Caterer & Hotelkeeper 1990-08

Cooking for One America’s Test Kitchen 2020-09-01 Discover the joy of cooking for yourself with more than 160 perfectly portioned, easy-to-execute recipes, flexible ingredient lists to accommodate your pantry, and ideas for improvising to your taste. Taking care to prepare a meal for yourself is a different experience than cooking for others. It can be a fun, casual, and (of course) delicious affair, but there are challenges, from avoiding a fridge full of half-used ingredients to ending up with leftovers that become boring after the third reheat. Cooking for One helps you make cooking for yourself special without becoming a chore with unfussy yet utterly appealing meals that rely on ingredients you already have on hand, like Garam Masala Pork Chop with Couscous and Spinach and Weeknight Chicken Cacciatore. Don't have exactly the right ingredients? Never fear--with a "Kitchen Improv" box on every page, we offer ideas for altering the dish so it works for you. And for those weeks you didn't make it to the supermarket, we use a "Pantry Recipe" icon to clearly mark recipes that rely entirely on our checklist for a well-stocked pantry. We show you when it's worth making two servings (but never more) with our "Makes Leftovers" icon, and suggest how to transform those leftovers into a whole new meal. (We love our Spice-Rubbed Flank Steak with Celery Root and Lime Yogurt Sauce served over arugula as a hearty salad the next day.) Ingredients themselves often lead you to another exciting meal--when you're left with half an eggplant from Simple Ratatouille, we direct you to Broiled Eggplant with Honey-Lemon Vinaigrette as the perfect way to use it up. And if the thought of a sink full of dishes keeps you out of the kitchen, there are plenty of appealing one-pan dinners like Sheet Pan Sausages with Sweet Potatoes, Broccoli Rabe, and Mustard-Chive Butter or Couscous with Shrimp, Cilantro, and Garlic Chips that are here to save the day.

Architects' Data Ernst Neufert 1991-01-15 This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Cooking with Convection Beatrice Ojakangas 2009-02-25 Beatrice Ojakangas, an authority on convection cooking and author of more than two dozen previous cookbooks, explains how to use your convection oven to achieve perfect results in dramatically less time than with a conventional oven. If you own a convection oven, but don't really know how to use it, this book is for you. Cooking with Convection supplies more than 150 great recipes for snacks and appetizers; pizza and foccacia; soups; roast beef, lamb, pork and poultry; savory pies and tarts; casseroles and pasta; vegetables; yeast breads and quick breads; cakes, cookies, pies, and pastries; and much, much more. Try Melted Onion Tart with Parmigiano-Reggiano, Mexican Vegetable Tortilla Soup, Tandoori Salmon with Cucumber Sauce, Asian Spiced Roast Whole Chicken, and Cocoa Cake with Easy Buttercream Frosting, among so many imaginative and easy dishes. You will learn: *How to cook a whole meal in your oven-from meat to side dishes to dessert--all at the same time *How to cook multiple batches of cookies, cakes, and pies on three or even four oven shelves *How to roast and bake in a third less time than in a conventional oven while achieving even better results *How to calculate the correct temperature and timing for convection cooking if you are using a standard recipe By circulating hot air around food, convection ovens cook and brown food much more quickly and at a lower temperature than conventional ovens, while retaining food’s natural juiciness and flavor. With this book you will be able to save significant amounts of time and effort while turning out delicious dishes for everyday meals and easy entertaining.

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration’s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

Bootstraps and Metaphors Lawrence ‘SmoothBlack Yates 2010-11 This is a book of essays featuring Black economic self-help initiatives that were imagined, envisioned and written by Lawrence ‘SmoothBlack’ Yates. He sees himself as a champion of Black people’s dreams, wishes and visions. He passionately believes in the greatness of Black people and in a prosperous Black future built by Black people. Lawrence loves applying his visionary abilities to Black problem-solving and Black nation-building. He thought solving the most complex chess problems was exciting, but he found Black problem-solving to be even more exciting. His understanding of history, along with his strategic chess skills and abilities in Black problem-solving, helps him to make everything simple, practical and logical. Lawrence is an art designer, author, self-taught historian, economics enthusiast, a Black visionary, Black leader, chess player, poker player and strategic thinker.
