Guillaume Faye and the Battle of Europe Michael O'Meara 2013-01 Europe is at war and does not know it. She is overrun by invaders from the Global South, who seek to replace those who have inhabited her lands for at least the last 30,000 years. She is subject to an American overlord, whose world system dictates her de-Europeanization and globalization. She is mismanaged and betrayed by EU technocrats, corrupt politicians, and plutocratic elites. Without a revolutionary mobilization in her defense, the thousand-year-old civilization that grew out of the medieval Respublica Christiana and that we today associate with 'Europe' - along with the unique genetic heritage of her peoples - will forever cease to exist. Guillaume Faye - doctorate from one of France's most prestigious Ecoles, social philosopher, author of numerous books and articles - is the Cassandra warning Europeans of their approaching extinction, and the need to prepare for the impending Battle of Europe. Michael O'Meara, Ph.D., studied social theory at the Ecoles des Hautes Etudes en Sciences Sociales, and modern European history at the University of California. He is the author of *New Culture, New Right: Anti-Liberalism in Postmodern Europe* (2004)."

(Not that You Asked) Steve Almond 2007-09-11 How does Steve Almond get himself into so much trouble? Could it be his incessant moralizing? His generally poor posture? The fact that he was raised by a pack of wolves? Frankly, we haven't got a clue. What we do know is that Almond has a knack for converting his dustups into essays that are both funny and furious. In *(Not that You Asked)*, he squares off against Sean Hannity on national TV, nearly gets arrested for stealing "Sta-Hard" gel from his local pharmacy, and winds up in Boston, where he quickly enrages the entire population of the Red Sox Nation. Almond is, as they say in Yiddish, a tumbler. Almond on personal grooming: "Why, exactly, did I feel it would be 'sexy' and 'hot' to have my girlfriend wax my chest? I can offer no good answer to this question today. I could offer no good answer at the time." On sports: "To be a fan is to live in a condition of willed helplessness. We are (for the most part) men who sit around and watch other men run and leap and sweat and grapple each other. It is a deeply homoerotic pattern of conduct, often interracial in nature, and essentially humiliating." On popular culture: "I have never actually owned a TV, a fact I mention whenever possible, in the hopes that it will make me seem noble and possibly lead to oral sex." On his literary hero, Kurt Vonnegut: "His books perform the greatest feat of alchemy known to man: the conversion of grief into laughter by means of courageous imagination." On religion: "Every year, when Chanukah season rolled around, my brothers and I would make the suburban pilgrimage to the home of our grandparents, where we would ring in the holiday with a big, juicy Chanukah ham." The essays in *(Not that You Asked)* will make you laugh out loud, or, maybe just as likely,

hurl the book across the room. Either way, you'll find Steve Almond savagely entertaining. Not that you asked. "A pop-culture-saturated intellectual, a kindly grouch, vitriolic Boston Red Sox hater, neurotic new father and Kurt Vonnegut fanatic... [Almond] scores big in every chapter of this must-have collection. Biting humor, honesty, smarts and heart: Vonnegut himself would have been proud." — Kirkus Reviews (starred review)

Flight Dynamics Principles Michael V. Cook 2013-10-09 Flight dynamicists today need not only a thorough understanding of the classical stability and control theory of aircraft, but also a working appreciation of flight control systems and consequently a grounding in the theory of automatic control. In this text the author fulfills these requirements by developing the theory of stability and control of aircraft in a systems context. The key considerations are introduced using dimensional or normalised dimensional forms of the aircraft equations of motion only and through necessity the scope of the text will be limited to linearised small perturbation aircraft models. The material is intended for those coming to the subject for the first time and will provide a secure foundation from which to move into non-linear flight dynamics, simulation and advanced flight control. Placing emphasis on dynamics and their importance to flying and handling qualities it is accessible to both the aeronautical engineer and the control engineer. Emphasis on the design of flight control systems Intended for undergraduate and postgraduate students studying aeronautical subjects and avionics, systems engineering, control engineering Provides basic skills to analyse and evaluate aircraft flying qualities

Introduction to Engineering Materials Vernon John 1992 The first edition of this highly successful text aimed, 'to deal with the basic principles of materials science in a simply yet meaningful manner'. The second edition broadened the scope to incorporate the higher years of a degree course and included many more worked examples. This new third edition remains firmly targetted at the undergraduate market, and is comprised of five main sections: Materials Science, Engineering Materials, Forming Processes, Behaviour in Service and Property and Evaluation Tests, resulting in 32 chapters (as compared to 17 in the 2nd edition). The numbers of worked examples have been reduced, due to the publication of John's Work Out: Engineering Materials which is recommended to be used alongside the main text and is comprised mainly of worked examples and problems.

Jung and the Postmodern Christopher Hauke 2013-10-23 What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and

profession alike.

Securing Outer Space Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected – but not challenged – the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to 'bring back space' into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.

(Schmalix) Hubert Schmalix 2007 The Austrian painter Hubert Schmalix is best-known as a Neo-Expressionist. In the late 1970s and early 80s, his powerfully colorful works explored the genres of the still life, landscape, nude and portrait in a process that became increasingly expressive, taking on a great affinity to the painters of Die Brücke. In the mid-1980s, the female nude became Schmalix's dominant subject, and he began to work in the tradition of colorful Asian woodcuts. In the 1990s, his vocabulary expanded through his encounter with West Coast school painting to include religious subjects, the image of Christ and cityscapes of Los Angeles. In his most recent works, Schmalix has reduced his palette, and, in the tradition of photographer Nobuyoshi Araki, devoted himself to the portrayal of the female nude in erotic bondage rituals. Featuring a representative selection of paintings, this book is the first to provide a survey of the artist's entire oeuvre.
