**Idea Man** Paul Allen 2011-04-19 By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he has solved problems, what he's learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.

**Unfabling the East** Jürgen Osterhammel 2019-11-19 During the long eighteenth century, Europe's travelers, scholars, and intellectuals looked to Asia in a spirit of puzzlement, irony, and openness. In this panoramic and colorful book, Jürgen Osterhammel tells the story of the European Enlightenment's nuanced encounter with the great civilizations of the East, from the Ottoman Empire and India to China and Japan. Here is the acclaimed book that challenges the notion that Europe's formative engagement with the non-European world was invariably marred by an imperial gaze and presumptions of Western superiority. Osterhammel shows how major figures such as Leibniz, Voltaire, Gibbon, and Hegel took a keen interest in Asian culture and history, and introduces lesser-known scientific travelers, colonial administrators, Jesuit missionaries, and adventurers who returned home from Asia bearing manuscripts in many exotic languages, huge collections of ethnographic data, and stories that sometimes defied belief. Osterhammel brings the sights and sounds of this tumultuous age vividly to life, from the salons of Paris and the lecture halls of Edinburgh to the deserts of Arabia, the steppes of Siberia, and the sumptuous courts of Asian princes. He demonstrates how Europe discovered its own identity anew by measuring itself against its more senior continent, and how it was only toward the end of this period that cruder forms of Eurocentrism--and condescension toward Asia--prevailed.

**In the Heart of the Antarctic** Sir Ernest Shackleton 2000 Frustrated by his experiences on an expedition led by Captain Robert Scott, explorer Ernest Shackleton, in 1907, launched his own attempt to reach the South Pole. At the mercy of a hostile continent it was to become the most extreme test of endurance imaginable. This is his thrilling account of that expedition.

**24: Deadline** James Swallow 2014-08-05 James Swallow's 24: Deadline. This tie-in novel to Fox's groundbreaking TV show 24 answers the question of what happened to CTU agent Jack Bauer after the thrilling final moments of the last season. The time is 5:00 PM. One hour ago, federal agent Jack Bauer was declared a fugitive. If he wants to survive, he must get out of the country, and he doesn't have much time. With his former colleagues in the Counter Terrorist Unit now dead, under arrest, or shut down, Jack has no resources to call upon, no back-up, and nowhere to go—only his determination can drive him on. One thing remains clear to him: the promise he made to his daughter Kim. Jack vows that he will see Kim one last time to tell her he loves her...before he drops off the radar forever. Meanwhile, a hastily-assembled FBI task force set out to track down and capture Jack, even as a covert operations unit of Russia's SVR set out to do the same—only the remit of the Russians is to kill on sight. As the clock runs down, Jack must face old friends and past enemies in a desperate race to stay one step ahead of the hunters, leaving them with a grim warning— Stay out of my way, and I'll be gone within 24 hours. You'll never see me again. Come after me...and you'll regret it. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Spinifex and Sand** David Wynford Carnegie 2022-06-02 "Spinifex and Sand" is a travelogue by David Wynford Carnegie. In 1896-1897, the Hon. David Wynford Carnegie, born in 1871, the youngest son of the Earl of Southesk, led one of the last great expeditions in the exploration of Australia. His route from Lake Darlôt to Halls Creek and return took thirteen months and covered over three thousand miles. Carnegie financed his expedition from the results of a successful gold strike at Lake Darlôt. The following pages profess to be no more than a faithful narrative of five years spent on the goldfields and in the far interior of Western Australia.

**Global Re-introduction Perspectives** Pritpal S. Soorae 2010 "This is the second issue in the Global Re-introduction Perspectives series and has been produced in the same standardized format as the previous one. The case-studies are arranged in the following order: Introduction, Goals, Success Indicators, Project Summary, Major Difficulties Faced, Major Lessons Learned, Success of Project with reasons for success or failure. For this second issue we received a total of 72 case-studies compared to 62 in the last issue. These case studies cover the following taxa as follows: invertebrates (9), fish (6), amphibians (5), reptiles (7), birds (13), mammals (20) and plants (12) ... We hope the information presented in this book will provide a broad global perspective on challenges facing re-introduction projects trying to restore biodiversity"--Pritpal S. Soorae.

*Britain and International Law in West Africa* Inge Van Hulle 2020-10-22 Africa often remains neglected in studies that discuss the historical relationship between international law and imperialism during the nineteenth century. When it does feature, focus tends to be on the Scramble for Africa, and the treaties concluded between European powers and African polities in which sovereignty and territory were ceded. Drawing on a wide range of archival material, Inge Van Hulle brings a fresh new perspective to this traditional narrative. She reviews the use and creation of legal instruments that expanded or delineated the boundaries between British jurisdiction and African communities in West Africa, and uncovers the practicality and flexibility with which international legal discourse was employed in imperial contexts. This legal experimentation went beyond treaties of cession, and also encompassed commercial treaties, the abolition of the slave trade, extraterritoriality, and the use of force. The book argues that, by the 1880s, the legal techniques that were fashioned in the language of international law in West Africa had largely developed their own substantive characteristics. Legal ordering was not done in reference to adjudication before Western courts or the writings of Western lawyers, but in reference to what was deemed politically expedient and practically feasible by imperial agents for the preservation of social peace, commercial interaction, and humanitarian agendas.

**The Strange Story Book** Mrs. Andrew Lang 1925 The story of Wolfert Webber was said by Louis Stevenson to be one of the finest treasure-seeking stories in the world; and as Stevenson was a very good judge, I am going to tell it to you. Wolfert's ancestor, Cobus Webber, was one of the original settlers who came over from Holland and established themselves on the coast of what is now the State of New York. Like most of his countrymen, Cobus was a great gardener, and devoted himself especially to cabbages, and it was agreed on all sides that none so large or so sweet had ever been eaten by anybody. Webber's house was built after the Dutch pattern, and was large and comfortable. Birds built their nests under the eaves and filled the air with their singing, and a button-wood tree, which was nothing but a sapling when Cobus planted his first cabbage, had become a monster overshadowing half the garden in the days of his descendant Wolfert early in the eighteenth century. The button-wood tree was not the only thing that had grown during those years. The city known at first as 'New Amsterdam,' and later as 'New York,' had grown also, and surrounded the house of the Webbers. But if the family could no longer look from the windows at the beautiful woods and rivers of the countryside, as their forefathers had done, there was no reason to drive a cart about from one village to another to see who wanted cabbages, for now the housewives came to Wolfert to choose their own, which saved a great deal of trouble. Yet, though Wolfert sold all the cabbages he could raise,Ëhe did not become rich as fast as he wished, and at length he began to wonder if he was becoming rich at all. Food was dearer than when he was a boy, and other people besides himself had taken to cabbage-growing. His daughter was nearly a woman, and would want a portion if she married. Was there no way by which he could make the money that would be so badly needed by and bye?

**Lessons Encountered** National Defense National Defense University Press 2016-05-09 This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decision makers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

**White Waters and Black** Gordon MacCreagh 2022-07-21 "White Waters and Black" is an adventure novel by the American writer Gordon MacCreagh, who recreated some of his experiences during his visit to the Amazon river. The book tells about eight "Eminent Scientificos" as they set out to explore the Amazon in 1923. They have no idea what to expect from this wild land, and as they meet rapids, malaria, monkey stew, and "dangerous savages," they change. The book is prominent in two ways: it offers an incredibly realistic account of the trip to Amazon and subtle observations on human behavior in extreme conditions.

**U.S. Marines In Vietnam: The Advisory And Combat Assistance Era, 1954-1964** Capt. Robert H. Whitlow 2016-08-09 This is the first of a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam conflict. This particular volume covers a relatively obscure chapter in U.S. Marine Corps history—the activities of Marines in Vietnam between 1954 and 1964. The narrative traces the evolution of those activities from a one-man advisory operation at the conclusion of the French-Indochina War in 1954 to the advisory and combat support activities of some 700 Marines at the end of 1964. As the introductory volume for the series this account has an important secondary objective: to establish a geographical, political, and military foundation upon which the subsequent histories can be developed.

**The Shape of Things to Come** H. G. Wells 2016-09-14 First published in 1933, "The Shape of Things to Come" is science fiction novel written by H. G. Wells. Within it, world events between 1933 and 2106 are speculated with a single superstate representing the solution to all humanity's problems. A classic example of Wellsian prophesy, this volume is highly recommended for fans of his work and of the science fiction genre. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as "The Time Machine" (1895), "The Invisible Man" (1897), and "The War of the Worlds" (1898). Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.

*Exploring the Boundaries of Big Data* Bart van der Sloot 2016 Though the exact nature and delineation of Big Data is still unclear, it seems likely that Big Data will have an enormous impact on our daily lives. 'Exploring the Boundaries of Big Data' serves as preparatory work for The Netherlands Scientific Council for Government Policy's advice to the Dutch government, which has asked the Council to address questions regarding Big Data, security and privacy. It is divided into five parts, each part engaging with a different perspective on Big Data: the technical, empirical, legal, regulatory and international perspective.

**Dressing for Altitude** Dennis R. Jenkins 2012-08-27 "Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

**Western Imperialism in the Middle East 1914-1958** D. K. Fieldhouse 2006-04-06 The term 'Fertile Crescent' is commonly used as shorthand for the group of territories extending around the Rivers Tigris and Euphrates. Here it is assumed to consist of Syria, Lebanon, Jordan, Iraq and Palestine. Much has been written on the history of these countries which were taken from the Ottoman empire after 1918 and became Mandates under the League of Nations. For the most part the histories of these countries have been handled either individually or as part of the history of Britain or France. In the first instance the emphasis has normally been on the development of nationalism and local resistance to alien control in a particular territory, leading to the modern successor state. In the second most studies have concentrated separately on how either France or Britain handled the great problems they inherited, seldom comparing their strategies. The aim of this book is to see the region as a whole and from both the European and indigenous points of view. The central argument is that the mandate system failed in its stated purpose of establishing stable democratic states out of what had been provinces or parts of provinces within the Ottoman empire. Rather it generated basically unstable polities and, in the special case of Palestine, one totally unresolved, and possibly unsolvable, conflict. The result was to leave the Middle East as perhaps the most volatile part of the world in the later twentieth century and beyond. The main purpose of the book is to examine why this was so.

The Expedition of Humphry Clinker Tobias George Smollett 2005-11-01 Before I was born, [my aunt] had gone such lengths in the way of flirting with a recruiting officer, that her reputation was a little singed. She afterwards made advances to the curate of the parish...-from "To Sir Watkin Phillips, of Jesus college, Oxon, Bath, May 6"An often overlooked but nevertheless important name in the history of the English novel, Tobias Smollett greatly influenced Dickens, with his unsentimental depiction of poverty, and was a favorite of William Makepeace Thackeray, who called The Expedition of Humphry Clinker "the

most laughable story that has ever been written since the goodly art of novel-writing began."An early example of the epistolary novel, consisting entirely of letters written between its characters, this is Smollett's last book, completed and published just before his death in 1771. Far less brutal than his earlier work, it is the comic story of Humphry Clinker, a poor lad who joins a touring party of aristocrats on their journey through city and country. Smollett's satire on the well-to-do and the fripperies that consumed their society echoes in countless writers who came after him, from Jane Austen to "Bridget Jones" with her diary.Scottish writer TOBIAS GEORGE SMOLLETT (1721-1771) trained as a surgeon but found far more success as a novelist; he also worked as an editor and translator. Among his works are Roderick Random (1748) and The Adventures of Peregrine Pickle (1751).

**From Antarctica to Outer Space** Albert A. Harrison 2012-12-06 From Antarctica to Outer Space: Life in Isolation and Confinement aims to revitalize and encourage behavioral research in spaceflight as well as in polar and comparable settings. It comprises a broad collection of papers that evolved from presentations at a three day conference entitled The Human Experience in Antarctica: Applications to Life in Space (The Sunnyvale Conference). This conference was co-sponsored by the Division of Polar Programs of the National Science Foundation and the National Aeronautics and Space Administration and held in 1987. The book provides, through firsthand accounts and research reviews, an introduction to the human facet in isolated and confined environments such as Antarctica, outer space, submarines, and remote national parks. The book discusses some of the theoretical issues underlying research on isolated and confined people, thus demonstrating the applicability of certain general theories of behavior. It also focuses on basic psychological and social responses to isolation and confinement. Studies whose primary purpose is to explore the effects of selection, training, and environmental design on human behavior and mission outcomes are discussed.

*David and Goliath* Malcolm Gladwell 2013-10-03 Why do underdogs succeed so much more than we expect? How do the weak outsmart the strong? In David and Goliath Malcolm Gladwell, no.1 bestselling author of The Tipping Point, Blink, Outliers and What the Dog Saw, takes us on a scintillating and surprising journey through the hidden dynamics that shape the balance of power between the small and the mighty. From the conflicts in Northern Ireland, through the tactics of civil rights leaders and the problem of privilege, Gladwell demonstrates how we misunderstand the true meaning of advantage and disadvantage. When does a traumatic childhood work in someone's favour? How can a disability leave someone better off? And do you really want your child to go to the best school he or she can get into? David and Goliath draws on the stories of remarkable underdogs, history, science, psychology and on Malcolm Gladwell's unparalleled ability to make the connections others miss. It's a brilliant, illuminating book that overturns conventional thinking about power and advantage. 'A global phenomenon... there is, it seems, no subject over which he cannot scatter some magic dust' Observer

*Three Cups of Tea* Greg Mortenson 2006-03-02 The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, Three Cups of Tea combines adventure with a celebration of the humanitarian spirit.
