**Turbo 3.0**
Ryan Snodgrass 2018-01-30 Turbo 3.0 continues the theme of being carefully researched using the Porsche factory archives, private collections, period documentation and intensive study. In an attempt to cover everything an owner, restorer, historian or enthusiast would want to know about the dawn of Porsche’s turbocharged supercar, the Turbo 3.0 book includes a considerable amount of material never before published. For example: comprehensive discussions of original options, close-up photos of key details, scenes from factory production, coverage of special one-off models and period motorsports. This exhaustive volume not only covers the privateer racing exploits of the 3.0-liter Turbo, but also the development of production-based turbocharged race cars by examining the Carrera RSR Turbo 2.14 and Turbo RSR 934/934.5. Additionally, it includes interviews with factory engineers, development drivers and racing pilots involved with the development of Porsche’s original Turbo. This is the definitive book about Porsche’s immortal 3.0-liter Turbo and it is essential reading for anyone who has ever owned, driven or simply lusted after the first supercar of the modern era.

**The Diet Compass**
Bas Kast 2020-12-03 The answer to all questions about ageing and nutrition. When science journalist Bas Kast collapsed with chest pains when he was only 40, he was faced with an existential question: had he ruined his health with junk food? He decided to radically change his eating habits in order to heal himself. But what is really good for you? This was the beginning of a journey of discovery into the latest research into ageing and nutrition — and it lasted several years. What do people with a particularly long life span eat? How can you lose weight efficiently? Are afflictions typical of old age avoidable? Can you ‘eat yourself young’ with certain foods? Much of what we think is healthy can even be harmful. Bas Kast has filtered out from thousands of sometimes contradictory studies scientifically founded findings about what really makes for healthy eating.

**Porsche Turbo**
Randy Leffingwell 2015-10-23 Celebrate the rebirth of the world’s most stunning high-performance automobile. Porsche made history when it brought turbocharging to the racing world in the form of the 917. When strict regulations regarding engine displacement took away the option of bigger engines, manufacturers turned to forced induction. In its wildest trim, the original 12-cylinder turbocharged Porsche racing engine yielded as much as 1,400 horsepower! Porsche’s official philosophy was that racing cars must have a connection to street cars, so it was preordained that Porsche would eventually produce a turbocharged version of its air-cooled flat-six cylinder engine. The resulting 930 Turbo appeared in the spring of 1975 in Europe. Acceleration from 0 to 100 kilometers per hour took a scant 5.5 seconds, and its top speed was 155 miles per hour. The Turbo’s distinctive rear wing let the world know that this was something very special. It was nothing less than the rebirth of the high-performance automobile. At a time when the big-block engines in America’s so-called “muscle cars” were putting out 180 horsepower and the engines in exotic supercars weren’t much more ambitious, the lightweight Porsche was a genuine rocket. Porsche Turbo: The Inside Story of Stuttgart’s Turbocharged Road and Race Cars celebrates Porsche’s five decades of turbocharged supercar performance, both on the track and on the street. It covers all of the major racing cars as well as the turbocharged street cars, including the 930, 935, 924, 944, 968, 911, and Cayenne Panamera. Don’t let this one fly past you!

**Bb - Rainer Buchmann**
Geroold Linghau 2017-01 The first and only book dedicated to Buchmann: a man who had significant impact on the automotive world of the 1980s Presents unique photo material The modifier B+B Auto, founded in Frankfurt, 1973 by Rainer Buchmann and his brother Dieter, caused a stir in the European and international car scene of the ’80s. Their technical innovations and spectacular design made them stand apart from the crowd. Initially focussed on Porsche cars, B+B established themselves as a name to be remembered when they presented their Porsche Turbo Targa with prismatic coloured varnish at the Polaroid stand on Fotokina 1976 Cologne. At IAA Frankfurt 1979 they launched B+B CW 311, a contemporary modification of the legendary Mercedes 300 SL. Mercedes-Benz was so enthusiastic about the car that they allowed Buchmann to continue using the Mercedes star as a brand logo. During the 1980s, B+B was one of the most successful modifiers of production cars. They transformed off-the-line automobiles into individualized luxury vehicles for those who could afford it - customers from the Arab world, celebrities from the Jet-Set, and many more.. However Buchmann’s real passion belonged to the area of electronic innovations. The money he earned with his tuning activities was invested into research in this field. He was the first to think about centralized door locking by means of remote control as well as park distance control and he invented the first car computers. In 1983 his multi-function steering wheel was protected by patent. This comprehensive book, produced in close cooperation with Merck Group, one of the world’s leading chemical companies for whom Buchmann popularized a new and special kind of bright enamel varnish, presents the complete history of Rainer Buchmann’s technical and entrepreneurial achievements.”

**Porsche 956 / 962 Owner’s Workshop Manual**
Ian Wagstaff 2018-04-10 Porsche 956 / 962 Owner’s Workshop Manual is the latest addition to the “classic racing car” manual series, taking the series beyond ten titles, and complementing Ferrari 250 GTO, Ford GT40, Porsche 917, AC Cobra, and Ferrari 512. **Erich Strenger and Porsche**
Mats Kubiak 2017 Erich Strenger (1922-1993), an author, photographer, designer, and illustrator, left his mark on the look of Porsche during the company’s formative years in the early ’50s and ’60s with a design language that, for the most part, continues to bear his signature to this day. He also created countless print products for this successful sports car maker, including Christophorus Zeitschrift für die Freunde des Hauses Porsche, the brainchild of Erich Strenger and Richard von Frankenberg. Over the course of a collaborative relationship with Porsche spanning more than thirty years, the graphic artist, who started out working alone, founded an advertising agency in the heart of Stuttgart with a staff of up to eleven permanent employees. There, Strenger would later create countless racing posters, much like those he had designed in his early days working for Dr. Ing. h.c. F. Porsche AG as a freelancer in the early ’50s. Strenger was instrumental in influencing and molding the image of the Porsche brand as we know it today. This book showcases a first-ever comprehensive collection of his work, created over the course of his collaboration with Porsche between 1951 and 1988. This monographic and monothematic publication brings the noteworthy highlights of his work to the forefront, focusing attention on the designer’s approaches and methods. SELLING POINTS: \* Strenger was instrumental in influencing and molding the image o f the Porsche brand as we know it today \*This book showcases a first-ever comprehensive collection of Strenger’s work, created over the course of his collaboration with Porsche between 1951 and 1988 300 colour images

**Porsche 917**
*(English)*
Walter Tresler 2014-10 The ultimate book about the Porsche 917 - documents detailed descriptions of developments and test drives and also includes race reports.

Güi Bernades 2017-06-30 In Stuttgart-Zuffenhausen, August 1939, the 60K10 project, under the supervision of one Professor Ferdinand Porsche, builds a car in anticipation of a race, Berlin to Rome, that will never take place. With this history and the development of a light and aerodynamic car, with a small engine but remarkable performance was born. Nine years later this idea bore fruit and the company released their first automobile, the 356, created by Ferdinand’s son, Ferry Porsche, which would launch the company into automotive history. Porsche - Cars with Soul tells the story of Porsche, from the unique perspective of the cars themselves, through the most significant events and races of the marque’s celebrated history. It ~~focuses on the careers of owners of Porsches in 1948-1988~~ he cars competed, from 1951 to 2015 and it tracks the development of Porsche models from the first model 356, to the defining model 911, and beyond. Beautifully illustrated with rarely seen full-colour and vintage photographs from the Porsche archives.

**Targa Florio**
Pino Fondi 2006 Many years ago in Sicily, the legend of the “Coppa Florio” and “Targa Florio” road races became one of the most emotive and prestigious expressions in world motor racing, second only to the mythical Mille Miglia. “Coppa Florio” began in 1905 while “Targa Florio” in 1906, at the dawn of motoring civilisation and evolved over the years, hand-in-hand with the ever growing popularity of the car itself. The narrow and tortuous roads of the Sicilian mountains were testimony to the feats of Fiat, Bugatti, Alfa Romeo, Maserati, Lancia, Ferrari and Porsche: manufacturers who alternated year after year at the top of the final classification of one of the toughest races in history, a race rich in allure and an ever present peril. On the occasion of the Targa Florio Centenary the book retraces this charming epics thanks to a vivid text and hundred of pictures, many of them unpublished. The work is complemented by a rich appendix ( 150 pages) reporting the

Jörg Walz 2019-03-07 \* A unique take on the history of Porsche - all photographs are of highly detailed miniatures in 1:43 scale, each one taken with an iPhone, and each uploaded to Instagram with the hashtag #PorschePur #PorschePur... That’s the hashtag that marked the start of this project. From the 356 to the 911 GT2 RS, from Porsche no. 1 to the Panamera Turbo S E-Hybrid Executive, from Le Mans to the Nürburgring, from the Rallye Monte Carlo to Dakar, from James Dean and Hans Herrmann to Mark Webber and Neil Jani - this book retraces the rich and varied history of the Porsche brand and its models.Included in this book are all the sports car models as well as the race cars with which the brand has earned its laurels in sporting competitions. The visual story is told by means of unique photography of highly detailed miniatures in 1:43 scale, photographed in the actual surroundings be it at the Nürburgring, in Hong Kong, Los Angeles, Paris or any other place on earth. The camera used in all cases is an iPhone. The photos and the fascinating text were originated by long-standing motoring journalist, book author and communications professional Jörg Walz. His ‘Instagram car park’ has grown to become a unique automotive museum with space for more than 1,000 cars. A large proportion of this collection is showcased here in this unique book.

2010 Since the beginnings the Porsche brand, it has not only been men who accompanied and substantiated the automobile manufacturer’s fame. This book devotes itself for the first time to the women who made an indelible impression on the Porsche name. Karl Ludvigsen 2018-05-30 \*\*Endorsements: \*\* ‘Fascinating and meticulously researched.’ The Spectator ‘The connection between weapons and industrial design is strong at Porsche. This is the subject of an engrossing new book, Professor Porsche’s Wars.’ Stephen Bayley, Octane ‘Ludvigsen approaches the legend from a new and surprisingly rich angle -- the Professor’s contributions to military ordnance, the design and production of which occupied him continuously throughout his long career. He produces a compelling tale of a prolifically talented engineer dedicated to innovation and perfection stubbornly battling against the often seemingly impossible constraints imposed upon him.’ The Automobile ‘Crammed with information, original photographs, illustrations and drawings, we reckon it’s an essential addition to any military vehicle enthusiasts’ reference library.’ Classic Military Vehicle Regarded as one of the great automotive engineers of the twentieth century, Ferdinand Porsche is well remembered today for his remarkable automotive designs including the Volkswagen Beetle and Auto Union Grand Prix cars. Yet there is another side to his extraordinary career, for he was an equally inventive designer of military vehicles and machinery. In this field too he excelled. Indeed the sheer versatility of his contribution is astonishing. Karl Ludvigsen’s study is the definitive guide. Karl Ludvigsen tells the complete story, detailing Porsche’s relations with the Third Reich and the stream of advanced designs for which he was responsible. Among them were the Kubelwagen, the Schwimmwagen, the Type 100 Leopard tank, the controversial Ferdinand tank destroyer and the colossal Type 205 ‘Maus’ tank. He also describes Porsche’s creative work on aero engines, tank engines and even his company’s manufacture of the V-1 flying bomb, for which he designed a turbojet engine.
