievements in technology; industry and entrepreneurship; India strides confidently towards the future. But; in the world's largest democracy; not everyone is equally fortunate. More than 300 million Indians are still prey to hunger; illiteracy and disease; and 51 per cent of India's children are still undernourished. What will it take for India to bridge this great divide? When will the fruits of development reach the poorest of the poor; and wipe the tears from the eyes of every man; woman and child; as Mahatma Gandhi had dreamt? And how should this; our greatest challenge ever; be negotiated? In this extraordinarily inspiring and visionary book; N.R. Narayana Murthy; who pioneered; designed and executed the Global Delivery Model that has become the cornerstone of India's success in information technology services outsourcing; shows us that a society working for the greatest welfare of the greatest number—samasta jananam sukhino bhavantu—must focus on two simple things: values and good leadership. Drawing on the remarkable Infosys story and the lessons learnt from the two decades of post-reform India; Narayana Murthy lays down the ground rules that must be followed if future generations are to inherit a truly progressive nation. Built on Narayana Murthy's lectures delivered around the world; A Better India: A Better World is a manifesto for the youth; the architects of the future; and a compelling argument for why a better India holds the key to a better world.

Yugantar: The Dream of Bharatavarsha Takes Shape 2300 Years Ago Raghavan Srinivasan 2020-11-25 The fourth century BCE is full of dangers and opportunities. Old republics are giving way to empires and cities. 'Naastik' sects are challenging the established varna system. The intellectual life of India is bristling like new shoots after the monsoon. The domination of the Kshatriyas and the Brahmanas is being challenged. State power is up for grabs. And the Macedonians are at the gates! Most people believe that Bharatavarsha is only a dream. But not the Yugantar, a brotherhood of the wisest and most selfless thinkers of ancient India. Interesting turn of events bring ordinary people from different parts of the subcontinent into the fold of the Yugantar -- a rebel blacksmith from Ujjayini, a Siddha doctor from Madurai; a doughty mariner from Muziris; a trader from Pataliputra and a widow nun from Kaushambi. They represent a microcosm of the sub-continent. Each of them is drawn towards the Yugantar by a strange turn of events. Each has a prowess which the Yugantar can mould into a formidable force. They converge in Takshashila, the centre of learning and transformation. This is the story of how their wit and determination contribute to a united Bharatavarsha.

Issues in Urban Development Dr. R. N. Sharma 2001 "The genesis if Navi Mumbai in 1970 was a result of the much felt need by the Maharashtra government to develop a new metro-centre as a counter maganet to the

mega city - Bombay (now Mumbai). Since three decades had elapsed, it was considered pertinent to put together different perspectives on the evolution of Navi Mumbai. For this purpose, distinguished planners, administrators and academics--directly or indirectly associated with the project--assembled at a seminar organised by the Tata Institute of Social Sciences, Mumbai in 1999. The book, which is an outcome of the seminar, is invaluable for all those interested in urban planning, urban sociology and economy of developed human settlements. It provides valuable data on various socio-economic and planning aspects involved in shaping of the new city."

Seven Social Sins J.S. Rajput 2012-11-10 This book has been prepared with great expectations. The relevance of dynamism in Gandhian thought, percept and vision could guide the concerned citizens and policy makers in the search for solutions. Each of the seven sins identified gets organically linked to the remaining six. Hopefully, it would provide sparks for further study and analysis of how the ideology of progress that India deserves could evolve, taking the best from outside but retaining the flavour of the indigenous thought and wisdom. Indian democracy, with all its lacunae and inadequacies, has certainly made aware a large chunk of its citizens of their responsibilities and duties. The young are now alert to their own role that the country expects them to perform. The idealism of the youth, strengthened with inputs from Gandhian thought and approach, could be sustained on a strong base of value development strategies. An emerging knowledge society must derive strength from its existing cognitive capital and its analysis and contemporary relevance could always bring in substantial additions and advancements. Those, to whom this volume could reach, may be better prepared to contribute effectively to the cause of the nation building.
