Foul Bottoms John Quirk 2013-07-10 Based on a series of highly popular articles written for Classic Boat magazine, this witty collection dwells on the scrapes people get themselves into when building and sailing boats of all descriptions. Most sailors will find something to relate to in the escapades and faux pas detailed here, and the stories will undoubtedly bring a

wry smile to any boater's lips. John Quirk's terrifically witty cartoons help bring these anecdotes to life. Some quotes from the book: Her jeans fitted like the fuzz on a peach. With the horror of watching a hedgehog run amok in a condom factory. With the ship sinking beneath us, the owner frantically fumbled through the warranty. We hit the dining room with the etiquette of escaped lab rats. 'Quirky is the sea-going version of Bill Bryson and Jeremy Clarkson - and he draws better!' - Dan Houston, Editor of Classic Boat

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
