Securing Outer Space Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected – but not challenged – the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to ‘bring back space’ into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.

When God Goes to Starbucks Paul Copan 2008-08-01 More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want—just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In When God Goes to Starbucks, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

Livestock, Dead Stock Seymour Grufferman 2020-09 A disgruntled British veterinary technician has access to a large repository of animal diseases at Britain's main veterinary laboratory. To exact revenge for his mistreatment, he steals samples of highly infectious agents for animal diseases and sells them to al Qaeda. Ayman al Zawahiri, the head of al Qaeda, decides to use the agents to mount a bioterrorism attack on the US. He first does a trial run with the causative agent for mad cow disease to check whether it would work. The agent is sprinkled on restaurant food and causes four cases of a horrific disease, Creutzfeldt-Jakob disease (CJD) which is also caused by the mad cow disease agent. Al Zawahiri then decides to use all the infectious material he bought to attack US farm animal production.Winston Sage, a retired epidemiologist who had previously helped the FBI interdict a terrorist attempt to poison US food supplies, is invited to help investigate the four cases of CJD. While the investigation is flubbed and going nowhere, the terrorists introduce foot and mouth disease, Rinderpest, swine flu and Newcastle disease into US herds and flocks via placing the infectious agents into feed supplies. These are highly contagious and deadly diseases of livestock. The terrorists also spread a fungal disease of wheat by aerial spraying of fields with fungal agents. Devastating economic damage is inflicted on US agriculture, to the tune of billions of dollars of losses. As a result, no one will buy US meat or wheat. It also leads to demonstrations and riots by alarmed citizens. Sage is left furious about the incompetence of the CIA and FBI and the ruthlessness of al Qaeda. He is invited to a meeting with the US President and recommends a complete overhaul of intelligence activities, with which the President agrees..

This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries. With this strong foundation in place, the Deitels introduce more sophisticated techniques, including inheritance, polymorphism, exception handling, strings, GUI's, data structures, generics, and collections. Throughout, the authors show developers how to make the most of Microsoft's Visual Studio tools. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

Maintaining the Momentum of Decentralisation in Ukraine Collectif 2018-06-15 This Multi-level Governance Series study focuses on Ukraine's advances in regional development, territorial reform and decentralisation since 2014. The Government launched a reform to merge local governments and strengthen the decentralisation process, giving additional power and resources to sub-national authorities. In a short period, successful steps have been taken toward achieving municipal mergers and greater fiscal, administrative and political decentralisation, complemented by the State Strategy for Regional Development 2015-2020. The first local elections have been held and more public services are being delivered by certain local authorities. Yet, important challenges remain, ranging from a need to address rising disparities and adjusting multi-level governance practices and territorial structures, to better structuring fiscal decentralisation. This report addresses regional performance and disparities in Ukraine, provides insight into Ukraine's current territorial reform and approach to decentralisation, explores the impact of fiscal decentralisation measures, and includes a case study of the transport sector. It also provides a set of recommendations for action to support Ukraine in meeting the conditions for successful decentralisation.
