Dr. Jekyll & Mr Hyde Francis Gilbert 2014 "Clearly Francis Gilbert is a gifted and charismatic teacher," Philip Pullman, author of 'Northern Lights'. Are you struggling to understand Robert Louis Stevenson's classic novel 'Dr Jekyll and Mr Hyde'? Or are you an English teacher wanting ready-made exercises and guidance to help you teach this difficult text? Do your students need support to understand the language properly and work independently on the book? This brilliant edition of Stevenson's novel may be the answer to your prayers. Written by an experienced teacher and best-selling author, this version is aimed at students who must analyse the text in depth or teachers wanting to deliver outstanding lessons on it. This book contains an annotated complete text, numerous essays on the novel, including detailed accounts of Robert Louis Stevenson's life, relevant contexts and discussion of vital themes and imagery. The complex vocabulary of the book is analysed throughout, and simple explanations of what is happening punctuate each chapter. Furthermore, there are academic explorations of the issues as well as comprehensive question and answer sections at the end of each chapter, including a "fill-in-the-blanks" summary to check understanding. At the end of the guide, there is advice on how to write successful essays and assignments. There are also plenty of pointers to help students develop their own personal responses, including thought-provoking thematic questions, links to the author's YouTube readings and explanations, and creative response tasks.

Sustainable Human Resource Management Ina Ehnert 2009-07-07 Predictions are that sustainability becomes the next big topic for Human Resource Management after internationalization and globalization. This book gives new answers to these questions: - How can HRM contribute to attracting, developing and retaining highly qualified human resources over time? - How can a paradox perspective contribute to understanding and coping with paradoxical tensions? - How can sustainability be used as a 'deliberate strategy' for HRM? The conceptual part of the book looks at the notion of sustainability, opens it up for Strategic HRM and identifies blind

spots in Strategic HRM theory. Paradox theory is introduced as an analytical framework for Sustainable HRM. Initial suggestions are made for sustainability strategies and for coping with paradoxes and tensions. The exploratory part examines how 50 European Multinationals communicate their understanding of sustainability and HRM and which HR issues and practices they are linking to the topic.

Things Fall Apart Chinua Achebe 2013-04-25 Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.

An African Elegy Ben Okri 2015-04-30 Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an

upbeat restorative ending' - Giles Foden, Times Literary Supplement

When a strike at the factory where her parents work turns violent, it seems as though her whole world is about to explode...

Promoting Change Through Action Research Franz Rauch 2014 "Bringing a different world into existence - Action Research as a trigger for innovations" was the overarching theme and vision of the international CARN Conference 2011 in Vienna. The chapters in this book are drawn mainly from conference contributions. The authors share practical knowledge which has arisen from their work, and reflect on development processes in schools, in teacher education and professional development, social work, social pedagogy, health care and community development. This book offers what some critics believe has been missing in recent action research literature, namely first person accounts of action researchers who endeavour to change working conditions and social relations in their environment through the conduct of action research. This book is also distinguished by assembling contributions from people who are linking action research to a broad diversity of differing contexts, and who are exploring topics or issues across various applications of action research

Innovative Wastewater Treatment & Resource Recovery Technologies: Impacts on Energy, Economy and Environment Juan M. Lema 2017-06-15 This book introduces the 3R concept applied to wastewater treatment and resource recovery under a double perspective. Firstly, it deals with innovative technologies leading to: Reducing energy requirements, space and impacts; Reusing water and sludge of sufficient quality; and Recovering resources such as energy, nutrients, metals and chemicals, including biopolymers. Besides targeting effective C,N&P removal, other issues such as organic micropollutants, gases and odours emissions are considered. Most of the technologies analysed have been tested at pilot- or at full-scale. Tools and methods for their Economic, Environmental, Legal and Social impact assessment are described. The 3R concept is also applied to Innovative Processes design,

considering different levels of innovation: Retrofitting, where novel units are included in more conventional processes; Re-Thinking, which implies a substantial flowsheet modification; and Re-Imagining, with completely new conceptions. Tools are presented for Modelling, Optimising and Selecting the most suitable plant layout for each particular scenario from a holistic technical, economic and environmental point of view.
