[The Fried Twinkie Manifesto](#) Ryan Moehring 2011-05-01 Whether solving biblical foreskin mysteries, having his head split open by a crowbar-wielding man named Thor or getting busted for pickpocketing in a remote Mexican desert, Ryan Moehring reveals in his debut collection of stories and essays, *The Fried Twinkie Manifesto*, that his irreverent wit and capacity for uncovering nuggets of insight from the rubble of the mundane make him one of humor's most promising newcomers. While maintaining a voice unmistakably his own, Moehring evokes the wild imagination of Tom Robbins, the soul of Sedaris, and the wisdom of Vonnegut. Though readers will more often than not find themselves laughing out loud, Moehring's eye for the profound and his unyielding honesty ensure that they are just as likely to cry—or cringe.

**Soldier Dogs** Maria Goodavage 2012-12-31 A leading reporter offers a tour of military working dogs' extraordinary training, heroic accomplishments, and the lasting impacts they have on those who work with them. People all over the world have been riveted by the story of Cairo, the Belgian Malinois who was a part of the Navy SEAL team that led the raid on Osama bin Laden's compound. A dog's natural intelligence, physical abilities, and pure loyalty contribute more to our military efforts than ever before. You don't have to be a dog lover to be fascinated by the idea that a dog-the cousin of that furry guy begging for scraps under your table-could be one of the heroes who helped execute the most vital and high-tech military mission of the new millennium. Now Maria Goodavage, editor and featured writer for one of the world's most widely read dog blogs, tells heartwarming stories of modern soldier dogs and the amazing bonds that develop between them and their handlers. Beyond tales of training, operations, retirement, and adoption into the families of fallen soldiers, Goodavage talks to leading dog-cognition experts about why dogs like nothing more than to be on a mission with a handler they trust, no matter how deadly the IEDs they are sniffing, nor how far they must parachute or rappel from aircraft into enemy territory. "Military working dogs live for love and praise from their handlers," says Ron Aiello, president of the United States War Dogs Association and a former marine scout dog handler. "The work is all a big game, and then they get that pet, that praise. They would do anything for their handler." This is an unprecedented window into the world of these adventurous, loving warriors.

From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.

**The Book of L** G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
