Red Blood, Black Sand Chuck Tatum 2012-05-01 A story of heroism, friendship, and courage in World War 2—as seen in the award-winning HBO miniseries The Pacific. In 1944, the U.S. Marines were building the 5th Marine Division—also known as “The Spearhead”—in preparation for the invasion of the small, Japanese-held island of Iwo Jima... When Chuck Tatum began Marine boot camp, he was just a smart-aleck teenager eager to serve his country. Little did he know that he would be training under a living legend of the Corps—Medal of Honor recipient John Basilone, who had almost single-handedly fought off a Japanese force of three thousand on Guadalcanal. It was from Basilone and other sergeants that Tatum would learn how to fight like a Marine and act like a man—skills he would need when he hit the black sand of Iwo Jima with thirty thousand other Marines. Red Blood, Black Sand is the story of Chuck’s two weeks in hell, where he would watch his hero, Basilone, fall, where the enemy stalked the night, where snipers haunted the day, and where Chuck would see his friends whittled away in an ear drum-shattering, earth-shaking, meat grinder of a battle. This is the island, the heroes, and the tragedy of Iwo Jima—through the eyes of one who survived it.

Iranian F-14 Tomcat Units in Combat Tom Cooper 2012-11-20 So formidable an opponent did the Iraqi airforce consider the F-14 that during the Iran-Iraq war, they ordered their pilots not to engage F-14s and the presence of one in an area was usually enough to empty it of Iraqi aircraft. Officially losses were tiny; only one F-14 was lost in aerial combat (to a MiG-21), one to a control problem and one downed by a ground-to-air missile. This book looks at the F-14’s Iranian combat history and includes first hand accounts from the pilots themselves. It will consider key engagements and the central figures involved, illustrating the realities, successes and failures of the Iranian air campaign.

U.S. Marines in Battle: Fallujah, November-December 2004 Timothy S. McWilliams This is a study of the Second Battle of Fallujah, also known as Operation Al-Fajr and Operation Phantom Fury. Over the course of November and December 2004, the I Marine Expeditionary Force conducted a grueling campaign to clear the city of Fallujah of insurgents and end its use as a base for the anticoalition insurgency in western Iraq. The battle involved units from the Marine Corps, Army, and Iraqi military and constituted one of the largest engagements of the Iraq War. The study is based on interviews conducted by Marine Corps History Division field historians of battle participants and archival material. The book will be of primary interest to Marines, other service members, policy makers, and the faculty and students at the service schools and academies.

U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967 Maj. Gary L. Telfer 2016-08-09 This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps’ participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam’s northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF’s perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy’s Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

Vietnam Studies Col Francis J. Kelly 2016-12-10 As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam. going about their business of training, advising, and assisting members of the Vietnamese Army. Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is. in fan, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems. successes, and failures of a unique program undertaken by the U.S. Army for the first lime in its history. It is hoped that all the significant lessons learned have been recorded and the many pitfalls of such a program uncovered. I am responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must lake note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare-the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group (Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime. Engineers at War (Hardcover) Adrian G. Traas 2011-02 NOTE: NO FURTHER DISCOUNT FOR THIS PRINTED PRODUCT- OVERSTOCK SALE -- Significantly reduced list price Engineers at War describes the role of military engineers, especially the U.S. Army Corps of Engineers, in the Vietnam War. It is a story of the engineers' battle against an elusive and determined enemy in one of the harshest underdeveloped regions of the world. Despite these challenges, engineer soldiers successfully carried out their combat and construction missions. The building effort in South Vietnam allowed the United States to deploy and operate a modern 500,000-man force in a far-off region. Although the engineers faced huge construction tasks, they were always ready to support the combat troops. They built ports and

depots, carved airfields and airstrips out of jungle and mountain plateaus, repaired roads and bridges, and constructed bases. Because of these efforts, ground combat troops with their supporting engineers were able to fight the enemy from well-established bases. Although most of the construction was temporary, more durable facilities, such as airfields, port and depot complexes, headquarters buildings, communications facilities, and an improved highway system, were intended to serve as economic assets for South Vietnam. This volume covers how the engineers grew from a few advisory detachments to a force of more than 10 percent of the Army troops serving in South Vietnam. The 35th Engineer Group began arriving in large numbers in June 1965 to begin transforming Cam Ranh Bay into a major port, airfield, and depot complex. Within a few years, the Army engineers had expanded to a command, two brigades, six groups, twenty-eight construction and combat battalions, and many smaller units. Closing In: Marines in the Seizure of Iwo Jima Joseph H. Alexander 2022-06-02 Closing In: Marines in the Seizure of Iwo Jima is a fact-based account of the battle for Iwo Jima in the Pacific, a major battle in which the United States Marine Corps and the United States Navy landed on and eventually captured the island of Iwo Jima from the Imperial Japanese Army during World War II. The war took place on Iwo Jima volcano island, which was a small island for such a large number of casualties of about twenty-two thousand Japanese and nearly seven thousand US Marines, with another nineteen thousand Americans injured. Joseph H. Alexander (1938 - 2014) himself was a Colonel of the United States Marine Corps, where he served for twenty-nine years, and he was also a historian. He has given a historical insight into the war in the Pacific through this book.

Bataan Survivor David L. Hardee 2017-12-01 A forgotten account, written in the immediate aftermath of World War II, which vividly portrays the valor, sacrifice, suffering, and liberation of the defenders of Bataan and Corregidor through the eyes of one survivor. The personal memoir of Colonel David L. Hardee, first drafted at sea from April-May 1945 following his liberation from Japanese captivity, is a thorough treatment of his time in the Philippines. A career infantry officer, Hardee fought during the Battle of Bataan as executive officer of the Provisional Air Corps Regiment. Captured in April 1942 after the American surrender on Bataan, Hardee survived the Bataan Death March and proceeded to endure a series of squalid prison camps. A debilitating hernia left Hardee too ill to travel to Japan in 1944, making him one of the few lieutenant colonels to remain in the Philippines and subsequently survive the war. As a primary account written almost immediately after his liberation, Hardee’s memoir is fresh, vivid, and devoid of decades of faded memories or contemporary influences associated with memoirs written years after an experience. This once-forgotten memoir has been carefully edited, illustrated and annotated to unlock the true depths of Hardee’s experience as a soldier, prisoner, and liberated survivor of the Pacific War.

Dreams of My Comrades Scott Zuckerman 2017-11-21 When a ninety-five-year-old World War II veteran from Utah agrees to reveal the untold details of his wartime experiences to a pediatrician from Brooklyn, an intense bond is formed between the two men, each of whom is taken on an unexpected journey in search of the truth. Dreams of My Comrades chronicles the life of Murray Jacobs, a former Navy Seabee, who served in the Pacific Theater and was treated for PTSD until his death at the age of ninety-eight. He agreed to a series of interviews,

under the strict conditions that his real name could not be used, and the details of the conversations could not be disclosed to anyone until after he was dead. Murray's story is not one of heroism, nor does he portray himself as heroic in his narrative. In the course of his dialogue with the author, Murray confesses to wartime atrocities the likes of which have never before been heard. Despite his advanced age, his recollections are entirely lucid, and he describes the events of his life in vivid detail. As the conversations progress, however, the author comes to recognize the challenges involved in trying to depict history based on the account of a single elderly man. Discrepancies lead to doubts, doubts lead to disbelief, disbelief leads to investigation, and after exhausting all possible avenues of research, unanswered questions linger and tantalize. This is a unique story, one that will not only appeal to connoisseurs of history but to anyone interested in the psychology of the human condition. It is unlike any narrative ever told about a veteran of the Second World War.

Donut Dolly Joann Puffer Kotcher 2011 This is the story of a former Math teacher at the explosive beginnings of the Viet Nam War where she ducks bullets and mortar shells to bring moments of home to scared GIs. The author deftly intertwines her unique experiences with the grueling life of the common soldier and her personal life with her compassion for the soldiers.

Islands of the Damned R.V. Burgin 2010-03-02 A remarkable eyewitness account of the most brutal combat of the Pacific War, from Peleliu to Okinawa, this is the true story of R.V. Burgin, the real-life World War II Marine Corps hero featured in HBO's The Pacific. "Read his story and marvel at the man...and those like him."—Tom Hanks When a young Texan named R.V. Burgin joined the Marines 1942, he never imagined what was waiting for him a world away in the Pacific. There, amid steamy jungles, he encountered a ferocious and desperate enemy in the Japanese, engaging them in some of the most grueling and deadly fights of the war. In this remarkable memoir, Burgin reveals his life as a special breed of Marine. Schooled by veterans who had endured the cauldron of Guadalcanal, Burgin's company soon confronted snipers, repulsed jungle ambushes, encountered abandoned corpses of hara-kiri victims, and warded off howling banzai attacks as they island-hopped from one bloody battle to the next. In his two years at war, Burgin rose from a green private to a seasoned sergeant, fighting from New Britain through Peleliu and on to Okinawa, where he earned a Bronze Star for valor. With unforgettable drama and an understated elegance, Burgin's gripping narrative stands alongside those of classic Pacific chroniclers like Robert Leckie and Eugene Sledge—indeed, Burgin was even Sledge's platoon sergeant. Here is a deeply moving account of World War II, bringing to life the hell that was the Pacific War.

Gulf War and Health National Academies of Sciences, Engineering, and Medicine 2016-03-16 For the United States, the 1991 Persian Gulf War was a brief and successful military operation with few injuries and deaths. However, soon after returning from duty, a large number of veterans began reporting health problems they believed were associated with their service in the Gulf. At the request of Congress, the Institute of Medicine (IOM) has been conducting an ongoing review of the evidence to determine veterans' long-term health problems and potential causes. The fourth volume in the series, released in 2006, summarizes the long-term health problems seen in Gulf War veterans. In 2010, the IOM released an update that focuses on existing health problems and identifies possible new ones, considering evidence collected since the initial summary. Gulf War and Health: Volume 10 is an update of the scientific and medical literature on the health effects associated with deployment to the Gulf War that were identified in Volumes 4 and 8. This report reviews and evaluates the associations between illness and exposure to toxic agents, environmental or wartime hazards, or preventive measures and vaccines associated with Gulf War service, and provides recommendations for future research efforts on Gulf War veterans.

[U.S. Navy Program Guide - 2017](#) Department Of the Navy 2019-03-12 The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

Effects of National Strategic Policy on the Military Engineer Force Structure from 1919 through 1991 (2009) 6. SEABEES: NATIONAL INSTRUMENT OF POWER PROJECTION (2013) INTRODUCTION: INTRODUCTION The Seabees of the United States Navy were born in the dark days following Pearl Harbor when the task of building victory from defeat seemed almost insurmountable. The Seabees were created in answer to a crucial demand for builders who could fight. Using sailors to build shore-based facilities; however, was not a new idea. Ancient Egyptians, Phoenicians, Greeks, and Romans did it. In more recent times, from the earliest days of the United States Navy, sailors who were handy with tools occasionally did minor construction chores at land bases. After the 7 December 1941 Japanese attack on Pearl Harbor and the United States entry into the war, the use of civilian labor in war zones became impractical. Under international law civilians were not permitted to resist enemy military attack. Resistance meant summary execution as guerrillas. The need for a militarized Naval Construction Force to build advance bases in the war zone was self-evident. Therefore, Rear Admiral Ben Moreell determined to activate, organize, and man Navy construction units. On 28 December 1941, he requested specific authority to carry out this decision, and on 5 January 1942, he gained authority from the Bureau of Navigation to recruit men from the construction trades for assignment to a Naval Construction Regiment composed of three Naval Construction Battalions. This is the actual beginning of the renowned Seabees, who obtained their designation from the initial letters of Construction Battalion. Admiral Moreell personally furnished them with their official motto: Construimus, Batuimus -- "We Build, We Fight."

[American Sniper](#) Chris Kyle 2012-01-03 The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster, Academy-Award nominated movie. "An amazingly detailed account of fighting in Iraq--a humanizing, brave story that's extremely readable." — PATRICIA CORNWELL, New York Times Book Review "Jaw-dropping...Undeniably riveting." —RICHARD ROEPER, Chicago Sun-Times From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him "The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

Kill Anything That Moves Nick Turse 2013-01-15 Based on classified documents and first-person interviews, a startling history of the American war on Vietnamese civilians Americans have long been taught that events such as the notorious My Lai massacre were isolated incidents in the Vietnam War, carried out by "a few bad apples." But as award-winning journalist and historian Nick Turse demonstrates in this groundbreaking investigation, violence against Vietnamese noncombatants was not at all exceptional during the conflict. Rather, it was pervasive and systematic, the predictable consequence of orders to "kill anything that moves." Drawing on more than a decade of research in secret Pentagon files and extensive interviews with American veterans and Vietnamese survivors, Turse reveals for the first time how official policies resulted in millions of innocent civilians killed and wounded. In shocking detail, he lays out the workings of a military machine that made crimes in almost every major American combat unit all but inevitable. Kill Anything That Moves takes us from archives filled with Washington's long-suppressed war crime investigations to the rural Vietnamese hamlets that bore the brunt of the war; from boot camps where young American soldiers learned to hate all Vietnamese to bloodthirsty campaigns like Operation Speedy Express, in which a general obsessed with body counts led soldiers to commit what one participant called "a My Lai a month." Thousands of Vietnam books later, Kill Anything That Moves, devastating and definitive, finally brings us face-to-face with the truth of a war that haunts Americans to this day.
