preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Twelve Years a Slave Solomon Northup
2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The Darkroom Cookbook Steve Anchell
2012-09-10 The art of darkroom developing and printing will never go out of style. Master darkroom specialist Steve Anchell is back to prove it in this long-awaited third edition of his enormously successful Darkroom Cookbook. Packed with over

200 "recipes," some common and others rare gems, you'll discover something new every time you open this guide, whether you're new to the darkroom or have been making your own prints for years. In addition to the formulas, you'll find tons of useful information on developers, push-processing, where to get darkroom equipment, how to set up your own darkroom, how to work and play in your darkroom safely, and much more. This handy guide will become a constant companion for every darkroom enthusiast creating prints at home or in the studio. In addition to complete updates throughout to reflect changes in the availability of chemicals and equipment, this third edition contains all new information on: *Reversal processing *Enlarged negatives *Pyro formulas *Plus expanded sections on printing, pyro, and toning prints Also included for the first time are special technique contributions as well as

stunning black and white imagery by Bruce Barnbaum, Rod Dresser, Jay Dusard, Patrick Gainer, Richard Garrod, Henry Gilpin, Gordon Hutchings, Sandy King, Les McLean, Saïd Nuseibeh, France Scully Osterman, Mark Osterman, Tim Rudman, Ryuijie, John Sexton, and John Wimberly. Be sure to visit www.darkroomcookbook.com to find useful links, an interactive user forum, and more! Steve Anchell is a photographer and author of The Variable Contrast Printing Manual, and co-author of The Film Developing Cookbook. He has been teaching darkroom and photography workshops since 1979. Steve is a member of the Freestyle Advisory Board of Photographic Professionals. "With its unrivalled collection of photographic formulae and easy to understand explanations of photographic processes, The Darkroom Cookbook has long been a favorite with darkroom workers everywhere. Now, with further

additions to its formulary, more topics, and contributions by renowned darkroom experts, this new edition promises to be an indispensable Aladdin's Cave resource to darkroom enthusiasts of all levels. -Tim Rudman, photographer and author "The Darkroom Cookbook is an essential compendium of photographic information for anyone interested in high-quality darkroom work. -John Sexton, photographer

Escaping Utopia Janja Lalich
2017-09-01 Actors Michelle Pfeiffer, Glenn Close, Rose McGowan and Leah Remini. Humorist Garrison Keillor. Musician Lisa Marie Presley. WikiLeaks founder Julian Assange. Each of these well-know people has more than fame in common; each was born or raised in a cult. We think of cults as bizarre, inexplicable, or otherworldly places that only strange people inhabit, but cults and other abusive and high-demand groups (and relationships) are actually quite

commonplace. In fact, the behaviors, social pressures, and authoritarian structures that create cults exist to a greater or lesser extent in every human relationship and every human group. Cult behavior is human behavior - and by studying cults, we can learn remarkably useful things about the social world and our place in it In the first in-depth research of its kind, sociologist and cult expert Janja Lalich interviewed sixty-five people who were born in or grew up in thirty-nine different cultic groups spanning more than a dozen countries. What's especially interesting about these individuals is that they each left the cult on their own, without outside help or internal support. In Escaping Utopia: Growing Up in a Cult, Getting Out, and Starting Over, Lalich and award-winning author (and fellow cult survivor) Karla McLaren craft Lalich's original and groundbreaking research into an accessible and

engaging book, the first of its kind focusing on this particular population. Lalich and McLaren explore fundamental questions about human nature, human development, group dynamics, abuse and control, and triumphs of the human spirit in the face of intense and extended suffering.

Montessori Madness Trevor Eissler 2009 "We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. *Montessori Madness!* explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--

at a Montessori school. Your picture of what educations should look like will never be the same"--Back cover.

Autism Florica Stone 2004 Stone shows how shared meanings can be learnt and expressed between autistic and non-autistic individuals, though they experience different perceptions of reality. She presents ways of creating autistic-friendly environments, modifying traditional responses to autistic behaviour and using literal learning, providing useful examples and exercises.

Mobile Web 2.0 Syed A. Ahson

2010-12-07 From basic concepts to research grade material, *Mobile Web*

2.0: Developing and Delivering Services to Mobile Devices provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges, the text details a conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an

Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices.

Cliff Richard Steve Turner 2009-08

Cliff Richard has been Britain's longest surviving and most consistent

hit music maker. Starting his career as a rock 'n' roll threat to decent, upstanding citizens, he is now a friend to Royalty and prime ministers, a Knight, and a holder of the OBE. This book tells his story chronologically, through the voices of his friends, family, and colleagues including songwriters, film directors, managers, and agents—like listening in on a dinner party attended by most of the key people in his career. The stories reveal Cliff as seen by those closest to him and, in contrast to the many official publications, this book does not just include the flattering stories. The author's probing questions have elicited extraordinary memories and observations, previously unheard by the public. Heavily illustrated with rare and interesting photographs of Cliff at work and play, this unique oral history will stand as a lasting testament to one of the most glorious careers in

British show business.

Operator Handbook Joshua Picolet
2020-03-18 The Operator Handbook takes three disciplines (Red Team, OSINT, Blue Team) and combines them into one complete reference guide. The book contains 123 individual cheat sheet references for many of the most frequently used tools and techniques by practitioners. Over 400 pages of content to assist the most seasoned cybersecurity veteran or someone just getting started in the career field. The goal of combining all disciplines into one book was to remove the artificial barriers that only certain knowledge exists within a "Team". The reality is today's complex digital landscape demands some level of knowledge in all areas. The "Operator" culture should mean a well-rounded team member no matter the "Team" you represent. All cybersecurity practitioners are Operators. The Blue Team should observe and understand Red Team

tactics, Red Team should continually push collaboration with the Blue Team, and OSINT should continually work to peel back evidence of evil doers scattered across disparate data sources. In the spirit of having no separation, each reference is listed in alphabetical order. Not only does this remove those team separated notions, but it also aids in faster lookup. We've all had the same experience where we knew there was an "NMAP Cheat Sheet" but did it fall under Networking, Windows, or Tools? In the Operator Handbook it begins with "N" so flip to the N's section. Also almost every topic is covered in "How to exploit X" and "How to defend X" perspectives. Tools and topics covered: Cloud (AWS, Azure, GCP), Windows, macOS, Linux, Android, iOS, DevOps (Docker, Kubernetes), OSINT, Ports, Forensics, Malware Resources, Defender tools, Attacker tools, OSINT tools, and various other supporting tools (Vim, iptables, nftables,

etc...). This handbook was truly meant to be a single source for the most common tool and techniques an Operator can encounter while on the job. Search Copy Paste L33t.

Complete Shibari, Volume 1: Land

Douglas Kent 2010-03-20 About the series...Shibari is the Japanese-inspired art of tying a subject to not only immobilize them, but to do so elegantly and beautifully - creating an intimate and erotic experience for both the subject and

the person tying. Adopted by rope enthusiasts all over the world, shibari (literally "to tie" or "to bind") is a cornerstone of erotic rope art and the subject of captivating performances and photographs. However, in-depth resources for learning the art are difficult to obtain, making shibari intimidating, obscure and difficult to master... Until now. The Complete Shibari series is the most complete and accessible English-language guide to shibari ever published. Author Douglas Kent strips away shibari's mystery and reveals how to create visually stunning compositions with rope and the human form... in your own home or play space. About Complete Shibari: Land Complete Shibari Volume 1: Land explores the essential ground-based ties and forms of shibari. With short, clear explanations and over 450 lavish, step-by-step illustrations and photographs, Douglas Kent introduces

the basic "building blocks", then guides you in applying those basics to create a full range of beautiful and exciting ground-based shibari ties. This is not a "knot book" - if you can tie an overhand knot, you already know half the knots you'll ever need. This practical, hands-on guide to doing shibari covers everything from choosing and preparing rope, to scene safety, to the techniques... and the reasoning behind the techniques. Complete Shibari Volume 1: Land is a ground-breaking, must-have book for anyone interested in playing with rope. Buy it today and tie tonight!

Windows Server 2012: Up and Running
Samara Lynn 2012-12-07 Discusses how to configure and manage Microsoft Server 2012's expanded capabilities, covering data management, user permissions, networking tools, and data integrity.

Wireless Networking in the Developing World Rob Flickenger 2009-09-24

Provides instructions on how to build low-cost telecommunications infrastructure. Topics covered range from basic radio physics and network design to equipment and troubleshooting, a chapter on Voice over IP (VoIP), and a selection of four case studies from networks deployed in Latin America. The text was written and reviewed by a team of experts in the field of long distance wireless networking in urban, rural, and remote areas. Contents: 1) Where to Begin. 2) A Practical Introduction to Radio Physics. 3) Network Design. 4) Antennas & Transmission Lines. 5) Networking Hardware. 6) Security & Monitoring. 7) Solar Power. 8) Building an Outdoor Node. 9) Troubleshooting. 10) Economic Sustainability. 11) Case Studies. See the website for translations, including French, Spanish, Portuguese, Italian, Arabic, and others, and additional case studies, training course material, and related

information

HWM 2005-08 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

Digital Color Imaging Christine Fernandez-Maloigne 2013-03-04 This collective work identifies the latest developments in the field of the automatic processing and analysis of digital color images. For researchers and students, it represents a critical state of the art on the scientific issues raised by the various steps constituting the chain of color image processing. It covers a wide range of topics related to computational color imaging, including color filtering and segmentation, color texture characterization, color invariant for object recognition, color and motion analysis, as well as color image and video indexing and retrieval. Contents 1. Color Representation and Processing in Polar Color Spaces, Jesús Angulo,

Sébastien Lefèvre and OlivierLezoray. 2. Adaptive Median Color Filtering, FrédériqueRobert-Inacio and Eric Dinet. 3. Anisotropic Diffusion PDEs for Regularization of MultichannelImages: Formalisms and Applications, David Tschumperlé. 4. Linear Prediction in Spaces with Separate Achromatic andChromatic Information,Olivier Alata, Imtnan Qazi, Jean-ChristopheBurie and Christine Fernandez-Maloigne. 5. Region Segmentation, Alain Clément, Laurent Busin, OlivierLezoray and Ludovic Macaire. 6. Color Texture Attributes, Nicolas Vandembroucke, Olivier Alata,Christèle Lecomte, Alice Porebski and Imtnan Qazi. 7. Photometric Color Invariants for Object Recognition, DamienMuselet. 8. Color Key Point Detectors and Local Color Descriptors, DamienMuselet and Xiaohu Song. 9. Motion Estimation in Color Image Sequences, Bertrand Augereauand Jenny Benois-Pineau. *Electromagnetics* John D. Kraus 1992

Thou Shall Not Use Comic Sans Tony Seddon 2011-12-29 Ask any graphic designer the world over about their preferred approach to setting type, choosing a color, or beginning a new layout, and you will rarely get exactly the same answer twice. All designers have their own way of working and their own combinations of the thousands of techniques one can apply when planning a new design project. But there are some dos and don'ts that always figure in any heated debate about what one should or should not accept as the right way to create the best graphic design. This book looks at key dos and don'ts, bringing them together in the form of a classically structured almanac. Packed with practical advice, but presented in a light-hearted fashion, the advisory rather than dictative approach means designers can take or leave the advice presented in each rule as is typical of most creatives with their

own strong views on what does and does not constitute good design practice. Individual entries will either bring forth knowing nods of agreement or hoots of derision, depending on whether or not the reader loves or hates hyphenation, has a pathological fear of beige, or thinks that baseline grids are boring. Thou Shall Not Use Comic Sans is the must-have collection of the best advice that any graphic designer should have at his fingertips, with each entry combining a specific rule with a commentary from a variety of experienced designers from all fields of the graphic design industry. Grouped into six, color-coded categories—typography, color, layout, imagery, production, and the practice of design—but presented numerically and in mixed groups, the reader can either dip in at random or use the book as the source of a daily lesson in how to produce great graphic design. This product is available to

U.S. and Canada customers only.

A Texan's Story Walter Prescott Webb
2020-09-24 Walter Prescott Webb
(1888-1963), a towering figure in Texas and western history and letters, published an abundance of books—but for decades the autobiography he'd written late in life sat largely undisturbed among his papers. Webb's remarkable story appears here in print for the first time, edited and annotated by Michael Collins, an authority on Texas history. This firsthand account offers readers a window on the life, the work, and the world of one of the most interesting thinkers in the history, and historiography, of Texas. Webb's narrative carries us from the drought-scarred rim of West Texas known as the Cross Timbers, to the hardscrabble farm life that formed him, to the bright lights of Austin and the University of Texas, where he truly came of age. Fascinating for the picture it

summons of the Texas of his youth and the intellectual landscape of his career, Webb's autobiography also offers intriguing insights into the way his epic work, *The Great Plains*, evolved. He also describes the struggle behind his groundbreaking history of that storied frontier fighting force the Texas Rangers. Along the way, Webb reflects on the nature of historical research, the role that Texas and the West have played in American history, the importance of education, and the place of universities in our national culture. More than a rare encounter with a true American character's life and thought, *A Texan's Story* is also a uniquely enlightening look into the understanding, writing, and teaching of western American history in its formative years.

CWNA Certified Wireless Network Administrator Official Study Guide (Exam PW0-100), Second Edition

Planet3 Wireless 2003 Endorsed by the

Wireless LAN Association, this comprehensive study guide offers complete coverage of all objectives for CWNA 2.0 exam PW-100. Inside, you'll find 150+ practice exam questions with complete answers, step-by-step exercises, chapter self-tests, margin notes, and much more to help you prepare for this challenging exam.

Top-Down Network Design Priscilla Oppenheimer 2010-08-24 Objectives The purpose of *Top-Down Network Design, Third Edition*, is to help you design networks that meet a customer's business and technical goals. Whether your customer is another department within your own company or an external client, this book provides you with tested processes and tools to help you understand traffic flow, protocol behavior, and internetworking technologies. After completing this book, you will be equipped to design enterprise networks that meet a customer's

requirements for functionality, capacity, performance, availability, scalability, affordability, security, and manageability. Audience This book is for you if you are an internetworking professional responsible for designing and maintaining medium- to large-sized enterprise networks. If you are a network engineer, architect, or technician who has a working knowledge of network protocols and technologies, this book will provide you with practical advice on applying your knowledge to internetwork design. This book also includes useful information for consultants, systems engineers, and sales engineers who design corporate networks for clients. In the fast-paced presales environment of many systems engineers, it often is difficult to slow down and insist on a top-down, structured systems analysis approach. Wherever possible, this book includes shortcuts and

assumptions that can be made to speed up the network design process. Finally, this book is useful for undergraduate and graduate students in computer science and information technology disciplines. Students who have taken one or two courses in networking theory will find Top-Down Network Design, Third Edition, an approachable introduction to the engineering and business issues related to developing real-world networks that solve typical business problems. Changes for the Third Edition Networks have changed in many ways since the second edition was published. Many legacy technologies have disappeared and are no longer covered in the book. In addition, modern networks have become multifaceted, providing support for numerous bandwidth-hungry applications and a variety of devices, ranging from smart phones to tablet PCs to high-end servers. Modern users expect the network to be

available all the time, from any device, and to let them securely collaborate with coworkers, friends, and family. Networks today support voice, video, high-definition TV, desktop sharing, virtual meetings, online training, virtual reality, and applications that we can't even imagine that brilliant college students are busily creating in their dorm rooms. As applications rapidly change and put more demand on networks, the need to teach a systematic approach to network design is even more important than ever. With that need in mind, the third edition has been retooled to make it an ideal textbook for college students. The third edition features review questions and design scenarios at the end of each chapter to help students learn top-down network design. To address new demands on modern networks, the third edition of Top-Down Network Design also has updated material on the following

topics: ; Network redundancy ; Modularity in network designs ; The Cisco SAFE security reference architecture ; The Rapid Spanning Tree Protocol (RSTP) ; Internet Protocol version 6 (IPv6) ; Ethernet scalability options, including 10-Gbps Ethernet and Metro Ethernet ; Network design and management tools
Northern African Wireless Communications 2005

Technology in Action, Complete Alan Evans 2010-01-05 In today's technological age, computer literacy is important for everyone, and now learning the basics is easier than ever. This title engages students by combining a unique teaching approach with rich companion media.

WiFi Pineapple Darren Kitche 2017-11-27

Twelve Sharp Janet Evanovich 2011-10-13 Sometimes marriage can be a killer... Usually hot on the heels of various miscreants, bounty hunter Stephanie Plum finds herself with a

suspicious stalker in Twelve Sharp, the wildest novel yet in Janet Evanovich's Stephanie Plum series. Not to be missed by fans of Lee Child and JD Robb. Praise for Evanovich: 'Evanovich is a clever writer with a strong streak of laugh out loud sardonic humour' (Melbourne Weekly); 'Non-stop laughs with plenty of high jinks' (USA Today); 'As smart and sassy as high gloss wet paint' (Time Out). Just when it seems Stephanie Plum's life may be calming down, a new threat turns up: the wife of her mentor Ranger. Only it seems this wife isn't everything she says, and with Plum's usual protector in danger, Stephanie might actually have to look after Ranger for once. Problem is Stephanie's on-again-off-again boyfriend, and Trenton cop, Joe Morelli already isn't too pleased with how close Stephanie is becoming to Ranger. Not only is Ranger temptation walking, he also has a long list of psychopaths and trained

killers after him that make Stephanie's list of nut jobs seem normal... What readers are saying about Twelve Sharp: 'Immensely good fun - Evanovich knows how to write them light and frivolous' 'The suspense and action will have you panting until the very end. The storyline is one of the best, filled with the action and suspense yet perfectly paired with comic relief' 'There is something for everyone - adventure, action, romance, comedy and sex'

Bob and Tom Get a Dog Cecilia Minden
2021 "Siblings Bob and Tom get a dog with spots. This A-level story uses decodable text to raise confidence in early readers. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text."--

Caroline Gordon Veronica A. Makowsky
1989 Traces the life of the Southern
novelist and looks at her
relationship to a circle of modern
writers that included Euroda Welty
and Scott Fitzgerald

Ad-Hoc, Mobile and Wireless Networks

Ioanis Nikolaidis 2010-07-13 This
book constitutes the refereed
proceedings of the 9th International
Conference on Ad-Hoc, Mobile, and
Wireless Networks, ADHOC-NOW 2010,
held in Edmonton, Canada, in August
2010. The 16 revised full papers were
carefully reviewed and selected from
43 submissions. The accepted papers
cover topics in
routing/broadcasting/multicasting
protocols; energy efficiency; sensor
coverage; scheduling algorithms;
localization; mobility modeling; data
collection and processing; and
vehicular networks.

The Innovation Journey of Wi-Fi

Wolter Lemstra 2010-11-18 Wi-Fi has
become the preferred means for

connecting to the internet - at home,
in the office, in hotels and at
airports. Increasingly, Wi-Fi also
provides internet access for remote
communities where it is deployed by
volunteers in community-based
networks, by operators in 'hotspots'
and by municipalities in 'hotzones'.
This book traces the global success
of Wi-Fi to the landmark change in
radio spectrum policy by the US FCC
in 1985, the initiative by NCR
Corporation to start development of
Wireless-LANs and the drive for an
open standard IEEE 802.11, released
in 1997. It also singles out and
explains the significance of the
initiative by Steve Jobs at Apple to
include Wireless-LAN in the iBook,
which moved the product from the
early adopters to the mass market.
The book explains these developments
through first-hand accounts by
industry practitioners and concludes
with reflections and implications for
government policy and firm strategy.

The Mobile Audience Martin Rieser
2011 The convergence of mobile technologies and ubiquitous computing is creating a world where information-rich environments may be mapped directly onto urban topologies. This book tracks the history and genesis of locative and wearable media and the ground-breaking work of pioneer artists in the field. It examines changing concepts of space and place for a wide range of traditional disciplines ranging from Anthropology, Sociology, Fine Art and Architecture to Cultural and Media Studies, Fashion and Graphic design. Mobile and Pervasive media are beginning to proliferate in the landscape of computer mediated interaction in public space through the emergence of smartphone technologies such as the iPhone, cloud computing extended wifi services and the semantic web in cities. These dispersed forms of interaction raise a whole series of

questions on the nature of narrative and communication, particularly in relation to an audience's new modes of mobile participation and reception. These issues are explored through a series of focused essays by leading theorists, seminal case studies and practitioner interviews with artists at the cutting edge of these technologies, who are extending the potential of the medium to enhance and critique technological culture. By emphasizing the role of the audience in this nomadic environment, the collection traces the history and development of 'ambulant' artistic practice in this new domain, creating an essential handbook for those wishing to understand the dominant global technology of the 21st Century and its implications for Art, Culture and Audience.

Il Mondo 2008-06

Intelligent Computing, Communication and Devices Lakhmi C. Jain 2014-08-25

In the history of mankind, three revolutions which impact the human life are tool-making revolution, agricultural revolution and industrial revolution. They have transformed not only the economy and civilization but the overall development of the human society. Probably, intelligence revolution is the next revolution, which the society will perceive in the next 10 years. ICCD-2014 covers all dimensions of intelligent sciences, i.e. Intelligent Computing, Intelligent Communication and Intelligent Devices. This volume

covers contributions from Intelligent Computing, areas such as Intelligent and Distributed Computing, Intelligent Grid & Cloud Computing, Internet of Things, Soft Computing and Engineering Applications, Data Mining and Knowledge discovery, Semantic and Web Technology, and Bio-Informatics. This volume also covers paper from Intelligent Device areas such as Embedded Systems, RFID, VLSI Design & Electronic Devices, Analog and Mixed-Signal IC Design and Testing, Solar Cells and Photonics, Nano Devices and Intelligent Robotics.
