The Talented Tenth W E B Du Bois 2020-10-13 Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools--intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it--this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

The Great Awakening Jonathan Edwards 2009 Interpreting the Great Awakening of the eighteenth century was in large part the work of Jonathan Edwards; whose writings on the subject defined the revival tradition in America. Moving from sensitive descriptions of "the Surprising work of God" in conversion to a consuming quest for the essence of true religion, and threading his way through mounting controversies over "errors in doctrine and disorders in practice," Edwards sought to locate an authentic core of evangelical experience, to define it in terms of biblical faith and psychological insight, and to defend it against both overheated zealous and rationalistic critics. The tracts that unfold his thoughts, presented here (with related correspondence) for the first time in accurate critical texts, document a movement so significant for the American character that it has been called "our national conversion." In a carefully researched introduction, C.C. Goen identifies the "Arminian threat" to which the Northampton pastor responded at the onset of the Awakening, and traces Edwards' understanding of vital religion as it developed in the ambiguous context of revivalism. Mr. Goen's study also illuminates little-known aspects of A Faithful Narrative and describes the haphazard way in which that important work reached its eager audience. C.C. Goen, author of Revivalism and Separatism in New England, 1740-1800 (1962), is professor of church history at the Wesley Theological Seminary in Washington, D.C.

Guns, Germs, and Steel: The Fates of Human Societies (20th Anniversary Edition) Jared Diamond 2017-03-07 "Fascinating.... Lays a foundation for understanding human history."--Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and ventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

General George Washington Edward G. Lengel 2005-06-07 Much has been written in the past two centuries about George Washington the statesman and "father of his country." Less often discussed is Washington's military career, including his exploits as a young officer and his performance as the Revolutionary War commander in chief. Now, in a revealing work of historical biography, Edward Lengel has written the definitive account of George Washington the soldier. Based largely on Washington's personal papers, this engrossing book paints a vivid, factual portrait of a man to whom lore and legend so tenaciously cling. To Lengel, Washington was the imperfect commander. Washington possessed no great tactical ingenuity, and his acknowledged "brilliance in retreat" only demonstrates the role luck plays in the fortunes of all great men. He was not an enlisted man's leader; he made a point of never mingling with his troops. He was not an especially creative military thinker; he fought largely by the book. He was not a professional, but a citizen soldier, who, at a time when warfare demanded that armies maneuver efficiently in precise formation, had little practical training handling men in combat. Yet despite his flaws, Washington was a remarkable figure, a true man of the moment, a leader who possessed a clear strategic, national, and continental vision, and who inspired complete loyalty from his fellow revolutionaries, officers, and enlisted men. America could never have won freedom without him. A trained surveyor, Washington mastered topography and used his superior knowledge of battlegrounds to maximum effect. He appreciated the importance of good allies in times of crisis, and understood well the benefits of coordination of ground and naval forces. Like the American nation itself, he was a whole that was greater than the sum of its parts--a remarkable everyman whose acts determined the course of history. Lengel argues that Washington's excellence was in his completeness, in how he united the military, political, and personal skills necessary to lead a nation in war and peace. At once informative and engaging, and filled with some eye-opening revelations about Washington, the war for American independence, and the very nature of military command, General George Washington is a book that reintroduces readers to a figure many think they already know.
