Everbound Brodi Ashton 2013-02-14 It's been two months since the dark tunnels of the underworld came for Nikki Beckett. That night, Nikki's boyfriend, Jack, made the ultimate sacrifice and took her place in the Everneath for eternity - a debt that should have been hers. Every night Jack appears in her dreams, lost and confused, and wasting away. All Nikki wants is to save him before it's too late, but no matter how hard she tries to reach for his hand, she can never find it. Desperate for answers, Nikki turns to Cole, the immortal bad boy who wants to make her his Queen - and the one person least likely to help. But it seems Nikki has touched his heart, and surprisingly, Cole agrees to help in the only way he can - by taking Nikki to the Everneath himself. As they descend into the heart of the Everneath Nikki and Cole discover that their journey will be more difficult than they'd anticipated, and more deadly. Nikki vows to stop at nothing to save Jack - even if it means making an incredible sacrifice of her own...

Understanding Aleister Crowley's Thoth Tarot Lon Milo DuQuette 2017-09-01

Originally published in 2003, Understanding Aleister Crowley's Thoth Tarot has proved to be the essential guide to accessing the unique symbolism and meaning of Aleister Crowley's remarkable tarot deck along with the deeply textured artwork of Lady Frieda Harris. Crowley authority Lon Milo DuQuette starts by providing an insightful historical background before delving into descriptions of each card in depth, from a tarot perspective and from an expanded, magickal point of view. He first describes the tarot meaning of each card in detail and then explains all the other attributions Crowley intended. This unique guide has been updated with a new introduction that provides information on the unicursal hexagram cards included with the deck but never explained. Replaces eISBN 9781609257347

Competency Based Education And Training John Burke 2005-10-18 A selection of papers from the first symposium devoted to competency based learning held in March 1989. The book provides an historical backdrop for anyone coming new to the study of Competency-Based Education and Training (CBET).

A SECRET SORROW Karen Van Der Zee 2015-04-13 After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. The Polemic of the Pastorals Lloyd Pietersen 2004-05-27 Much historical-critical work on the opponents in the Pastoral Epistles has resulted in sweeping generalizations concerning their Jewish and/or Gnostic nature. Literary analyses have been somewhat more promising in focusing on the stereotypical nature of the polemic, but either fail to do justice to the urgency of the language in the Pastorals or do not provide a convincing description of the opponents. Here Pietersen approaches the problem of the opponents from a socio-scientific perspective. Utilizing labeling theory and social control theory from the sociology of deviance, he argues that the Pastorals function as a literary version of a status degradation ceremony whereby previously influential insiders within the community are transformed into outsiders.

The Australian Millionaire's Love-Child Robyn Grady 2008-07-01 Sophie Gruebella is happy with her single life— until she overhears her friends discussing why she's still single! Could this be why she falls into bed with a man who's her complete opposite? Cooper Smith is as driven as he's drop-dead gorgeous! Cooper has life all planned out and his night with Sophie was

amazing, but—on mutual agreement—not to be repeated. Three months later: the stick has turned pink. Sophie's expecting...and Cooper has just proposed a shotgun marriage....

Conservation Farming on Steep Lands W. C. Moldenhauer 1988 Material for this book was originally presented at a workshop "Soil and water conservation on steep lands" held in San Juan, Puerto Rico, March 22-27, 1987. Experiences from successful soil and water conservation projects on steep lands are compared to determine common principles involved that might be applied world-wide. Various case studies and country-reports are included in the book

Engineering a Safer World Nancy G. Leveson 2012-01-13 A new approach to safety, based on systems thinking, that is more effective, less costly, and easier to use than current techniques. Engineering has experienced a technological revolution, but the basic engineering techniques applied in safety and reliability engineering, created in a simpler, analog world, have changed very little over the years. In this groundbreaking book, Nancy Leveson proposes a new approach to safety—more suited to today's complex, sociotechnical, software-intensive world—based on modern systems thinking and systems theory. Revisiting and updating ideas pioneered by 1950s aerospace engineers in their System Safety concept,

and testing her new model extensively on real-world examples, Leveson has created a new approach to safety that is more effective, less expensive, and easier to use than current techniques. Arguing that traditional models of causality are inadequate, Leveson presents a new, extended model of causation (Systems-Theoretic Accident Model and Processes, or STAMP), then shows how the new model can be used to create techniques for system safety engineering, including accident analysis, hazard analysis, system design, safety in operations, and management of safety-critical systems. She applies the new techniques to real-world events including the friendly-fire loss of a U.S. Blackhawk helicopter in the first Gulf War; the Vioxx recall; the U.S. Navy SUBSAFE program; and the bacterial contamination of a public water supply in a Canadian town. Leveson's approach is relevant even beyond safety engineering, offering techniques for "reengineering" any large sociotechnical system to improve safety and manage risk.

The Grace Walk Experience Steve McVey 2008-03-01 For years, Steve McVey's Grace Walk (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to

embrace a faith lived in abundance and grace. Now The Grace Walk Experience workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.

SIMD Programming Manual for Linux and Windows Paul Cockshott 2013-03-09 A number of widely used contemporary processors have instruction-set extensions for improved performance in multi-media applications. The aim is to allow operations to proceed on multiple pixels each clock cycle. Such instruction-sets have been incorporated both in specialist DSPchips such as the Texas C62xx (Texas Instruments, 1998) and in general purpose CPU chips like the Intel IA32 (Intel, 2000) or the AMD K6 (Advanced Micro Devices, 1999). These instruction-set extensions are typically based on the Single Instruction-stream Multiple Data-stream (SIMD) model in which a single instruction causes the same mathematical operation to be carried out on several operands, or pairs of operands, at the same time. The level of parallelism supported ranges from two floating point operations, at a time on the AMD K6 architecture to 16 byte operations at a time on the Intel P4 architecture. Whereas processor architectures are moving towards greater levels of parallelism, the most widely used programming languages such as C, Java and Delphi are structured around a model of computation in which operations take place on a single value at a time. This was appropriate when processors

worked this way, but has become an impediment to programmers seeking to make use of the performance offered by multi-media instruction-sets. The introduction of SIMD instruction sets (Peleg et al.

Engaging the Senses: Object-Based Learning in Higher Education Helen J. Chatterjee 2016-03-09 The use of museum collections as a path to learning for university students is fast becoming a new pedagogy for higher education. Despite a strong tradition of using lectures as a way of delivering the curriculum, the positive benefits of 'active' and 'experiential learning' are being recognised in universities at both a strategic level and in daily teaching practice. As museum artefacts, specimens and art works are used to evoke, provoke, and challenge students' engagement with their subject, so transformational learning can take place. This unique book presents the first comprehensive exploration of 'object-based learning' as a pedagogy for higher education in a broad context. An international group of authors offer a spectrum of approaches at work in higher education today. They explore contemporary principles and practice of object-based learning in higher education, demonstrating the value of using collections in this context and considering the relationship between academic discipline and object-based learning as a teaching strategy.

Nonequilibrium Hypersonic Aerothermodynamics Chul Park 1990-03-01

Describes the interaction between the fluid flow and the high temperature phenomena experienced in the hypersonic regime. Presents the principles of aerothermodynamics in nonequilibrium hypersonic flow regimes, covering theory, application and surface phenomena. Chapters 1 to 5 explain how to develop computational fluid dynamics (CFD) techniques for computing nonequilibrium, chemically reacting flows in the hypersonic regime. Chapters 6 to 8 examine the important physical phenomena that occur in hypersonic flows. The final chapter is devoted to the nonequilibrium kinetics at solid surfaces, which is useful in addressing the problems of the nonequilibrium gas-surface interactions that arise in hypersonic flight.

Earth Day Melissa Ferguson 2021 Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.

What does Good Education Research Look Like? Lyn Yates 2004-03-16 "a powerful, well informed argument for the importance of pluralism... This book will tell young researchers what they need to know about doing educational research; it will encourage experienced researchers to see their own practice in context. It is a profound book that everyone should read." – Professor Jane Gaskell, Dean, OISE, University of Toronto "This brilliant guide to judging educational research examines the most basic questions about research practice that most people think are settled, and reveals them as problematic... Humorous, sharp, and thoughtful, this readable inquisition explores from differing

perspectives 'what does good education research look like' in multiple forms including dissertations, journal articles, and grant proposals." – Sari Knopp Biklen, Laura and Douglas Meredith Professor, Syracuse University, USA This book explains and critically examines some key debates about the quality and value of education research, and shows how it must meet different demands in different places, times and conditions. A major part of the book provides detailed analyses and guidance to different areas in which education research is judged: from academic theses to the press; from highest level competition for prestigious grants to collaborative work with practitioners. Lyn Yates asks probing questions in six education research arenas – the thesis, the research grant application, the journal article, the consultancy application, book publishing, and the press: Who are the judges here? What expectations and networks do they bring to the task? What are the explicit and implicit criteria for good research in that area? What are the common failings? What does good research look like? The book is an indispensable companion to existing textbooks on research methodology. It provides a clear and provocative discourse about the banalities and disorderliness in which education researchers have to operate.
