Hot Button Bart King 2022-07-26 A book that explores the delicacy and critical importance of getting history right, and teaching it in an age-appropriate way in the classroom, every time. Hot Button: Teaching Sensitive Social Studies Content explores the difficulty, delicacy, and ethical obligations of teaching accurate history to all students. It names and explores the issues with being the 'tip of the spear' in the classroom after a long line of generally bureaucratic and political decisions are made and how to apply appropriate logic and decision making into what constitutes your scope and sequence and lesson plans as a social studies teacher. It features contributions from Alysha Butler, Kelly Reichardt, Gerardo Muñoz, Chris Dier, and accomplished author Bart King.

Joining the Great War, April 1917-April 1918 Eric B. Setzekorn 2017 Eric Setzekorn summarizes the prewar United States Army, the initial American reaction to the outbreak of war in Europe in 1914, and the factors that led to the U.S. declaration of war in April 1917. The narrative then examines how the U.S. Army transformed itself from a small constabulary force into a mass, industrialized army capable of engaging in modern warfare. The author covers stateside mobilization and training, the formation of the American Expeditionary Forces, and the slow buildup of American forces in France, and concludes with U.S. soldiers helping to blunt the first phase of the 1918 German Spring Offensive.

The Real North Korea Andrei Lankov 2015 After providing an accessible history of the nation, the author turns his focus to what North Korea is, what its leadership thinks and how its people cope with living in such an oppressive and poor place, arguing that North Korea is not irrational, but rather a nation that has survived against all odds.

Low-intensity Conflict in the Third World Stephen Blank 1988 A common thread ties together the five case studies of this book: the persistence with which the bilateral relationship between the United States and the Soviet Union continues to dominate American foreign and regional policies. These essays analyze the LIC environment in Central Asia, the Middle East, Southeast Asia, Latin America, and sub-Saharan Africa.

Almost History Roger A. Bruns 2007 Throughout American history, many speeches and documents were prepared for events that might have happened, but never did: Eisenhower's personal note apologizing for the failure of D-Day; Lincoln's plans for post-Civil War Reconstruction; the CIA's memo discussing the use of Americans as guinea pigs in drug tests, among many others. Almost History includes more than eighty selections, many supported by photographs of the actual documents, and each is introduced with the story of how they came to be and where they fit in our history. They are compiled here for the first time, by a deputy director of the National Archives, illustrating how close America came to defeat, disaster, and distress -- and providing chilling proof that history can change in an instant.

Political Warfare Kerry K. Gershaneck 2020 "Political Warfare provides a well-researched and wide-ranging overview of the nature of the People's Republic of China (PRC) threat and the political warfare strategies, doctrines, and operational practices used by the Chinese Communist Party (CCP). The author offers detailed and illuminating case studies of PRC political warfare operations designed to undermine Thailand, a U.S. treaty ally, and Taiwan, a close friend"--

Providing for the Casualties of War Bernard D. Rostker 2013-04-29 War has always been a dangerous business, bringing injury, wounds, and death, and--until recently--often disease. What has changed over time, most dramatically in the last 150 or so years, is the care these casualties receive and who provides it. This book looks at the history of how humanity has cared for its war casualties and veterans, from ancient times through the aftermath of World War II.

Prevent strategy Great Britain: Home Office 2011-06-07 The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

COVID-19 Learning Losses UNESCO 2021-12-08 Since the beginning of the pandemic, efforts have been made to monitor both school closures (and re-opening) and the measures put in place to ensure continuity of learning. These include the Survey of Ministries of Education on National Responses to COVID-19, jointly supported by UNESCO, UNICEF and the World Bank. However, to date, no systematic evidence has been available on how students' learning is being affected by the disruptions caused by the pandemic or on the impact of education response measures initiated by governments. This report contributes to filling this evidence gap and includes a series of simulations of potential learning losses due to COVID-19 and exploration of their longer-term implications. The analysis is based on the Enabling learning for all framework, which outlines access, engagement and enabling environment as the three crucial enablers for learning, while the simulation assumptions are informed by the evidence on school closures and governments' education-related responses, collected through the joint survey.

Nineteen Eighty-Four George Orwell 2021-01-28 Nineteen Eighty-Four (1949) was George Orwell's final novel and was completed in difficult conditions shortly before his early death. It is one of the most influential and widely-read novels of the post-war period.

Fundamentals of Fire Fighter Skills David Schottke 2014

A Persistent Fire Timothy S. Mallard 2020 "The phrase military ethics is sometimes regarded as a contradiction in terms. To some, the idea of ethics seems out of touch with modern realities and sensibilities. "How can an external moral standard dictate one's actions?" some might ask. Ethics can therefore bring up memories of bygone eras that seem irrelevant. Coupled with the qualifier military, ethics can seem even more puzzling. Ethics is not merely a concern for past eras, but is increasingly relevant in an age of rapid technological and societal development. From its beginning, our nation's military leaders have viewed ethics as imperative to the task of warfighting. This is a refrain echoed by contributions to this book who address a range of issues concerning political actors, technological capabilities, and societal shifts of the past and the present. And in commemorating the centenary of World War I, it is appropriate to consider the ethics of warfare. This book helpfully relates lessons from the past to the major ethical issues of modern warfare. By providing diverse reflections on the history of military ethics and challenges of contemporary and future warfare, this book serves as a repository of meaningful material for a new generation of warfighters to develop their own faculties of ethical judgment"--

National Research Council 2000-08-11 First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Science Teaching Reconsidered National Research Council 1997-03-12 Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

The Origins of the Holocaust Michael Robert Marrus 1989-01-01 Diese Reihe bietet erstmals eine Basissammlung von Faksimiles englischsprachiger historischer Artikel zu allen Aspekten der Vernichtung der europäischen Juden. Die große Anzahl von annähernd 300 Aufsätzen aus 84 Zeitschriften und Sammlungen ermöglicht den Lesern, sich einen Überblick über diesen Themenkomplex zu verschaffen. Die Reihe beginnt mit einem Rückblick auf die Wurzeln des Antisemitismus und einer Darstellung der verschiedenen wissenschaftlichen Methoden zur Erforschung des Holocaust. Die Reihe endet mit der Dokumentation der Befreiung der Konzentrationslager und mit Aufsätzen zu den Kriegsverbrecherprozessen. Der Erscheinungszeitraum umfasst die Jahre 1950 bis 1987, zu den Verfassern gehören beispielsweise Jakob Katz, Saul Friedländer, Eberhard Jäckel, Bruno Bettelheim und Herbert A. Strauss.
