Continuity and Differentiability 31.12.08 - NCERT

150 MATHEMATICS Solution The function is defined at $x = 0$ and its value at $x = 0$ is 1. When $x \neq 0$, the function is given by a polynomial. Hence, $\lim_{x \rightarrow 0} f(x) = 3$ Since the limit of f at $x = 0$ does not coincide with $f(0)$, the function is not continuous at $x = 0$. It may be noted that $x = 0$ is the only point of discontinuity for this function.
